Overview & Current Events

Zions Bancorporation (ZION) is a bank holding company that operates full-service banking offices in 11 western states in the U.S. The company also offers a range of investment, mortgage, insurance, and electronic commerce services. Zions primarily focuses on providing banking services to small and midsize businesses, with the majority of its loans focused on commercial and commercial real estate lending. The company was formerly known as ZB, National Association and changed its name to Zions Bancorporation, National Association in September 2018. The company was founded in 1873 and has 9,895 employees.

On April 19th, 2023, Zions Bancorporation released its first quarter 2023 results for the period ending March 31st, 2023. For the quarter, the company reported net income of \$204 million which represents a 2% increase compared with a quarterly net income of \$203 million in the same quarter of 2022. Reported earnings per diluted share for the same periods were \$1.33 and \$1.27, an increase of 4.7% year-over-year. However, the first quarter diluted EPS dropped significantly compared to the previous quarter \$1.84. Quarterly net revenues of \$336 million were up 46% compared to the same quarter last year. Net interest income (NII) totaled \$679 million, down from \$720M in the prior quarter, but rising 25% compared to the prior-year quarter and the net interest margin (NIM) expanded 73 basis points (bps) to 3.33%. In the first quarter, improvement in NII driven by rising rates and increasing loan demand was the major positive. The increase in provisions, non-interest expenses, and decrease in deposit balances had a negative effect on the results. Additionally, non-interest income experienced growth during the quarter. The provision for credit losses was \$45 million against a benefit of \$33 million in the year-earlier quarter. The provisions rise is a concern, Zions' capital ratios and profitability ratios remained solid. Tier-1 leverage ratio was 7.8% as of March 31, 2023 compared with 7.3% at the end of the prior-year quarter. Tier-1 risk-based capital ratio of 10.6% decreased from 10.8%.

Zions' management guidance provided guidance for the full year, with NII expected to increase at a rate in the high single-digits relative to end of 2022. Capital ratios are expected to increase by year-end 2023, although some capital may be returned to shareholders through share repurchases.

The company has grown earnings by 15.5% per year over the past nine years and 5.4% over the past five years. After the above-average EPS in 2021 and the decline in EPS for 2022, due to the absence of loan loss provision recoveries that occurred last year (\$276 million), we expect earnings to increase by 5% per year for the next five years and key business drivers such as loan growth and NNI to return to historical levels. The company has been able to increase its dividend for 11 consecutive years. Over the last five years, the average annual dividend growth rate is 9.5%. In July 2022, the

company increased its quarterly dividend by 7.9% from \$0.38 to \$0.41 per share. The company repurchased 0.9 million shares for \$50 million in the most recent quarter.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Avg. P/E	17.1	17.4	23.7	14.4	15.6	12.7	11.2	11.8	8.0	9.3	5.5	10.0

During the past decade shares of Zions Bancorporation have traded with an average price-to-earnings ratio of about 14 and today, it stands at 5.5. We are using 10 times earnings as a fair value baseline, implying the potential for a valuation tailwind. The company's dividend yield is currently 5.6% which is above the average yield of 1.8% over the past decade, primarily due to the drop in the share price.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	10%	18%	14%	16%	25%	31%	45%	21%	29%	29%	31%	31%

During the past five years, the company's dividend payout ratio has averaged around 31%. Zions Bancorporation's dividend is comfortably covered by earnings. Given the expected earnings growth, there is room for the dividend to continue to grow at least at the same pace and keep the payout ratio around the same levels which is safe.

Zions Bancorporation is a strong collection of community banks with local decision-making and a focus on commercial banking. The local "ownership" helps the company to spot local market opportunities and better understand specific regional challenges. Roughly 2/3 of revenue is from commercial customers. The bank is undergoing a digital banking replacement (called FutureCore) to improve its customer experience and lower operating costs. The new digital banking should strengthen Zions' competitive position and reduces its risk profile.

Final Thoughts & Recommendation

Zions Bancorporation is an old and well-established regional bank active in 11 western states with a solid earnings track record and a dividend yield of 5.6%. As with many regional banks, Zions' share price has come under selling pressure since the recent banking crisis emerged and the stock is down 39% year-to-date. In addition, Zions Bancorporation's share price dropped after the Q1-2023 profit was lower than expected. Moody's has downgraded the company's rating as well. The coming year(s) could be a bumpy road for regional bank stocks. We estimate total return potential of 21.3% per year for the next five years based on a 5% earnings-per-share growth, the dividend yield, and a valuation tailwind. The shares earn a buy rating.
