Overview & Current Events

Star Group, L.P. is a home heating oil and propane distributor and services provider. The company was founded in 1995 as Star Gas Partners, L.P. and changed its name to Star Group, L.P. in October 2017. The company's Petro Holdings subsidiary provides heating oil and propane to 416,000 customers in the US Northeast and Mid-Atlantic regions. In addition, the company also sells diesel and gasoline to customers across the United States. Star Group, L.P. is the largest retail distributor of home heating oil in the nation, giving it a competitive advantage in the market. The company has a strong market position in the home heating oil and propane distribution industry and has maintained a steady market share in recent years. The company operates in two revenue segments: Home Heating Oil and Propane, and Other Products and Services, including commercial heating and HVAC services, equipment installations, and repair and maintenance services.

On May 3rd, 2023, the company announced its Q2 results of fiscal year 2023, reported non-GAAP EPS of \$1.42. The company reported revenues of \$737.62 million for the quarter, down 5.7% year-over-year, reflecting a fall in total volume sold that was only slightly offset by the impact of acquisitions and other factors.

The amount of home heating oil and propane sold during the second quarter of fiscal 2023 fell by 27.8 million gallons, or 18.7%, to 121.1 million gallons as the impact of extremely warm weather and net customer attrition more than offset the additional volume provided by acquisitions and other factors. According to the National Oceanic and Atmospheric Administration, temperatures in Star's operating regions were 18.7% warmer in the second quarter of fiscal 2023 than in the same period in fiscal 2022 and 21.6% warmer than average. Within the New York City metropolitan area, the second quarter of fiscal 2023 was likewise the warmest of its kind in more than 100 years.

In addition to being 21.6% warmer than average, the period in question was the warmest in New York City in 123 years, and the year as a whole was the fourth warmest on record in this important market.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$0.47	\$0.57	\$0.59	\$0.70	\$0.46	\$0.89	\$0.35	\$1.07	\$1.82	\$0.85	\$0.90	\$1.15
DPS	\$0.33	\$0.35	\$0.37	\$0.40	\$0.43	\$0.46	\$0.49	\$0.52	\$0.56	\$0.60	\$0.65	\$0.79
Shares	59.4	57.5	57.3	57.0	55.9	54.8	50.8	45.7	40.6	37.4	29.0	22.6

Despite rising share prices and profits, the situation for Star Group is difficult due to rapidly rising commodity prices and a decline in client base. The financial success of Star Group depends heavily on the weather, which is directly correlated to its performance. In addition, Star Group has suffered because of the war in Ukraine's influence on rising energy commodity prices. The variation in the price of the underlying commodity itself is typically what causes SGU's free cash flow to fluctuate since the company must use more working capital to purchase inventory when oil prices are higher.

Considering the seasonality of this business, and the limited growth prospects of the industry, we forecast an EPS of 5.0%, below the company's historical averages. The consistent share count reduction throughout the past years has decently rewarded investors with higher earnings yield. Therefore, the company will continue its share repurchase

^{1 1} The ex-div and dividend payment dates are estimated based on historical data.

program at the same pace, leading to our EPS estimate of \$1.15 by 2028. Star Group's DPS had a nine-year and five-year CAGR of 6.9% and 18.1%, respectively. Its stock offers a fair dividend yield and consistent buybacks that significantly reduce the number of outstanding shares.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Avg. P/E	10.5	10.2	12.8	11.8	16.6	15.0	11.9	10.2	14.3	8.9	15.8	11.0
Avg. Yld.	6.7%	5.8%	4.5%	4.5%	4.1%	4.8%	5.1%	5.8%	5.3%	6.1%	4.6%	6.3%

Star Group is trading at a forward P/E of 15.8, higher than its nine-year and five-year average P/E of around 12.0. Considering the seasonality of Star Group's industry, we believe a P/E of 11.0 better reflects the bank's risk/reward profile, suggesting a target price of \$12.60, below the stock's current levels. Over the past ten years, SGU has offered investors above-average dividend yield, but the recent momentum in stock price has decreased the yield below its nine-year average of 5.3%.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	70%	61%	63%	57%	93%	52%	140%	49%	31%	71%	72%	68%

The domestic home heating market is incredibly fragmented, and SGU has the choice to counteract the ongoing attrition of customers by making selected acquisitions of rival businesses. Since the rivals are mainly small firms, SGU can be selective at good valuation points. Moreover, Star Group, L.P. is relatively leveraged, with a debt-to-equity ratio of 150.7%, cash reserves of \$22.6 million, and total long-term debt of \$143.5 million. Lastly, the company relies on rolling lines of credit to cover financial deficits as commodity prices increase, product utilization reduces, and net consumers shrink. SGU is considered a prominent player in the sector, and its size gives the company a substantial competitive advantage. The acquisition strategy will support its growth and dominance in the sector by buying smaller firms during bad times.

Final Thoughts & Recommendation

The amount of oil and gas consumers use will decrease as the temperature warms, and revenue are expected to decline in the next quarters. The company has little control over pricing volatility or the environment, it is making great efforts to create value, boost customer loyalty, and save costs overall. However, at current prices, we consider SGU as overvalued leading to our sell rating that is premised upon the 2.7% annualized total returns for the medium-term, derived from the forecasted earnings-per-share growth of 5.0% and 4.6% dividend yield, offset by a valuation headwind.
