Overview & Current Events

Enterprise Products Partners was founded in 1968. It is structured as a Master Limited Partnership, or MLP, and operates as an oil and gas storage and transportation company. Enterprise Products has a tremendous asset base which consists of nearly 50,000 miles of natural gas, natural gas liquids, crude oil, and refined products pipelines. It also has storage capacity of more than 250 million barrels. These assets collect fees based on materials transported and stored. On February 1, 2023, Enterprise Products announced its financial results for the three months and year ended December 31, 2022. The partnership generated Q4 GAAP EPS of \$0.65, beating analyst estimates by \$0.03 along with revenue of \$13.65B (+20.1% Y/Y), missing analyst estimates by \$1.09B. DCF for the fourth quarter of 2022 was \$2.0 billion, which provided 1.9 times coverage of the \$0.49 per common unit cash distribution. Enterprise retained \$956 million of DCF in the fourth quarter of 2022 while generating record adjusted CFFO for the fourth quarter of \$2.1 billion, compared to \$1.8 billion for the same quarter in 2021. For 2023, management expect growth capital investments to be approximately \$2.3 billion to \$2.5 billion and sustaining capital expenditures to be approximately \$400 million.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
DCF/S	\$2.54	\$2.71	\$2.52	\$2.45	\$2.56	\$3.30	\$3.43	\$2.91	\$3.00	\$3.52	\$3.52	\$4.04
DPS	\$1.35	\$1.43	\$1.51	\$1.59	\$1.67	\$1.71	\$1.76	\$1.79	\$1.80	\$1.90	\$1.96	\$2.26
Units²	1864.1	1933.4	2019.3	2118.9	2161.1	2184.9	2189.2	2181.6	2182.1	2175.6	2175.6	2000

In this report, DCF-per-unit is used instead of earnings-per-share, since DCF is a more accurate measure of cash flow for an MLP. Enterprise has positive growth potential moving forward, thanks to new projects and exports. It has several billion dollars' worth of major capital projects currently under construction. They expect all of these projects to come online in the coming years, boosting cash flows.

Exports are also a key growth catalyst. Demand for liquefied petroleum gas and liquefied natural gas, or LPG and LNG respectively, is growing at a high rate across the world, particularly in Asia. That said, the world is also moving rapidly towards renewable energy and the pipeline industry is facing political and regulatory pressures right now, limiting new growth project opportunities. As a result, we expect mediocre annual DCF-per-unit growth through 2028. Distributions are expected to rise at a slow rate as well as management focuses on generating free cash flow after distributions. Unit buybacks and deleveraging will likely be tailwinds for per-unit growth, though.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/DCF	13.0	13.3	10.2	11.1	10.4	7.2	7.0	6.5	7.4	7.2	7.3	8.0
Avg. Yld.	4.1%	4.0%	5.9%	5.8%	6.3%	7.2%	7.3%	9.5%	8.1%	7.6%	7.6%	7.0%

Enterprise Products Partners (EPD)

Updated February 8th, 2023 by Samuel Smith

In this report, Enterprise Products units are valued on the basis of price-to-DCF, since DCF is used instead of traditional earnings-per-share. In the past 10 years, units traded for an average price-to-DCF ratio of under 10x. As a result, Enterprise Products appears to be undervalued today. That being said, current growth headwinds facing the space and higher interest rates are causing us to reduce our fair value multiple to 8 times DCF. As a result, we expect the multiple to only increase slightly over the next five years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

