Overview & Current Events

Coterra Energy (CTRA) is an oil and gas company that develops, explores, and produces oil, natural gas, and natural gas liquids. The business primarily operates in the Permian Basin, the Marcellus Shale area and the Anadarko Basin. The business makes most of its money from natural gas (86% of 2022 output) and oil (14% of 2022 output). The proved reserves of the company are approximately 78% natural gas, 10% oil and 12% natural gas liquids (NGLs). Overall, Coterra Energy is extremely sensitive to the dramatic cycles of the price of natural gas.

On October 1st, 2021, Coterra was formed through the combination of Cabot Oil & Gas (used to trade as COG) and Cimarex Energy (used to trade as XEC). With the new combined company, management believes to have built a diversified company with a strong free cash flow profile, and expects to enhance shareholder value by returning free cash flow to shareholders through dividends and share buybacks. Management is also targeting $100 million in G&A synergies from the merger.

In late February, Coterra Energy reported (2/22/23) financial results for the fourth quarter of fiscal 2022. In the year, the average realized price of gas nearly doubled, from $2.73 in 2021 to $4.91 in 2022, thanks to the sanctions of the U.S. and Europe on Russia for its invasion in Ukraine. As a result, Coterra Energy more than doubled its earnings-per-share, from $2.29 in 2021 to a new all-time high of $4.94 in 2022. Thanks to its record free cash flows, the company raised its regular dividend by 33% this year. However, its proved reserves declined -17% in 2022. This raises a red flag for the future growth prospects. In addition, due to an abnormally warm winter in the U.S. and Europe, the price of natural gas has plunged lately. As a result, we expect much lower earnings-per-share this year.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	$0.66	$0.25	-$0.28	-$0.91	$0.22	$1.24	$1.63	$0.50	$2.29	$4.94	***$3.00***	***$3.00***
DPS	$0.05	$0.08	$0.08	$0.08	$0.17	$0.25	$0.35	$0.40	$0.46	$0.60	***$0.80***	***$0.88***
Shares	422	418	414	457	466	448	418	401	504	781	***780***	***1000***

As a primarily gas upstream company, Coterra Energy is extremely sensitive to the swings of gas prices. This is clearly reflected in the highly volatile performance record of the company. Coterra Energy is currently thriving thanks to the sanctions imposed by western countries on Russia. Before the sanctions, Russia was producing about one-third of natural gas consumed in Europe. As a result, the sanctions greatly tightened the global gas market and led gas prices to skyrocket last year.

However, gas prices have deflated lately due to an abnormally warm winter in the U.S. and Europe. Moreover, there is a record number of renewable energy projects that are under development all over the world right now. When all these projects come online, they are likely to take their toll on the prices of oil and gas. Overall, we prefer to be cautious and assume that Coterra Energy will post essentially flat earnings-per-share in 2028 vs. 2023. While the company is likely to keep thriving in the short run, investors should never forget the dramatic cyclicality of this business.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	68.0	30.9	---	---	---	42.2	9.2	30.7	21.6	5.4	***8.7***	***8.0***
Avg. Yld.	1.8%	1.7%	1.9%	2.6%	2.8%	2.7%	2.4%	3.5%	3.6%	2.3%	***3.1%***	***3.7%***

As a cyclical business, Coterra Energy has fluctuating earnings and fluctuating price-to-earnings ratios. We estimate that a price-to-earnings ratio of about 8.0 is fair for the company under normal conditions. The stock is currently trading at a price-to-earnings ratio of 8.7. If it trades at our assumed fair valuation level in five years, it will incur a -1.6% annualized drag in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	8%	32%	---	---	77%	20%	21%	80%	20%	12%	***27%***	***29%***

Coterra Energy has a strong balance sheet, which will help the company endure a potential downturn in its business. However, the company is highly vulnerable to the downturns of the energy sector, as its earnings are extremely sensitive to the price of natural gas. Consequently, the stock is not suitable for income-oriented investors. It is suitable only for investors with a strong conviction for higher gas prices in the future.

Final Thoughts & Recommendation

Coterra Energy is a company that is positioned to benefit from potentially high gas prices in the future. However, we view the stock as unattractive right now, especially given that we have passed the peak of the natural gas market. We expect the stock to offer just a 1.7% average annual return over the next five years, as its 3.1% dividend may be partly offset by a -1.6% potential valuation headwind. We thus rate the stock as a sell.
