Overview & Current Events

Sumitomo provides commercial banking, leasing, securities, consumer finance, and related activities, primarily in Japan. The company has four segments: Wholesale Business, Retail Business, International Business, and Global Markets. The Wholesale Business segment offers financing, investment management, risk hedging, M&A advisory, leasing services, and more to commercial clients. The Retail Business offers wealth management, settlement, consumer finance, housing loans, and related services to consumers. The International Business segment offers loans, deposits, trade finance, project finance, derivatives, cash management services, underwriting services, leases, and more to commercial customers. Finally, the Global Markets Business offers forex products, bonds, stocks, derivatives, and related products and services to commercial customers globally. Sumitomo was founded in 2002 and is headquartered in Tokyo. Sumitomo employs about 100,000 people, and we note that the company's fiscal year ends in March. Sumitomo trades in Japan, but US-based investors can own ADRs via the SMFG ticker. The stock trades in the US with a market capitalization of \$60 billion, and the company should generate about \$13 billion in revenue this year. Note that Sumitomo reports results in Japanese Yen, but all figures have been converted to USD.

Sumitomo reported fourth quarter earnings on February 14th, 2023, and results were quite strong on the top line. For the nine-month period ending December 31st, 2022, revenue soared 46% on a comparable basis. Interest on loans was up 73% year-over-year as the bank takes full advantage of higher prevailing interest rates. However, interest expense was nearly five times higher as the cost of funds also soared, eating into potential profits.

Still, adjusted profit was up 23% year-over-year, and we've raised our estimate for this year accordingly. We now expect 88 cents in earnings-per-share for this year.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$0.86	\$1.09	\$0.86	\$0.94	\$0.65	\$0.83	\$0.63	\$0.29	\$0.58	\$0.80	\$0.88	\$0.97
DPS	\$0.23	\$0.23	\$0.23	\$0.27	\$0.27	\$0.32	\$0.32	\$0.35	\$0.34	\$0.35	\$0.32	\$0.32
Shares³	6772	6835	6841	6841	6852	7058	6993	6880	6855	6855	6850	6800

Sumitomo's earnings growth has been choppy to say the least over the years. The company produced a high of \$1.09 in earnings-per-share in 2014 but hasn't come anywhere close to that in subsequent years. We forecast the company's growth at 2% annually over the next five years but note that we think it will continue to see large swings in both directions given the volatile nature of its diverse business lines. Sumitomo has massive scale in Japan, being the country's second-largest bank, and Sumitomo is a huge payments provider in that country. While credit quality is improving, we still think Sumitomo will struggle to produce meaningful earnings growth from current levels, particularly as the base of earnings for 2023 is quite elevated. Rising expenses, we believe, will keep a lid on earnings growth despite rising interest rates.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	10.6	7.6	9.4	6.9	11.9	9.9	11.2	20.5	11.9	8.4	10.1	9.5
Avg. Yld.	2.6%	2.8%	2.9%	4.1%	3.5%	3.9%	4.6%	6.0%	4.9%	5.2%	3.6%	3.5%

Sumitomo's valuation has moved erratically over the years, as one would expect given the movement in earnings. We assess fair value at 9.5 times earnings, and shares go for 10.1 times earnings today. We therefore forecast a sizable headwind to total returns from the valuation and note that the dividend yield is now comparably low at 3.6%. The yield may come down some in the coming years if the valuation moves towards our estimate of fair value. We note Sumitomo pays variable dividends, and they're subject to currency risk since they are declared in Yen.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	27%	21%	27%	28%	41%	39%	51%	124%	59%	44%	36%	33%

The payout ratio has moved up and down with earnings over the years, but we see the current dividend as sustainable. Sumitomo is unlikely to be a dividend growth story, however, given its unpredictable earnings, in addition to its variable dividend policy.

Sumitomo has advantages of scale in Japan with its \$2+ trillion balance sheet, but otherwise, it provides substantially the same services as other financial companies. Recessions won't be kind to Sumitomo, either, as banks are beholden to economic strength for credit quality. We note credit quality has improved much since the initial spike lower from COVID, and Sumitomo's earnings have recovered quickly as a result.

Final Thoughts & Recommendation

Sumitomo has traded much higher since our last update, while earnings estimates have moved up slightly as well. The stock looks slightly expensive to us today, and the 3.6% dividend yield is weak based on Sumitomo's history. Given that the valuation has deteriorated with a 1.2% headwind expected, and the yield is 3.6%, we're reiterating the stock at a hold rating.
