Overview & Current Events

U.K.-based Atlantica Sustainable Infrastructure is a sustainable infrastructure company, with the majority of its operations focused on investing and operating renewable energy assets. The company's goal is to be a leading player in the ongoing transition toward a more sustainable world while generating long-term value for its shareholders, primarily in the form of dividend income. The company's asset base currently includes 44 assets supporting 2,161 MW of aggregate renewable energy installed generation capacity. Specifically, Atlantica operates 31 renewable energy sources, including solar and wind farms (70% of cash flows available for distribution), seven transmission and transport projects (12% of CAFD), three efficient natural gas projects (15% of CAFD), and three water projects (3% of CAFD). The company generates around \$1.1 billion in annual revenues and is based in Brentford, the United Kingdom.

On May 5th, 2023, Atlantica Sustainable Infrastructure reported its Q1 results for the period ending March 31st, 2023. The company's quarterly results continued to demonstrate the resiliency of its portfolio, whose cash flows are contractually locked through long-term PPAs (Power Purchase Agreements). Adjusted EBITDA for the quarter came in at \$174.2 million, up 4.0% year-over-year. Cash available for distribution rose 12.1% year-over-year to \$61.0 million. This metric was boosted by the sale of Atlantica's equity interest in its development company in Colombia to a partner. Excluding this impact, CAFD rose by 4.6%. On a per-share basis, CAFD rose by 8.9% to \$0.53 during the quarter.

Based on its current PPA profile, last year's investments, and development pipeline, management expects to achieve CAFD of between \$235 million and \$260 million for fiscal 2023. Based on this range and our projected share dilution, we forecast FY2023 CAFD/share to be \$2.07, stable year-over-year.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
CAFD/shr	---	\$0.70	\$1.92	\$1.70	\$1.70	\$1.71	\$1.88	\$1.97	\$2.03	\$2.07	\$2.07	\$2.52
DPS	---	\$0.26	\$1.43	\$0.45	\$1.05	\$1.33	\$1.57	\$1.66	\$1.72	\$1.77	\$1.78	\$2.17
Shares¹	---	80.0	92.8	100.2	100.2	100.2	101.1	103.4	111.0	114.7	119.5	145.0

Atlantica Sustainable Infrastructure enjoys extremely predictable cash flows. The entirety of revenues produced by its asset portfolio is contracted under long-term PPAs with a weighted average remaining contract life of 14 years. Additionally, 47% of Atlantica's assets have their rates linked to inflation, a formula based on inflation, or are indexed to a fixed number of rate escalations over time.

Thus, Atlantica is not only protected but even benefits from the ongoing elevated inflation levels. Combined with its development pipeline and third-party acquisitions, we forecast CAFD/share growth of 4% over the medium-term, remaining mindful shares issuances which could offset CAFD growth. Atlantica has increased its dividend annually for seven years in a row through more than one hike each year which usually amounts to a cent. We expect the company to keep growing the dividend by around 4% per year, in line with CAFD/share growth.

¹ Share count is in millions.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/CAFD	---	---	14.1	10.6	12.4	12.0	12.8	16.8	19.2	15.5	12.8	13.0
Avg. Yld.	---	0.8%	5.3%	2.5%	5.0%	6.5%	6.5%	5.0%	4.4%	5.5%	6.7%	6.6%

Atlantica's historical P/CAFD average stands around 14.0. While the company's growth prospects are rather modest, the predictability of its long-term cash flows could attract a slight premium, especially in the current volatile environment. Nonetheless, we believe that a lower P/CAFD of 13 fairly values the stock, as Atlantica is a YieldCo in a rising rates environment. The yield should remain rather substantial amid the company's goal to distribute the majority of its CAFD.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	---	37%	74%	27%	62%	78%	84%	84%	84%	85%	86%	86%

While Atlantica's payout ratio appears elevated, we consider the dividend rather safe, backed by the numerous qualities attached to the company's cash flows. Besides the weighted average remaining contract life of its portfolio standing at 14 years and the inflation-linked hikes embedded in more than half of its assets, Atlantica also features very creditworthy, investment-grade off-takers. These include The Kingdom of Spain, UTE (Uruguay's National Administration of Power Plants and Electrical Transmissions), The Government of Peru, Sonatrach & ADE (Algeria's state-owned oil company), CNE (National Energy Commission of Chile), Enel Generacion Chile, and Eskom (publicly traded with robust and transparent financials), amongst others. Further, its portfolio is quite diversified, with only 40% of its cash flows sourced from assets outside of North America. Yet, Atlantica has also taken care of any potential FX risks, with USD and USD-hedged inflows exceeding 90% of CAFD. All points considered, we believe that the company's performance would remain unfazed during a recession. That said, Atlantica does not feature any noteworthy competitive advantages.

Final Thoughts & Recommendation

Atlantica Sustainable Infrastructure appears very capable of serving income-oriented investors with growing payouts. Its asset portfolio is set to produce predictable cash for more than a decade, while management has laid out a very clear deleveraging plan through the next few years. Based on its current 6.7% yield, our CAFD/share and DPS growth estimates, and the possibility for a small valuation headwind, we forecast annualized returns of 10.1% through 2028. While this barely assigns the stock a buy rating, we do so due to future returns being within quite a predictable range.
