Overview & Current Events

MetLife is one of the world's leading financial services companies, providing insurance, annuities, employee benefits and asset management to help its individual and institutional customers. Founded in 1868 as Metropolitan Life, today the \$39 billion MetLife has operations in more than 40 countries and holds leading positions in the U.S., Japan, Latin America, Asia, Europe, and the Middle East, with about half of profits generated in the U.S.

On April 25th, 2023, MetLife announced a \$0.52 quarterly dividend, representing a 4.0% year-over-year increase.

On May 3rd, 2023, MetLife reported first quarter results for the period ending March 31st, 2023. For the quarter, the company reported revenue of \$16.1 billion, a 7.8% decrease compared to the prior year and \$720 million below estimates. Premiums, fees and other revenues decreased 9% while net investment income was up 8%. Adjusted earnings equaled \$1.184 billion, or \$1.52 per share, compared to \$1.695 billion, or \$2.04 per share, in the prior year. Adjusted earnings-per-share was \$0.34 less than expected. MetLife's adjusted book value per share equaled \$53.83 versus \$52.97 in the year ago period. The company also announced a \$3 billion repurchase authorization as well, which would represent nearly 8% of the current market capitalization.

We project that MetLife will earn \$7.88 in 2023, down from \$8.29 previously.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$5.63	\$5.74	\$4.86	\$4.59	\$3.92	\$5.39	\$6.11	\$6.16	\$9.15	\$6.85	\$7.88	\$8.70
DPS	\$1.01	\$1.33	\$1.48	\$1.58	\$1.60	\$1.66	\$1.74	\$1.82	\$1.90	\$1.98	\$2.08	\$2.30
Shares¹	1,122	1,132	1,098	1,096	1,044	959	915	893	869	790	781	735

MetLife has put together a reasonable, but unspectacular earnings record in the last decade. From 2010 through 2020 earnings-per-share grew by an average compound rate of 3.5% per annum, before a standout performance in 2021. Moreover, there were many instances of year-over-year declines. The company benefited from a lower tax rate in 2018.

Above average growth is generally not expected in the insurance business, as competition is fierce, and the products being offered are commodity-like in nature. Further, Insurers can get in trouble by "chasing" growth if it means underpricing policies to gain share. The liabilities are not known for years, meaning that you can grow quickly in the short-term, but be worse off for it in the long-term. Our preference is a slow and steady approach, and our expectation is 2% intermediate term growth, coming off a higher expected base for 2023.

MetLife does have a few growth avenues in the way of general economic growth, international operations boosting its growth profile, and rising interest rates should they eventually come about. Additionally, share repurchases make sense given the below average valuation. Results in 2020 were a great example of this, with company-wide profit declining, but earnings-per-share increasing due to the lower share count. Lastly, higher interest rates should provide a tailwind to the business.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2028	Now	2028
Avg. P/E	7.9	9.2	10.5	9.7	13.3	8.5	7.7	6.5	7.1	10.6	6.3	9.0
Avg. Yld.	2.3%	2.5%	2.9%	3.5%	3.1%	3.6%	3.7%	4.5%	3.2%	2.7%	4.2%	2.9%

Shares of MetLife have decreased \$21, or 29.6%, since our February 8th, 2023 report. Over the past decade shares of MetLife have traded hands with an average P/E ratio of around 9 times earnings. We believe this is a reasonable starting place, considering the conservative growth profile of the firm coupled with a typical valuation in the industry. With shares trading at 6.3 times expected earnings this implies a sizeable valuation tailwind. Multiple expansion could add 7.2% to annual returns through 2028.

MetLife's dividend should add to shareholder returns as well, given the 4.2% yield and runway for future growth. Note that MetLife held its dividend steady from 2007 through 2012 and recently held the payment at \$0.40 for eight quarters in 2016 through 2018, before it bumped it up 5% in 2018, 4.8% in 2019, 4.5% in 2020, 4.3% in 2021, 4.2% in 2022, and 4% in 2023. Future dividend growth may be lumpy, but we do anticipate year-over-year increases in the future.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	18%	23%	30%	34%	41%	31%	28%	30%	21%	29%	26%	26%

MetLife's industry does not typically exhibit competitive advantages as the products are commodity-like in nature. Consumers are not willing to pay a material premium to get the same policy. That being said, MetLife's long tradition and experience in the industry, along with a proven track record of intelligent, slow growth is encouraging. During the last recession MetLife posted earnings-per-share of \$3.67, \$2.87 and \$4.38 during the 2008 through 2010 stretch. In addition, the dividend was held steady during this time. We believe this typifies what an investor might expect when the next recession comes along – a hit to short-term earnings, but the ability to bounce back and keep paying the dividend. The current crisis has tested this thesis and so far, MetLife is performing well.

We believe MetLife's historical dividend payout ratio management has been prudent – freezing the dividend in lesser times and accelerating growth when there is ample room to do so.

Final Thoughts & Recommendation

We are forecasting 12.3% annual total return potential for MetLife, up from 5.5% previously. Our estimate stems from a 2% intermediate-term earnings growth, a 4.2% starting yield, and a high single-digit contribution from multiple expansion. MetLife is not the type of security that is going to “wow” you when it comes to growth prospects. Indeed, it's in an industry where it can be intelligent to stick to prudent underwriting and let your competitors underprice you. We find MetLife to be among the better insurers in the market. We have lowered our five-year price target \$4 to \$78 to reflect earnings estimates, but now rate shares of MetLife as a buy due to projected returns.
