Overview & Current Events

SAP SE develops, sells, and maintains a variety of enterprise software products that are used by corporations, governments, and educational agencies. The company employs more than 103,000 people and has more than 400,000 customers in 180 countries. SAP is headquartered in Germany and reports financial results in Euros. American investors can initiate an ownership stake in SAP through American Depositary Receipts that trade on the New York Stock Exchange under the ticker SAP.

SAP reported its fourth quarter earnings results on January 26. The company recorded revenues of €8.4 billion during the quarter, which is equal to around \$9 billion. SAP's revenues during the quarter were up 6% year over year, decelerating from the previous quarter's growth rate. SAP's cloud revenue growth totaled 33% during the quarter, which was slightly below the growth rate seen in the previous quarter. SAP's strong cloud revenue growth was a key driving factor for the company's overall solid revenue performance during the period.

SAP's earnings-per-share totaled €1.00, or around \$1.07 on an adjusted basis during the fourth quarter. This represents a decline versus the previous year's quarter. Profits also were significantly lower than what analysts had forecasted. During 2021, SAP generated compelling earnings-per-share growth, but profits declined in 2022 on the back of higher costs. For fiscal 2023, the company guides for revenue growth of ~24% at constant currencies in the cloud segment, while cloud and software revenue, overall, is forecasted to grow around 7% at constant currencies.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$3.83	\$3.54	\$3.21	\$3.21	\$4.03	\$4.96	\$5.70	\$6.34	\$7.75	\$4.37	\$6.00	\$8.82
DPS	\$1.11	\$1.36	\$1.22	\$1.30	\$1.36	\$1.60	\$1.67	\$1.87	\$2.26	\$2.08	\$2.08	\$3.13
Shares³	1194	1195	1198	1199	1197	1197	1194	1194	1190	1170	1150	1100

SAP has managed to generate impressive business growth over the last ten years. During the last decade the enterprise software giant compounded its adjusted earnings-per-share at 13% per year. The data in the above table is impacted by currency rate changes, since SAP reports its results in €, and generates a substantial amount of its revenues in € and other currencies. For US-based investors, results can thus vary widely on a year-to-year basis, depending on the currency rate changes between the € and the US\$. This holds true for the dividends as well, which are also declared in €.

SAP's management recently announced updated medium-term goals for the next couple of years, primarily centered around growth in its cloud business. SAP plans to grow its cloud computing revenues to €22 billion by 2025, which equates to roughly \$25 billion at current exchange rates. This is still several years ahead, but this would equate to an attractive longer-term cloud computing growth rate, compared to the forecasted cloud revenues of €15.5 billion in 2023. SAP has grown its revenue consistently in the past. We believe that the strong position in the enterprise software industry will allow SAP to grow its profits meaningfully as well, despite some margin headwinds in the near term.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	20.3	21.4	22.4	25.6	25.7	20.2	23.9	20.7	18.1	23.6	19.8	19.0
Avg. Yld.	1.4%	1.8%	1.7%	1.6%	1.3%	1.6%	1.2%	1.3%	1.3%	2.0%	1.7%	1.9%

SAP has been valued at a relatively high valuation throughout most of the last decade, trading for more than 20 times net profits during the majority of those years. Due to the company's above-average historic growth rate and strong position in the markets it addresses, it seems justified that SAP trades at somewhat of a premium valuation. Shares have risen since our last update and are now trading ahead of our fair value estimate. We see some downside potential for SAP's shares from a valuation perspective over the coming years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	31.7%	26.6%	29.7%	30.9%	34.7%	32.3%	29.3%	27.0%	29.2%	47.6%	34.7%	35.5%

SAP's dividend payout ratio never reached above 50%, even during the last financial crisis. Today, SAP pays out around one-third of its net profits in the form of dividends, which makes the dividend look quite safe. Due to currency rates fluctuating, the payout for US-based investors can vary from year to year, though, and declines are possible.

SAP's strongest competitive advantage is its recurring revenue business model. During fiscal 2020, more than two-thirds of the company's revenue was recurring in nature, or what management calls predictable revenue. This ratio of predictable revenue has risen consistently in the last couple of years. Recurring revenue allows the company to optimize customer retention rates and to use the resulting cash flows to aggressively invest in growth opportunities, such as its cloud business. Due to SAP's global scale and renowned brand, competition is not a major problem.

Final Thoughts & Recommendation

As a leading enterprise software company, SAP has established a strong global presence and benefits from scale advantages versus its peers. The company has delivered solid results in the past, including during the early phase of the pandemic, although 2022 was a weaker year. SAP has strong fundamentals. The total return outlook is solid but not overly compelling, which is why we rate SAP a hold at current prices.
