Overview & Current Events

Ingredion Inc (INGR) is a multinational ingredient solutions company headquartered in Westchester, Illinois. Founded in 1906, INGR was incorporated as a Delaware corporation in 1997, operates in over 44 countries, and employs more than 11,000 people. The company is principally engaged in producing and selling starches and sweeteners for various industries. Essentially Ingredion turns grains, fruits, vegetables, and other plant-based materials into value-added ingredient solutions for the food, beverage, animal nutrition, brewing, and industrial markets. Ingredion operates in four business segments: North America, South America; Asia-Pacific; and Europe, Middle East, and Africa ("EMEA").

INGR released fourth-quarter 2022 results on February 8th, 2023. In Q4, Ingredion saw growth in all regions as net sales increased 13% to \$1.99 billion. The company has begun to offset inflation by rising prices in North America and South America, where net sales grew 17% and 13%, respectively. Asia-Pacific and EMEA also had solid gains and increased sales by 5% and 7%, respectively, again due to rising prices and the momentum of PureCircle, which has 14% net sales growth year-over-year. In addition, global specialties grew mid-double digits while plant-based protein grew ~108% worldwide, driven by Sioux City pea protein isolate. Adjusted EPS was \$1.71, an increase of 48% year over year.

The fourth-quarter capped off an outstanding year from INGR, where net sales increased 15% during 2022 compared to 2021. Adjusted EPS also saw a 15% growth to \$7.45, while the company also distributed \$288 million in the form of dividends and share repurchases.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$5.05	\$4.74	\$5.51	\$6.55	\$7.06	\$6.17	\$6.13	\$5.15	\$6.67	\$7.34	\$8.05	\$9.33
DPS	\$1.56	\$1.68	\$1.74	\$1.90	\$2.20	\$2.45	\$2.51	\$2.54	\$2.57	\$2.72	\$2.84	\$3.62
Shares	77.0	73.6	71.6	72.3	72.0	70.9	66.9	67.2	67.1	66.7	65.7	65.7

Ingredion's earnings-per-share have grown at a CAGR of 5% over the last nine years. While the company saw a small decline in 2019/2020 due to lower sweetener demand, commodity margin pressures, and higher production and supply chain costs, its cost-smart initiative enabled it to save ~\$170 million. In addition, the company's ability to combat rising costs in corn and strong volume growth helped the company beat our \$6.87 2022 EPS estimate.

The company is guiding mid-double-digit growth in net sales for 2023 with an adjusted EPS between \$7.70 to \$8.40. Given management's strong performance over the last couple of years, volumes increasing with solid demand with breakthrough product innovation in the specialties segment, we have no reason to doubt expectations. Accordingly, we have estimated EPS at the midpoint of expectations at \$8.05, giving ~10% growth year-over-year.

In September 2022, the company announced a 9.2% dividend increase. This was the company's 12th consecutive dividend increase and its most significant increase since 2017. Moreover, the size of the dividend increase breaks the declining trend for dividend increases over the last four years. Based on strong growth, we have increased our dividend growth rate estimate to 5% from 2% and predict a \$3.62 div/share by 2028.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2027
Avg. P/E	13.4	14.3	15.2	16.9	16.1	16.4	13.0	15.3	14.6	13.2	12.1	15.0
Avg. Yld.	2.1%	2.3%	2.0%	1.6%	1.7%	2.1%	2.9%	3.1%	2.9%	2.9%	2.9%	2.6%

Ingredion expects double-digit growth in 2023 as the global market share in clean and simple ingredients, global alternative protein ingredients, and reduced sugar ingredients will increase to over \$70 billion within the next five years. The company has positioned itself to take advantage of this growth by expanding its specialty ingredient portfolio in 2019. This will enable rapid, efficient customer co-creation to develop new food and beverages. The company is starting to see the benefits of this expansion as Sioux City has doubled its production of pea protein isolate, helping to increase sales by three figures worldwide. Ingredion is currently trading at a price-to-earnings ratio of 12.1, which is below its average PE ratio since 2012. The stock is also trading at 80% of our fair value estimate of \$121, and we currently have a five-year price target of \$140.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	31%	35%	32%	29%	31%	40%	41%	49%	39%	37%	35%	39%

Ingredion is a leading provider of ingredients to industries that show growth potential, including the food and beverage industry. The company has a simple business model and nicely positioned itself in the global food supply chain. During the Great Recession, the company performed relatively better than the broader market, with a slight drop in sales and earnings in 2009 before quickly returning to growth in 2010. We have seen a similar trend during the COVID pandemic, with the company quickly returning to growth last year. However, supply chain issues and a higher inflationary environment can impact the company's bottom line. The starch and sweetener industry is a highly competitive industry, particularly in North America. Many companies' products are considered essential ingredients that compete with virtually identical products manufactured by other companies in the industry, such as Archer-Daniels-Midland (ADM). The company tries to gain a competitive advantage by investing heavily in R&D with a team of over 500 scientists who work on plant science, food formulations, and the development of non-food applications such as starch-based biopolymers.

Final Thoughts & Recommendations

INGR is a solid and straightforward business that will likely grow its dividend for the next five years. However, some risks should be considered, such as regulation, competition, and the price of raw materials, especially corn. Despite these challenges, we are confident the company can deliver on its expectations, and we estimate a five-year annual growth rate of 10%. Accordingly, Ingredion receives a buy recommendation from Sure dividend.
