## Overview & Current Events

Linde plc, which was created through the merger of Germany-based industrial gases company Linde AG and US-based industrial gases company Praxair, is the world's largest industrial gas corporation. The company produces, sells, and distributes atmospheric, process, and specialty gases, along with high-performance surface coatings. The company is headquartered in Guildford, United Kingdom. Linde plc is, by both market capitalization as well as by sales generation, the number one in its industry by a wide margin.

Linde plc released its first quarter earnings results on April 27. The company announced that its revenues totaled \$8.2 billion during the quarter, which was flat versus the prior year's quarter. This was better than the previous quarter, during which Linde reported negative revenue growth. Linde was able to grow its margins meaningfully, as its operating margin, for example, expanded by an attractive 370 basis points year-over-year.

Linde's earnings-per-share during the first quarter totaled \$3.42, which means that the company's earnings-per-share growth came in at 17% versus the previous year's quarter. Linde's management also has a quite positive view regarding the foreseeable future, as Linde is forecasting earnings-per-share in a range of \$13.45 to \$13.85 for fiscal 2023, which represents a very solid growth rate of 11% compared to 2022, which was also a record year.

## Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
<b>EPS</b>	\$5.87	\$5.73	\$5.35	\$5.21	\$5.68	\$6.19	\$7.34	\$8.23	\$10.69	\$12.29	<b>\$13.65</b>	<b>\$18.27</b>
<b>DPS</b>	\$2.40	\$2.60	\$2.86	\$3.00	\$3.15	\$3.30	\$3.50	\$3.85	\$4.24	\$4.68	<b>\$5.10</b>	<b>\$7.15</b>
<b>Shares<sup>3</sup></b>	296	294	289	288	289	334	541	531	517	511	<b>505</b>	<b>480</b>

The numbers in the above table, through 2017, are for Praxair as a standalone company, as Linde plc was only created in 2018. Praxair, as a stand-alone company, delivered unspectacular earnings growth rates through the last decade. Its earnings-per-share rose from \$4.19 during 2008 to \$5.68 during 2017, which equates to an earnings-per-share growth rate of 3.5%. 2018 was the first year for which Linde plc reported net profits as a combined company.

The merger between Praxair and Linde AG, which led to the creation of Linde plc, has impacted the combined company's results massively. Higher net profits were partially offset by an increase in the company's share count, however. Asset sales, which were necessary for the regulators' okay for the merger, also had an impact.

Linde plc is able to generate substantial cost-savings through synergies between the two companies. Executives have touted synergies and potential cost-savings of more than \$1 billion annually. It seems likely that Linde plc will grow its earnings-per-share at a mid-single-digit rate in the long run, slightly faster than Praxair's earnings-per-share growth rate through the last decade, due to the positive impact of synergies. Linde plc recently upped its stock buyback program to \$10 billion, which should drive further share count declines. We believe that Linde will be able to reduce its share count meaningfully in the future, resulting in a tailwind for its earnings-per-share.

## Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	20.0	22.6	21.7	21.8	23.2	25.4	29.0	31.5	32.2	26.5	<b>26.9</b>	<b>21.0</b>
Avg. Yld.	2.0%	2.0%	2.5%	2.6%	2.4%	2.2%	1.6%	1.5%	1.2%	1.4%	<b>1.4%</b>	<b>1.9%</b>

Based on forecasted earnings-per-share of around \$13.65 for fiscal 2023, Linde plc trades at 27 times this year's earnings right now. Shares of Praxair (our proxy for Linde plc for gauging the historic valuation) were never especially cheap, and due to the solid growth outlook and Linde plc's leadership in its industry, we believe that an above-average multiple of 21 times earnings is justified. Shares trade well above that level right now, which is why we believe that Linde's shares are overvalued. Shares have gotten less expensive compared to 2019-2021 but are still pricey.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	40.9%	45.4%	53.5%	57.6%	55.5%	53.3%	47.7%	46.7%	39.7%	38.1%	<b>37.4%</b>	<b>39.2%</b>

Praxair's (our Linde plc proxy) dividend payout ratio was never especially high during the last decade. Based on forecasted earnings, Linde plc's forward dividend payout ratio will be very reasonable as well, at less than 40%. We believe that the dividend is thus relatively safe, especially as Linde's business is not very cyclical.

Linde plc is the clear leader in the industrial gases market, and thus has large competitive advantages in terms of size and scale. Synergies that will be captured throughout the next couple of years will increase its competitiveness further. Linde plc is active in an industry that is quite stable, as its gases are sold to non-cyclical industries such as healthcare.

## Final Thoughts & Recommendation

Linde plc is the clear leader in its industry. Despite the pandemic, Linde generated new record profits in 2020 to 2022, and it looks like the company will do even better during the current year. We believe that Linde will be able to grow its earnings-per-share meaningfully in the long run. Unfortunately, Linde's shares trade at a relatively high valuation. Total returns are forecasted to be not attractive over the coming years, which is why we rate Linde a sell at the current price, even though Linde looks like a fundamentally strong company.
