## Overview & Current Events

SK Telecom is the largest wireless telecom operator in Korea by revenue and number of subscribers. It was founded in 1984 as Korea Mobile Telecommunications and became SK Telecom in 1997. The company is a part of the SK Group, which owns about one third of the company and is one of the largest conglomerates in South Korea. The company trades on the NYSE under the ticker SKM as well as the Korea Exchange (XKR). SK Telecom has a market capitalization of \$7.9 billion.

In the second half of 2021, the company completed a corporate restructuring through a horizontal spin-off by splitting SK Telecom into two separate companies. SK Telecom remains the AI & Digital Infrastructure Company, and they have created a spin-off company which owns the semiconductor and New ICT assets, known as SK Square. On November 29<sup>th</sup>, SK Telecom conducted a 5-1 stock split to become more accessible to investors.

The company has also updated its dividend policy to pay quarterly going forward, rather than semiannually, which it has done for the last decade. Additionally, SK Telecom wants to pay 30% to 40% of EBITDA minus CAPEX on dividends.

SK Telecom reported fourth quarter 2022 results on February 8<sup>th</sup>, 2023. On a consolidated basis, revenue increased by 3.3% year-over-year. Operating income rose 16.2% compared to the fourth quarter of 2021. Consolidated net income was down nearly 61% compared to the prior year, as a result of the exclusion of equity method gains from SK Hynix and the impact of the aforementioned spin-off.

## Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
<b>EPS</b>	\$2.34	\$2.66	\$2.07	\$2.23	\$3.59	\$4.45	\$1.10	\$2.04	\$2.93	\$3.27	<b>\$2.20</b>	<b>\$2.68</b>
<b>DPS</b>	\$0.99	\$0.96	\$0.96	\$0.98	\$1.04	\$1.00	\$0.97	\$1.00	\$2.67	\$1.80	<b>\$1.42</b>	<b>\$1.49</b>
<b>Shares<sup>3</sup></b>	388.1	388.2	386.4	386.4	386.4	393.3	400.2	364.0	332.8	218.0	<b>218.0</b>	<b>250.0</b>

SK Telecom has seen their earnings contract by about 1.8% in the past five years as a result of its strategic restructuring and smaller remaining business. From 2019 through 2021, the combined businesses (Mobile & Fixed, Media, Enterprise, AIVERSE, and Connected Intelligence) remaining in the post-spin-off SK Telecom grew revenue by 4.2%. We expect the company will be able to maintain such growth through the continued increase in 5G subscribers and Pay tv subscribers.

The AIVERSE will be SK Telecom's subscription metaverse and artificial intelligence business. While mobile and fixed-line communications remain the solid and steady portion of the conglomerate, its Media, Enterprise and AIVERSE businesses are expected to generate higher growth as they take up only a small portion of the company's total revenue.

We estimate annual growth of 4.0% from an estimated \$2.20 in earnings per share. This year's estimated earnings of \$2.20 remains highly speculative, considering the company's massive restructuring is still fresh. Currency fluctuations between KRW and USD can also cause wild swings in results throughout the years. The company now has a total 9.32

million Pay tv subscribers after 2022 4Q. The enlarged scale of the business also allows for the production of original content.

## Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	10.5	10.2	9.8	9.4	7.8	6	13.5	10.3	11.2	7.1	9.1	10.5
Avg. Yld.	4.0%	3.5%	4.8%	4.7%	3.7%	3.9%	4.1%	4.4%	3.8%	7.4%	7.1%	5.3%

SK Telecom's average price-to-earnings ratio over the past ten years is 9.6. Today SKM's valuation sits at 9.1 times our 2023 earnings per share estimate of \$2.20. Our fair value estimate of 10.5 times earnings implies the potential for a moderate valuation tailwind.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	42%	36%	46%	44%	29%	22%	88%	49%	91%	55%	65%	56%

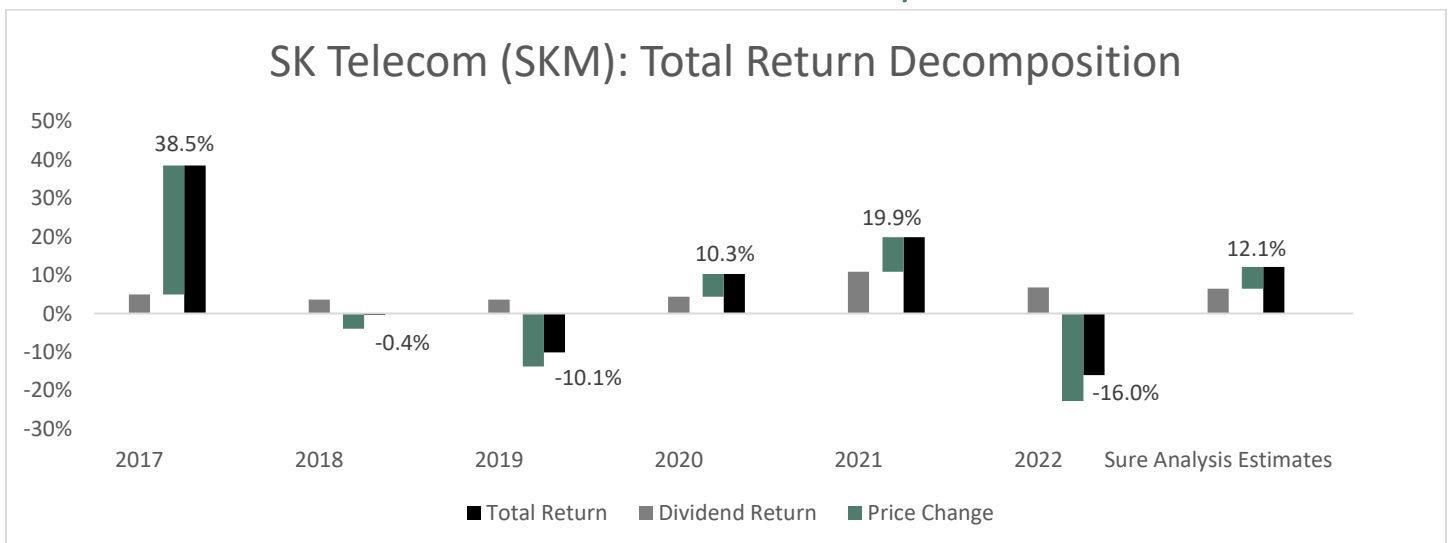

The payout ratio of the company has remained in safe territory for the past decade, and we see this as continuing as earnings outpace dividend growth. EBITDA margin has remained relatively steady in the last few years and today stands at 31% based on consolidated results. The debt to equity ratio also shows the company as being solvent.

SK Telecom's competitive advantage is in its leadership position in South Korea with nearly 50 percent of the market share, as well as its position in the SK Group and its global partnerships which should allow it to expand products overseas. It is not immune to recession but telecommunications companies like SK Telecom tend to hold up very well, and we think this will remain the case.

## Final Thoughts & Recommendation

SK Telecom is the largest Korean telecom company and now is even growing into the metaverse. We see total annual returns of 12.1% in the coming years, including a 7.1% yield. SKM trades with some margin of safety, and with total expected returns of 12.1%, we upgrade SKM to a buy. However, to note, the company in its current form following its strategic restructuring, as well as KRW to USD currency fluctuations can make SK Telecom a volatile holding for American investors.
