Overview & Current Events

Constellation Brands was founded in 1945. The \$42 billion market cap company produces and distributes alcoholic beverages including beer, wine, and spirits. With over 100 brands in its portfolio, it is the third largest beer company in the U.S. importing and selling beer brands such as Corona, Modelo Especial, Modelo Negra, and Pacifico, along with craft beer brands including Funky Buddha Brewery. In addition, Constellation has many wine brands including Robert Mondavi and Kim Crawford, as well as spirits brands including SVEDKA Vodka, Casa Noble Tequila, and High West Whiskey. The company also has a stake in cannabis company Canopy Growth.

Constellation Brands declared a \$0.89 quarterly dividend on April 6th, 2023, which represented an 11% increase.

On April 6th, 2023, Constellation Brands reported Q4 FY 2023 results for the period ending February 28th, 2023. (Constellation Brands' fiscal year ends the last day of February). For the fourth quarter, the company recorded \$1.99 billion in net sales, a 5% decrease compared to the same prior year period. Beer sales and wine and spirit sales declined by -2% and -14% year-over-year. Adjusted earnings-per-share (excluding Canopy EIE) equaled \$2.15 for the fourth quarter, which was a 16% decline compared to Q4 2022.

Constellation Brands provided its fiscal 2024 outlook. The company expects earnings-per-share to be \$11.60 to \$11.90 for the full fiscal year. In addition, beer sales are anticipated to increase 7% to 9% and wine and spirit sales are expected to be down -0.5% to up +0.5%.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029

Constellation Brands has put together a terrific record in the last decade, growing earnings-per-share by more than 14% per year. However, it's important to underscore that this was during a time when the company's revenue doubled, and its operating margin grew from 23% to 38%. Both aspects get more difficult to improve over time. Due to this, EPS growth has slowed, and stands at 4% in the trailing five years.

In a highly competitive U.S. beer, wine, and sprits market, Constellation Brands has differentiated itself with a focus on what the company describes as "premiumization" trends. This means the company is pursuing growth in the high-end of the beer, wine, and spirits categories. Constellation is expecting to invest \$4.0 to \$4.5 billion over fiscal 2024 to fiscal 2026 on expanding capacity in Mexico. This will support an additional 25 million to 30 million hectoliters of total capacity. It also includes construction of a new brewery in Southeast Mexico, and continued expansion and construction at existing sites in Nava and Obregon. These investments will support future growth for the company's high-end Mexican beer portfolio.

It is also expanding into new product categories to appeal to changing consumer preferences. Recent acquisitions include Funky Buddha, Four Corners Brewing and a partial stake in cannabis producer Canopy Growth. 2020 proved to be a down year amid the COVID-19 pandemic, but the company rebounded swiftly and strongly, and it continues to achieve record results.

Management is expecting strong results this year and we are forecasting 7% annual growth over the intermediate term.

Constellation Brands has several competitive advantages. Its long list of strong brands gives the company pricing power. Its strong distributor network provides an effective route-to-market for the company's strategy in premium categories. Another benefit of Constellation Brands' business is that it can withstand downturns very well. Alcoholic beverages are generally resistant to recessions. During the Great Recession, Constellation Brands reported earnings-per-share of \$1.68, \$1.44, \$1.60, and \$1.91 during the 2006 through 2009 stretch. Results improved in 2021 and 2022 as well following the COVID pandemic.

As of the most recent report, Constellation Brands held \$134 million in cash and cash equivalents, \$3.5 billion in current assets (54% of which was inventory) and \$24.7 billion in total assets against \$3.0 billion in current liabilities and \$15.9 billion in total liabilities. Long-term debt stood at \$11.3 billion.

Final Thoughts & Recommendation

Constellation Brands has generated incredible returns for shareholders since 2011. A significant portion of the returns were fueled by an expanding valuation and earnings growth, both of which are less certain today. We are forecasting 8.9% total return potential stemming from 7.0% growth, a 1.6% starting dividend yield, and a potential valuation tailwind. Shares continue to earn a hold rating.
