Overview & Current Events

Monolithic Power Systems is a leading semiconductor company that designs, develops, and markets high-performance power solutions. The company utilizes its deep system-level and applications expertise to develop highly integrated monolithic systems used in computing and storage, automotive, industrial, communications, and consumer applications industries. Its mission is to reduce total energy consumption in its customers' systems with green, practical, and compact solutions. Monolithic Power generates around \$1.8 billion in annual revenues and is headquartered in Kirkland, Washington.

On February 8th, 2023, Monolithic Power increased its dividend by 33.3% to a quarterly rate of \$1.00.

On the same day, Monolithic Power reported its Q4 2022 and full-year results for the period ending December 31st, 2022. For the quarter, revenues grew by 36.7% year-over-year to \$460 million, once again powered by Monolithic's diversified growth strategy, technological innovation, investment in production capacity, and, importantly, broad-based market share gains. Notably, Storage, and Computing revenues grew by 55% to \$120.8 million, while Enterprise Data revenues jumped to \$68.4 million, a gain of 69% versus the prior-year period. Following strong top-line growth, adjusted EPS skyrocketed by 49.5% to \$3.17 compared to Q4 2021. For the year adjusted EPS was \$12.84, up 65% against FY2021.

As a result of excellent market dynamics, Monolithic expects Q1 revenues in the range of \$440 million to \$460 million, suggesting year-over-year growth of 19% at the midpoint of this outlook. Based on this estimate, the current market fundamentals, and Monolithic's net income margin expansion trajectory, we now expect FY2023 adjusted EPS of \$13.00. Keep in mind that adjusted EPS is a more meaningful valuation and performance metric than GAAP EPS due to Monolithic's high stock-based compensation expenses. However, all data shown in the table below reflects normalized results as originally reported in the company's 10K with the SEC.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$0.61	\$0.92	\$0.89	\$1.30	\$1.58	\$2.49	\$2.52	\$3.67	\$5.28	\$9.37	\$13.00	\$27.30
DPS	---	\$0.45	\$0.80	\$0.80	\$0.80	\$1.20	\$1.60	\$2.00	\$2.40	\$3.00	\$4.00	\$9.95
Shares¹	37.4	38.7	39.5	40.4	41.4	42.2	43.2	44.8	45.8	46.7	46.7	60.0

Monolith's EPS has been growing rapidly over the past decade on the back of increasing demand for efficient analog semiconductor solutions. Specifically, the company features a 10-year EPS CAGR of 35.5%. Despite Monolithic's prolonged success, EPS been snowballing over the past few years, as was also the case in FY2022. This is primarily due to the company's new cutting-edge products, which the market has welcomed with very strong demand. We anticipate EPS growth of around 16% in the medium-term, implying a significant deceleration from its current levels. This is to account for potential demand and production headwinds going forward. The ongoing supply crisis combined with a global shortage in the semiconductor industry should also ensure the company retains solid pricing leverage in the short to medium-term, which should further contribute to EPS growth.

In 2014, Monolithic initiated its quarterly dividend, which has grown with each new EPS plateau following higher

profitability. We expect DPS growth of around 20% in the medium-term, lower than the latest dividend hike of 33%, to be prudent. We assume that the company will retain a healthy payout ratio moving forward.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	39.5	46.0	56.2	50.0	58.2	52.6	57.5	72.8	85.2	42.7	40.4	27.0
Avg. Yld.	---	1.1%	1.6%	1.2%	0.9%	0.9%	1.1%	0.7%	0.5%	0.8%	0.8%	1.4%

Monolithic's historical P/E has averaged around 56 due to the company's constant rapid expansion. While we believe that the ongoing multiple expansion is not unreasonable based on Monolithic's accelerated growth and profitability prospects, we have set our medium-term fair multiple at 27. This is to account for potential headwinds caused by the cyclical nature of the semiconductor industry and the possibility for a slowdown in growth. Due to its rich valuation multiple, Monolithic's dividend payments have historically resulted in very low yields. Despite the likely rapid dividend growth, we expect dividends to remain a token of the total returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	---	49%	90%	62%	51%	48%	63%	54%	45%	32%	31%	36%

We consider Monolithic's dividend very safe, not only due to the stock's healthy payout ratio, which currently stands at around 1/3 of its adjusted EPS, but also due to the sky-high profitability growth expectations. The company also enjoys several qualities, including excellent margins, no long-term debt on its balance sheet, and continually strong R&D spending, which should help it stay above its competitors. That being said, the analog and mixed-signal semiconductor industry is highly competitive and will most certainly remain so. The company's primary competitors include industry giants such as Analog Devices, Infineon Technologies, Maxim Integrated Products, and NXP Semiconductors, which could easily gain market share if Monolithic doesn't remain constantly innovative. On the positive side, the company has displayed fantastic recession resiliency qualities, despite the cyclical nature of semiconductors due to its mission-critical products. Sales remained robust during the Great Financial Crisis and even accelerated through the COVID-19 pandemic.

Final Thoughts & Recommendation

Monolithic Power Systems has rewarded its shareholders with fabulous returns over the past decade, powered by spectacular top- and bottom-line growth. The company's explosive growth is being sustained quarter after quarter. While its strong growth performance is likely to persist, challenging valuation headwinds could shorten annualized returns to 8.0% through 2028, which we feel is a decent return level nonetheless. Due to a humbler total return outlook, we downgrade the stock to a hold. We note that fluxes in its growth rates can wildly swing total returns either way.
