Overview & Current Events

JPMorgan was founded in 1799 as one of the first commercial banks in the U.S. Since then, it has merged or acquired more than 1,200 different institutions, creating a global banking behemoth with a \$407 billion market capitalization and about \$144 billion in annual revenue. JPMorgan competes in every major segment of financial services, including consumer banking, commercial banking, home lending, credit cards, asset management and investment banking.

JPMorgan reported first quarter earnings on April 14th, 2023, and results were much better than expected on both revenue and earnings. The bank posted earnings-per-share of \$4.10, which was 69 cents better than estimates. Revenue soared 25% year-over-year to \$38.3 billion, beating estimates by more than \$2.5 billion.

Provisions for credit losses came to \$2.3 billion, which reflected net charge-offs of \$1.1 billion, and a net reserve build of \$1.1 billion. Book value ended the quarter at \$94.34, up 9% year-over-year. Tangible book value was \$76.69 per share, up 10% in the past twelve months.

The company was cautious on the remainder of the year, despite consumer spending strength, and expects to see net interest income of \$81 billion, up sharply from \$73 billion in the prior view. The company also expects adjusted expenses to be \$81 billion for the year.

Q1 noninterest expense came to \$20.1 billion, up from \$19 billion in Q4, and \$19.2 billion in last year's Q1. This was driven by higher structural expenses and continued investments in future growth.

Net interest income was \$20.7 billion, up from \$20.2 billion in Q4 and \$13.9 billion in Q1 last year. Noninterest revenue was \$17.6 billion, up from \$14.4 billion in Q4 and \$16.8 billion in the year-ago period.

Total loans ended the quarter at \$1.13 trillion, flat from the prior quarter. Total deposits were \$2.38 trillion, which was up nearly 2% quarter-over-quarter.

We've boosted our estimate of earnings-per-share to \$13.75 following terrific Q1 results.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$4.35	\$5.29	\$6.00	\$6.19	\$6.87	\$9.00	\$10.72	\$8.88	\$15.25	\$12.09	\$13.75	\$15.94
DPS	\$1.44	\$1.58	\$1.72	\$1.88	\$2.12	\$2.48	\$3.30	\$3.60	\$3.70	\$4.00	\$4.00	\$5.11
Shares¹	3,756	3,714	3,664	3,561	3,425	3,340	3,084	3,087	2,944	3,075	3,000	2,750

We see JPMorgan achieving 3% average annual growth on a normalized basis in the years to come after record earnings in 2021 gave way to more normalized results in 2022. The bank could achieve this with low single-digit revenue growth, as well as a meaningful tailwind from the sizable share buyback program, which has been restarted following a temporary suspension in 2022. JPMorgan's balance sheet and earnings potential are more than sufficient to produce a tailwind from repurchases indefinitely, but its leverage to the credit card market may keep a lid on profitability going forward, in addition to rising expenses. Credit costs have begun rising in a meaningful way, which is another headwind to earnings in the quarters to come.

JPMorgan & Chase Co. (JPM)

Updated April 17th, 2023, by Josh Arnold

JPMorgan has been able to navigate a tricky rate environment and produce strong returns, and we expect that will continue indefinitely. However, we also caution that the huge gains produced in the past from the fixed income and equity businesses, for instance, are transitory as the investment banking business tends to be very volatile.

Recent years have seen double-digit payout growth and we see growth continuing, given that JPMorgan's payout ratio is still very low. We forecast the dividend to be \$5.11 per share in five years as the bank continues to expand the payout with earnings growth.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	11.9	11.0	10.6	10.6	13.4	12.3	10.6	12.0	10.2	11.0	10.1	12.0
Avg. Yld.	2.8%	2.7%	2.7%	2.9%	2.3%	2.2%	2.9%	3.4%	2.4%	3.0%	2.9%	2.7%

JPMorgan's price-to-earnings ratio is down sharply from our last report at 10.1 times earnings, as earnings estimates are now much higher. That puts the stock well below our fair value estimate of 12 times earnings, implying a strong positive impact from the valuation on total returns. We therefore see the yield declining from 2.9% to 2.7% in the years to come as dividend growth could outpace that of earnings, but the valuation could drive a lower yield.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	36%	33%	33%	34%	35%	28%	31%	41%	24%	33%	29%	32%

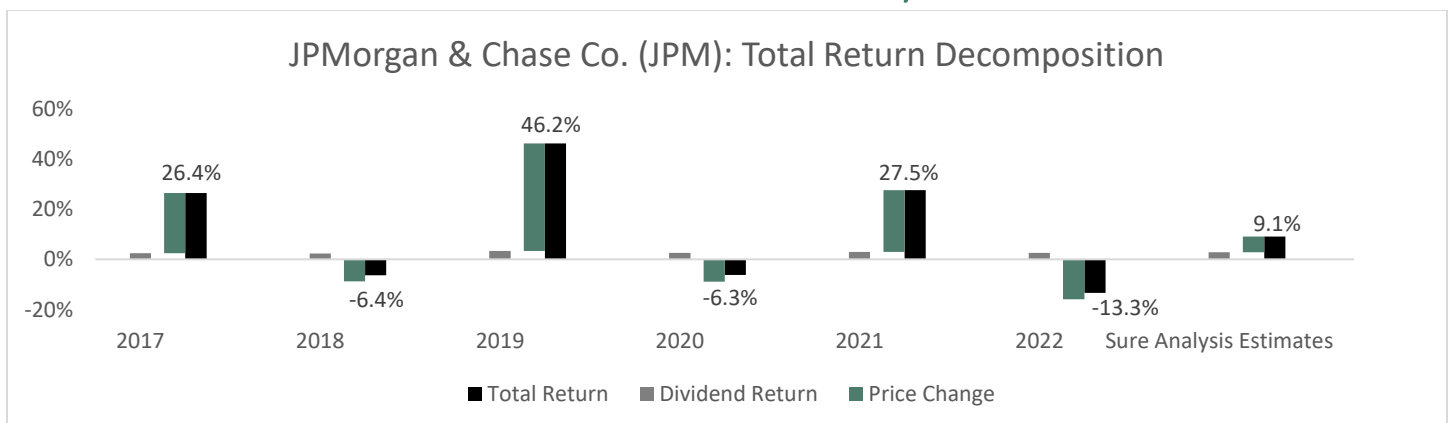

We see the payout ratio remaining under 40% for the foreseeable future. JPMorgan has been spending heavily on buybacks but is still able to increase the dividend meaningfully. We see the payout as very safe and a good choice for income investors given strong earnings growth and a willingness to return that capital to shareholders.

JPMorgan's competitive advantages include its enormous scale, diversified revenue streams and world class reputation. However, it is susceptible to recessions, just like any other bank, and earnings suffered during the downturn, although not to the extent previously feared, and the rebound was swift.

Final Thoughts & Recommendation

Overall, we see JPMorgan as a strong franchise with reasonable growth ahead of it, and while management is still striking a cautious tone on the economy, buybacks have been restarted. We're now estimating 9.1% total annual returns, consisting of 3% projected earnings growth, the 2.9% dividend yield, and a 3.5% tailwind from the valuation. We're reiterating the stock at a hold rating following Q1 results.
