Overview & Current Events

T. Rowe Price Group, founded in 1937 and headquartered in Baltimore, MD, is one of the largest publicly traded asset managers. The company provides a broad array of mutual funds, sub-advisory services, and separate account management for individual and institutional investors, retirement plans and financial intermediaries. T. Rowe Price has a market capitalization of \$24 billion and had assets under management of ~\$1.3 trillion as of March 31st, 2023.

On February 7th, 2023, T. Rowe Price declared a \$1.22 quarterly dividend, representing a 1.7% increase and marking the company's 37th year of increasing its payout.

On May 2nd, 2023, T. Rowe Price reported first quarter results for the period ending March 31st, 2023. For the quarter, revenue fell 17.2% to \$1.54 billion, but this was in-line with estimates. Adjusted earnings-per-share of \$1.69 compared to \$2.62 in the prior year, but this was \$0.06 higher than expected.

During the quarter, assets under management (AUM) declined 15.2% to \$1.323 trillion. This decline was due to net client outflows of \$16.1 billion, net distributions not reinvested of \$0.2 billion, and market depreciation. Operating expenses of \$1.053 billion was a 6.9% increase year-over-year, but were down 17.1% from the fourth quarter of 2022.

We expect T. Rowe Price to earn \$6.77 in 2023, down from \$7.25 previously.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$3.90	\$4.55	\$4.63	\$4.84	\$6.13	\$7.01	\$8.07	\$9.58	\$12.75	\$8.02	\$6.77	\$7.85
DPS	\$1.52	\$1.76	\$2.08	\$2.16	\$2.28	\$2.80	\$3.04	\$3.60	\$4.32	\$4.80	\$4.88	\$6.10
Shares²	262	261	250	245	245	238	235	231	229	225	225	200

T. Rowe Price's earnings, as well as its dividends, have grown substantially over the last decade. While earnings did drop during the last financial crisis, the overall record has been quite good. Since 2013 the company has grown earnings-per-share by an average compound rate of 8.3% per annum. Moreover, the company performed well in 2020.

Asset managers like T. Rowe have low variable costs. As a result, higher revenues, driven primarily by increasing assets under management, allow for margin expansion and attractive earnings growth rates. Assets under management grow in two basic ways: increased contributions and higher underlying asset values. While asset values are finicky, the trend is upward over the long-term. On the contribution side, T. Rowe Price's strong past performance is a key selling point and could attract customers going forward. In addition, T. Rowe has another growth lever in the way of share repurchases.

With that being said there is a significant and ongoing challenge for traditional asset managers. Namely, the advance of low-cost ETFs, where other asset managers such as Blackrock or Vanguard are much better positioned. This could lead to lower growth rates for T. Rowe Price, as managers are forced to compete on price and reduce management fees.

Taking the company's strong history and solid financial position paired against a challenging industry, we are forecasting 3% growth over the next five years.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	19.3	17.9	16.7	14.7	13.1	15.6	12.4	12.8	14.5	13.6	15.8	14.0
Avg. Yld.	2.0%	2.2%	2.7%	3.0%	2.8%	2.6%	2.8%	2.8%	2.3%	4.4%	4.6%	5.5%

Shares of T. Rowe have decreased \$7, or 6.1%, since our January 27th, 2023 update. The stock has traded hands with an average P/E ratio of about 16 times earnings in the last decade. We believe 14 times earnings is a reasonable starting point, taking into consideration an excellent balance sheet paired with moderate growth potential. With shares trading above this level, we forecast a slight valuation headwind. Multiple reversion could decrease annual returns by 2.4% through 2028.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	39%	39%	45%	45%	37%	40%	38%	38%	34%	60%	72%	78%

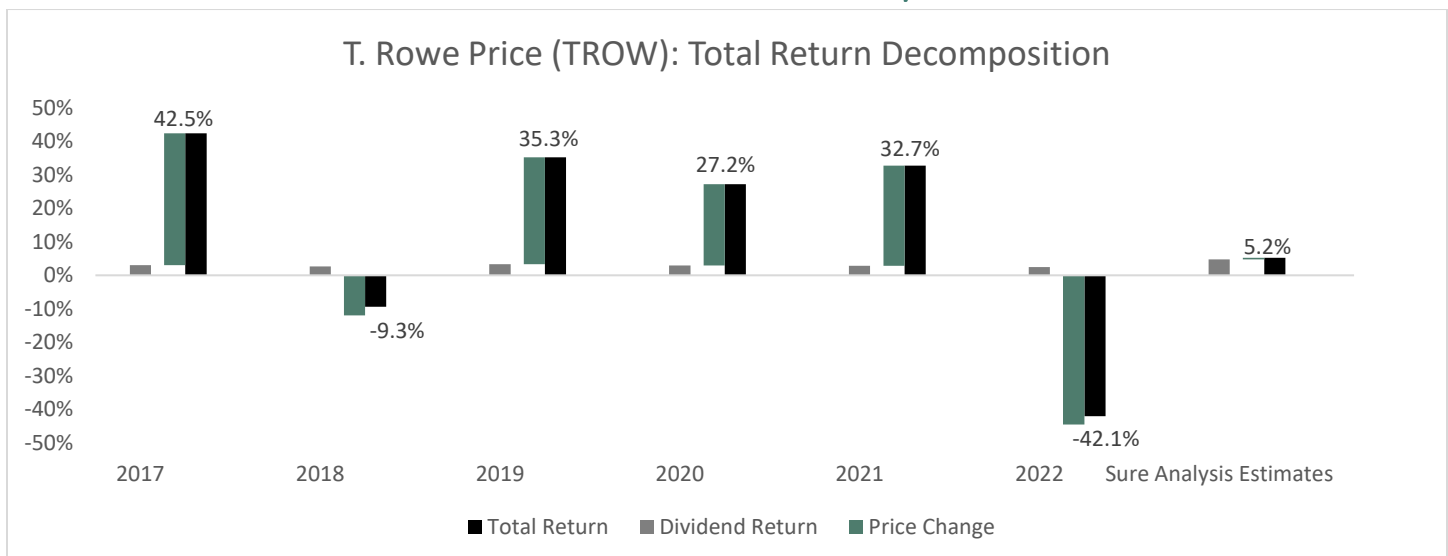

While T. Rowe has put together a solid record, asset managers do not tend to have a large competitive advantage. Fund performance and general customer stickiness help – once you invest with a company you tend to stay invested, and the benefits of switching are unknown. However, the “race to the bottom” as it relates to fees has been and will continue to be an important and ongoing challenge in the industry.

During the Great Recession T. Rowe posted earnings-per-share of \$2.40, \$1.82, \$1.65, and \$2.53 in the 2007 through 2010 stretch. This is instructive, as it shows both the cyclical nature in lesser times along with the ability to bounce back. The company’s balance sheet is in excellent shape with zero long-term debt.

Final Thoughts & Recommendation

T. Rowe Price is projected to return 5.2% annually through 2028, up from our prior estimate of 4.9%. This forecast stems from a 3% earnings growth rate and a starting yield of 4.6%, offset by a small headwind from multiple contraction. T. Rowe Price has been a great business, with strong operating metrics for many years. Market volatility remains an issue, but expenses were down sequentially. In addition, the focus on lower fees continues to be a headwind for the industry as a whole. Shares continue to earn a hold rating due to projected returns.
