Overview & Current Events

Coca-Cola is the world's largest beverage company, as it owns or licenses more than 500 unique non-alcoholic brands. Since the company's founding in 1886, it has spread to more than 200 countries worldwide. It has a market capitalization of \$277 billion and its brands account for about 2 billion servings of beverages worldwide every day, producing about \$45 billion in annual revenue. The company also has an exceptional 61-year dividend increase streak, making it a Dividend King.

Coca-Cola reported first quarter earnings on April 24th, 2023, and results were better than expected on both the top and bottom lines. Adjusted earnings-per-share came to 68 cents, which was three cents ahead of expectations. Revenue was \$11 billion, which was up 4.8% year-over-year, and beat estimates by \$220 million.

Global unit case volume was up 3%, and growth in price/mix was 11%. Concentrate sales were 2% behind unit case volume, which was due to the timing of concentrate shipments and one fewer business days. Organic sales of +12% were well ahead of 9.6% estimates. Organic revenue was up 23% in Europe, Middle East & Africa, while it was up 19% in Latin America. North America was +9%.

Operating margin was 31.8% of sales, up from 31.4% a year ago. This was driven by strong revenue growth, partially offset by marketing investments and higher operating costs, as well as currency headwinds.

Management reaffirmed guidance for this year, and we've left our estimate of earnings-per-share unchanged at \$2.60 as a result.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$1.90	\$1.60	\$1.67	\$1.49	\$1.91	\$2.08	\$2.11	\$1.95	\$2.32	\$2.48	\$2.60	\$3.48
DPS	\$1.12	\$1.22	\$1.32	\$1.40	\$1.48	\$1.56	\$1.60	\$1.64	\$1.68	\$1.76	\$1.84	\$2.35
Shares²	4,402	4,366	4,324	4,288	4,259	4,250	4,314	4,323	4,325	4,328	4,330	4,340

Coca-Cola has experienced some years of stagnation in earnings-per-share, which declined from \$1.97 in 2012 and only reclaimed that high in 2018. However, now that the bulk of revenue declines have been absorbed from the bottling refranchising initiative, Coca-Cola's earnings growth should pick up in the coming years, as we are forecasting for 2023.

Moving forward, we are forecasting 6% annual earnings-per-share growth. Volume had been improving and pricing was strong prior to the COVID-19 pandemic, which could mean low single-digit revenue growth as conditions normalize. In addition, job cuts and other productivity measures produced very strong margin growth in 2017 and 2018, and we see this as a long-term tailwind. All this combined could produce 6% annual earnings-per-share growth moving forward. Of course, 2020 earnings were down due to lower away-from-home sales, but earnings rebounded sharply higher in 2021 and 2022, with more growth forecast for 2023. First quarter results were outstanding on this front.

We also forecast the dividend rising somewhat slower than earnings, producing a payout of \$2.35 per share by 2028.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2027
Avg. P/E	18.2	21.0	23.1	25.7	23.0	21.8	24.1	25.6	23.3	25.6	24.6	23.0
Avg. Yld.	2.7%	2.9%	3.2%	3.1%	3.2%	3.4%	3.1%	3.3%	3.1%	2.8%	2.9%	2.9%

Coca-Cola's price-to-earnings ratio has been rather volatile in the past decade and today it stands at 24.6. This compares slightly unfavorably to what we see as fair value at 23 times earnings, implying a headwind to total returns moving forward if the valuation normalizes over a 5-year holding period. Meanwhile, Coca-Cola's dividend yield is currently 2.9% and the payout rises each year, offering a meaningful boost to total returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	59%	76%	79%	94%	77%	75%	76%	84%	72%	71%	71%	68%

The payout ratio has been in the mid-70% range for the past few years but is below that now with rising earnings. Dividend growth will remain a priority for management, and we see the payout as safe, with room to grow, particularly with generally improving free cash flow generation.

Coca-Cola's competitive advantages include its unparalleled suite of beverage brands, as well as its efficient global distribution network. Coca-Cola is also extremely resistant to recessionary environments, having increased its earnings-per-share during and after the financial crisis. The difference with the 2020 recession is that public venues have been closed, which disproportionately impacted Coca-Cola's results, even into 2021. This, however, appears to have ended.

Final Thoughts & Recommendation

Our estimates of 6% earnings growth and a 1.3% valuation headwind, combined with the company's 2.9% dividend yield give expected total returns of 7.2% per year over the next five years. Coca-Cola could work for investors that are seeking a recession-resistant, higher-yielding consumer staple, and shares are now trading at fair value. We're reiterating Coca-Cola at a hold rating following first quarter results.
