Overview & Current Events

Timken is an industrial company focused on making bearings, belts, gear drives, and other such assorted products. The company is heavily involved in vehicles but also sells to aerospace, energy, and agricultural end markets among others. Timken historically was also a significant player in the steel industry, but it spun off that business in 2014.

Timken has generally been viewed as a cyclical company prone to booms and busts. However, management has refocused operations around new verticals, such as renewable energy applications, which should have a more sustained demand growth profile. Timken also completed the acquisition of Spinea in 2022. Spinea is a European tech company that will give Timken inroads in the robotics and automation market. In 2023, Timken announced additional acquisitions of American Roller Bearing Company, and Nadella, a European firm which makes industrial motion solutions.

Timken delivered better-than-expected Q1 earnings, which were released May 4th, 2023. Revenues were \$1.26 billion, which represented 11.5% year-over-year growth and exceeded analyst expectations. Adjusted net earnings of \$2.09 per share jumped sharply from the same period in 2022 and greatly topped expectations of \$1.89.

Timken's dramatically boosted its full-year guidance for 2023 in conjunction with this quarterly release. Previously, Timken had offered modest guidance amid concerns around a slowing economy. In May, the company pointed to strong backlog, higher-than-expected demand, and improved operational efficiency in leading to the better results and outlook.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$2.75	\$2.55	\$2.21	\$1.97	\$2.63	\$4.18	\$4.60	\$4.10	\$4.72	\$5.48	\$7.00	\$8.11
DPS	\$0.92	\$1.00	\$1.03	\$1.04	\$1.07	\$1.11	\$1.12	\$1.13	\$1.19	\$1.23	\$1.32	\$1.53
Shares	93	88	80	77	78	76	76	76	75	73	73	72

Timken has had an uneven earnings profile historically. Earnings fell every year sequentially from 2013 through 2016, though this was impacted by the spin-off of the company's former steel business. Earnings jumped dramatically between 2017 and 2019 and have continued rising during the current pandemic-induced period of economic volatility. The company achieved record results in 2022 and is on pace to deliver considerable growth in 2023 as well, driven by rising margins and several recent acquisitions.

The company has had a modest approach to capital returns to shareholders. In the early part of the 2010s, Timken repurchased a substantial amount of its stock. After a pause, it appears Timken is returning to more aggressive share repurchases. The company retired close to two million shares of stock in 2022. However, we expect that buybacks may slow down as the company funds its continuing M&A strategy.

Timken has given investors steady dividend hikes dating back to 2014. They have been conservative in size, though, with the company averaging just a 3% annualized dividend growth rate. On the other hand, Timken's dividend has been incredibly consistent; it has paid a dividend for 404 consecutive quarters. On May 5th, the company increased its dividend 6% from 31 cents to 33 cents per quarter.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	20.5	20.5	16.1	16.8	17.5	10.9	10.1	12.6	16.4	15.0	10.7	13.0
Avg. Yld.	1.6%	1.9%	2.9%	3.1%	2.3%	2.4%	2.4%	2.2%	1.5%	1.6%	1.8%	1.5%

Timken stock has rarely received a high P/E multiple from the market; it's had a historical range of 10 to 20 times earnings over the past decade. Right now, shares are near their lowest valuation levels in many years.

On a yield basis, Timken offered a yield as high as 3% in the wake of the spin-off of the steel business in 2014. However, the yield has settled under 2% in recent years. That seems likely to persist, given Timken's increasing focus on growth and M&A of late. The company's current 1.8% dividend yield is slightly above our long-term expectations for Timken.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2027
Payout	33%	39%	47%	53%	41%	27%	24%	28%	25%	22%	19%	19%

Timken priced a 10-year bond offering in March 2022 at an interest rate of just 4.125%. That's a strong vote of confidence for Timken from the credit market. The balance sheet backs that up. As of last quarter, Timken has \$2.0 billion of long-term debt against \$2.6 billion of current assets and a market cap of \$5.5 billion. Timken's profitability has improved in recent years, and it has financial capacity to withstand a significant recession.

The company's dividend is also well-covered out of earnings. The payout ratio has fallen from a high of 53% in 2016 to just 19% now. This seemingly gives the company room for faster dividend increases in the future.

Final Thoughts & Recommendation

Historically, investors tended to view Timken as a lower-quality cyclical business. However, management's moves to reduce reliance on cyclical industries such as autos has served the company well. And now, Timken is enjoying a strong pricing environment and multiple opportunities for value-added acquisition opportunities.

Timken is still not the sort of business that is likely to sustain a high P/E multiple. Even so, the current 10.7 P/E ratio is attractive. We see the P/E ticking up to a 13 multiple going forward. That, plus modest earnings growth could lead to shareholder returns of 8.5% annually through 2028. Timken earns a hold rating.
