Overview & Current Events

Plains All American Pipeline, L.P. is a midstream energy infrastructure provider. The company owns an extensive network of pipeline transportation, terminalling, storage, and gathering assets in key crude oil and natural gas liquids-producing basins at major market hubs in the United States and Canada. On average, it handles more than 7 million barrels per day of crude oil and NGL through 18,370 miles of active pipelines and gathering systems. Plains All American generates around \$40 billion in annual revenues and is based in Houston, Texas.

On May 5th, 2023, Plains All American reported its Q1 results for the period ending March 31st, 2023. For the quarter, revenues came in at \$12.3 billion, down 9.9% compared to last year.

Adjusted EBITDA from crude oil increased 14% year-over-year, primarily due to higher pipeline volumes, partially offset by higher operating expenses linked to these increased volumes and utility costs. Adjusted EBITDA from NGL increased 19% year-over-year, primarily due to the favorable impact of higher sales volumes at higher realized margins. These items were partially offset by the impact of higher utility costs and asset sales. Thus, adjusted EBITDA totaled \$715 million for the quarter, up 16% compared to Q1 2022.

Distributable cash flows (DCF) grew 11% to \$0.62 on a per-unit basis. Unit repurchases over the past year boosted this figure. Management affirmed its full-year 2023 guidance, expecting adjusted EBITDA to be between \$2.45 billion and \$2.55 billion. Based on this, we expect a DCFU of around \$2.33 for the year.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
DCFU¹	\$4.88	\$4.26	\$ 3.74	\$ 1.82	\$1.82	\$2.46	\$2.99	\$2.31	\$2.05	\$2.26	\$2.33	\$2.97
DPS	\$2.38	\$2.61	\$2.78	\$2.50	\$1.70	\$1.20	\$1.44	\$0.90	\$0.72	\$0.92	\$1.07	\$1.89
Units²	341	367	394	464	717	726	727	728	716	701	698	670

Plains All American has a number of minimum volume commitment contracts that support relatively stable revenues in its pipelines (transportation) segment. These contracts have an average remaining term of around 5 years. However, the company's supply and logistics segments' performance is highly correlated with the underlying demand for oil and gas and can hence be highly volatile. Hence, the company's performance, including its DCFU, was greatly impacted following the oil price plunge of 2014-2016. Results have yet to recover, with continuous CAPEX needs and high debt levels pressuring the company's performance. COVID-19's adverse impact on the energy sector further challenged the company's operations, resulting in weaker results and another distribution cut last year. We currently expect DCFU growth of 5% in the medium-term, powered by an improving outlook in the energy sector. Beyond 2023, management anticipates targeting annualized common distribution increases of approximately \$0.15 per unit each year until reaching a targeted unit distribution coverage ratio of approximately 160%. Accordingly, we have set our expected distribution growth rate at 12% over the medium term. Unit buybacks should contribute to results during this period.

¹ Distributable Cash Flow per Unit is a more meaningful metric compared to EPS for PAA's business model and capital structure.

² Share count is in millions.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/DCF	10.5	12.0	9.6	14.8	14.3	9.8	7.7	5.6	5.0	4.7	5.4	6.5
Avg. Yld.	4.7%	5.1%	7.7%	9.3%	6.5%	5.0%	6.3%	5.5%	7.0%	8.4%	8.5%	9.8%

Plains All American's valuation multiple has, on average, hovered close to 9.5X its distributable cash flows. Over the past few years, and especially during the COVID-19 pandemic, the stock's valuation has been materially compressed, currently trading at around 5.4X FY2023's expected DCFU. We believe that PAA's financials could reasonably support a higher multiple and that units are undervalued. Thus, we forecast a valuation expansion to 6.5X DCFU. The distribution yield of 8.5% is substantial, and we expect it advance further higher following future distribution hikes.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	49%	61%	74%	137%	93%	49%	48%	39%	35%	41%	46%	63%

PAA's payout ratio is currently sitting at relatively comfortable levels. Following last year's distribution cut and clear capital allocation strategy, we don't expect another one going forward, especially considering management's intention to grow the annual distribution rate per unit. That being said, we cannot restfully trust its resiliency either. The company enjoys some qualities and competitive strengths, including a geographically diverse and interconnected asset base that provides operational flexibility, a high-quality customer base that supports sustainable fee-based cash flow generation (Marathon Petroleum, Phillips 66, etc.), and a highly experienced management team. Still, the company is highly susceptible to a potential recession and the overall volatile profile of the energy sector, which could materially affect its performance and financials, as has been the case several times.

Final Thoughts & Recommendation

Over the past few years, Plains All American has produced quite disastrous returns, including massive share price declines since the stock's highs in 2014. However, the stock has been recovering amid improving financials, and we project further gains ahead. Driven by the possibility for valuation expansion, our growth estimates, and the 8.5% yield, we estimate returns of 16.5% per annum over the medium-term. Consequently, shares earn a buy rating.
