Overview & Current Events

Citigroup was founded in 1812, when it was known as the City Bank of New York. In the past 200+ years, the bank has grown into a global juggernaut in credit cards, commercial banking, trading, and a variety of other financial activities. It has thousands of branches, produces about $79 billion in annual revenue, and has a $89 billion market capitalization.

Citigroup posted second quarter results on July 14th, 2023, and results were mixed. Adjusted earnings-per-share fractionally missed estimates at $1.37. Adjusted earnings fell from $2.17 in the year-ago period. Revenue was off 1.2% year-over-year to $19.4 billion, but that narrowly beat expectations. Weak revenue was driven by investment banking and equity market revenue, which was partially offset by good results in Treasury and Trade Solutions, and Securities Services.

Net credit losses were $1.5 billion, up from $1.3 billion in the prior quarter, and $850 million in the year-ago period. Net allowance build was $161 million, down from $241 million in Q1, and $375 million in last year's Q2.

Total loans were $661 billion at the end of the quarter, up from $652 billion in the March quarter. Deposits were $1.32 trillion, down fractionally from Q1. Still, Citi's loan-to-deposit ratio remains extremely low and could be a source of growth should the company decide to begin lending them out.

We now see $5.85 in earnings-per-share for this year, down slightly from our prior estimate as credit costs came in higher than expected in Q2.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	$4.26	$2.20	$5.44	$4.72	$5.33	$6.65	$8.04	$4.87	$10.07	$7.11	***$5.85***	***$7.47***
DPS	$0.04	$0.04	$0.16	$0.42	$0.96	$1.54	$1.92	$2.04	$2.04	$2.04	***$2.12***	***$2.23***
Shares[2]	3,029	3,024	2,954	2,772	2,570	2,369	2,114	2,082	1,984	1,937	***1,890***	***1,700***

Citi's earnings-per-share history is clouded by the immense struggles it endured following the Great Recession. However, years of hard work have paid off, and earnings have continued to move higher over time. We see Citi producing $5.85 per share in earnings for 2023, from which we expect 5% annual growth for the foreseeable future. We've boosted our estimate of growth given the earnings base for 2023 is expected to be much lower than the prior two years.

We believe Citi will continue to see higher revenue as its institutional and consumer businesses gather cheap deposits and lend them prudently, leading to reasonable loss rates and favorable margins. Citi is pulling back on lending at the moment due to less than favorable spreads on loans, which is resulting in extremely low loan-to-deposit ratios. That is a headwind, as it results in higher deposit costs without commensurate lending revenue, crimping top line and margin growth. However, the company's buybacks could be good for a mid-single-digit reduction in the share count annually, as we saw in 2021 and 2022. We note that even in the recent tumultuous interest rate environment, Citi is performing reasonably well. Citi is not as tied to traditional lending as most other banks, so the yield curve is not as critical, but the cost of deposits is important for its massive credit card business. Continued deposit growth that is outpacing lending

growth is weighing on margins. This was masked in 2021 by reserve releases, but it appears the bank is back to taking provisions on new loans without the benefit of massive releases, as evidenced in recent results showing higher credit costs.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	11.4	22.8	9.8	9.7	12.3	10.4	8.4	11.0	6.9	6.4	***7.9***	***9.5***
Avg. Yld.	0.1%	0.1%	0.3%	0.9%	1.5%	2.2%	2.8%	3.8%	2.9%	4.5%	***4.6%***	***3.1%***

At just 7.9 times earnings, Citigroup's price-to-earnings ratio is still quite low. Our fair value estimate is 9.5 times earnings, so the stock is still quite undervalued. We expect the dividend yield of 4.6% to decline as the valuation of the stock rises over time. Even so, this is a solid income stock.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	2%	9%	7%	9%	18%	25%	24%	42%	20%	29%	***36%***	***30%***

Citi's payout ratio is only 36% of estimated earnings this year. Citi has spent the past several years trying to build its dividend back to a normalized level, and it is nearly in-line with competitors. We now expect modest dividend raises for the foreseeable future, as Citi focuses instead on buying back shares.

Citi's competitive advantage is in its global reach and its large position in the lucrative credit card business. Citi has differentiated itself from the other money center banks in these ways and it continues to serve the bank well. It is very susceptible to recessions as it nearly went out of business in 2008/2009. The 2020 downturn wasn't kind to Citi, although we note that the bank is in much better shape than it was heading into the financial crisis from a balance sheet and business mix perspective.

Final Thoughts & Recommendation

We are forecasting 12.2% total annual returns over the next five years, which is up from our last report, mostly due to change to the valuation (now +3.9%) and lower earnings estimates. Earnings should be at normalized levels this year, and we expect 5% annual growth given the lower base for 2023. The yield is still 4.6%. We think Citi is past the worst of the pandemic's impacts, but that earnings will be impossible to replicate from 2021 levels anytime soon. The total return outlook warrants reiteration of a buy rating on the stock.