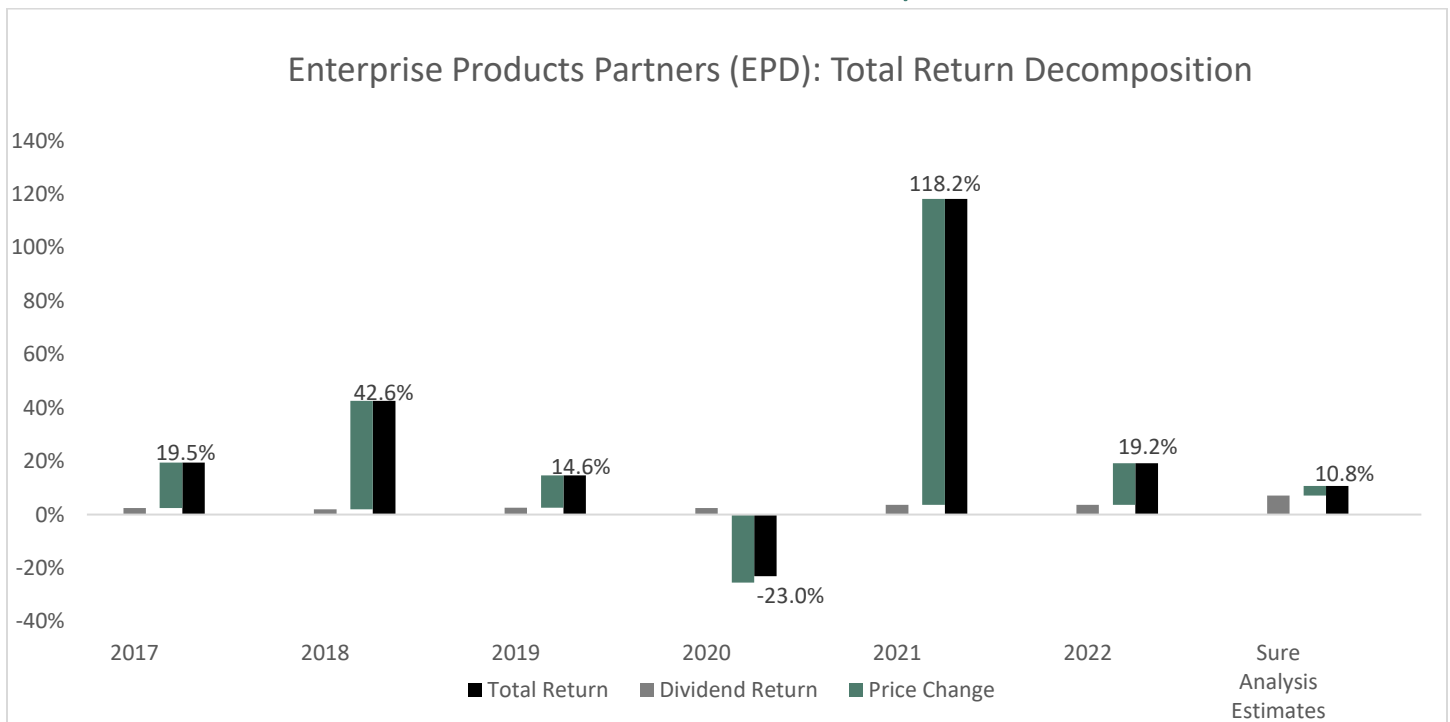

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	53.1%	52.8%	59.9%	64.9%	65.2%	51.8%	51.3%	61.5%	60.0%	54.0%	55.7%	55.9%

In terms of safety, Enterprise Products Partners is one of the strongest midstream MLPs. It has credit ratings of BBB+ from Standard & Poor's and Baa1 from Moody's, which are higher ratings than most MLPs. It also has a distribution coverage ratio of nearly 2x, leaving room for distribution increases and unit repurchases. Enterprise Products' high-quality assets generate strong cash flow, even in recessions. As a result, Enterprise Products has been able to raise its distribution to unitholders for 24 years in a row. Enterprise Products has tremendous competitive advantages, primarily its vast network of assets. It would be enormously costly to build out a network of pipelines and terminals large enough to compete with Enterprise Products.

Final Thoughts & Recommendation

Enterprise Products has an excellent network of assets and durable competitive advantages. In addition, its cash flow has remained fairly stable through the sharp energy market volatility over the past half decade. Enterprise Products has a 7.6% current distribution yield, which is a highly attractive yield for income investors. We believe Enterprise Products can generate total returns of 10.8% annualized over the next half decade, and therefore have a Buy rating as we view the partnership as one of the best MLPs in the market.
