Overview & Current Events

Mueller Industries (MLI) is a company that manufactures and sells metal and plastic products around the world through its three segments: Piping Systems, Industrial Metals, and Climate. The Piping Systems segment offers copper tubes and plumbing-related fittings, and it also resells steel pipes, brass, and other metal products to wholesalers in various industries. The Industrial Metals segment manufactures brass, bronze, and copper alloy rods and other metal products for OEMs in the industrial, construction, HVAC, plumbing, and refrigeration markets. Finally, the Climate segment offers valves, protection devices, and brass fittings for various OEMs in the commercial HVAC and refrigeration markets, high-pressure components, and accessories for the air-conditioning and refrigeration markets. Mueller strives to be an industry leader, as it follows the approach of competing where it can be first or second in its core products and key markets. Mueller has averaged an impressive 45.4% return on invested capital over the past five years and aims to produce double-digit annual growth in operating income.

On July 25th, 2023, Mueller Industries reported its Q2 financial results. The company recorded a diluted earnings-per-share of \$3.12 for the second quarter, marking a 14.5% decrease compared to the same period in 2022. This decline in earnings was primarily attributed to lower copper prices and a "normalization" of demand across all segments, influenced by the high baseline established in the previous year. Net sales for the quarter totaled \$897 million, showing a decrease from the \$1.15 billion reported during the corresponding period last year, primarily due to the factors mentioned above affecting demand and pricing. Additionally, the company's operating income experienced a decline, reaching \$210 million. However, operating expenses increased during the quarter, mainly due to several non-recurring events, notably the damage caused to a manufacturing plant by a tornado. However, Mueller Industries maintains its robust financial position, with minimal long-term debt, and demonstrated strong cash flow generation amounting to \$116 million during the quarter.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2027
EPS	\$1.53	\$1.79	\$1.54	\$1.74	\$1.49	\$1.82	\$1.79	\$2.47	\$8.25	\$11.64	\$9.50	\$9.98
DPS	\$0.25	\$0.30	\$0.30	\$0.38	\$0.40	\$0.40	\$0.40	\$0.40	\$0.52	\$1.00	\$1.20	\$1.29
Shares²	57.0	57.0	57.0	57.0	58.0	57.0	57.0	57.0	57.0	57.0	58.0	60.0

Over the past nine years, earnings-per-share grew at an impressive average of 25.3% annually, with even higher growth of 50.9% in the last five years. Excluding the extraordinary growth in 2021, the yearly earnings-per-share growth rate from 2012 to 2020 was 9.9% which we think is a more accurate way to assess the business's historic earnings-per-share growth. However, we expect earnings to slow in 2023 due to weakening product demand. Our initial \$7 EPS target for 2023 has been revised to \$9.50 based on strong first-half results, but we foresee a continued trend of lower demand. In relation to dividends, the company saw significant growth, with an average annual rate of 16.7% over the past nine years and 20.1% over the last five years. Recently, they raised the quarterly dividend by 20% to \$0.3, paid on June 16th, 2023. However, we

Mueller Industries (MLI)

Updated July 25th, 2023, by Derek English

anticipate a slower dividend growth rate of 1.5% annually over the next five years due to the expected return to pre-2021 earnings levels and the company's history of maintaining dividends.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	18.0	16.9	21.3	18.1	22.7	15.7	16.4	11.6	5.5	8.3	8.8	10.0
Avg. Yld.	0.9%	1.0%	0.9%	1.2%	1.2%	1.4%	1.4%	1.4%	1.1%	1.4%	1.4%	1.3%

Since 2013, the stock has averaged a P/E ratio of 15.5; over the past five years, the stock has averaged a P/E ratio of 11.5. We estimate that a P/E ratio of about 10 is fair for the business as the company's earnings-per-share growth is expected to slow down. In addition, the stock offers a 1.4% dividend yield today, which is low for investors who prioritize dividend income. The company's share price has rocketed since March 2020, and is now 88% of our fair value estimate of \$95.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	16%	17%	19%	22%	27%	22%	22%	16%	6%	9%	13%	13%

Since 2013, the business has demonstrated a conservative dividend policy, with the payout ratio typically below 22%. We expect the payout ratio to remain around 16% as earnings stabilize. Mueller balance sheet is reasonably strong, with a current ratio of 4.3 and a little over \$1 million in long-term debt. While we project that the dividend is safe from being cut, the company has a history of maintaining the dividend for several years and rewarding shareholders with significant increases as earnings improve. Mueller Industries' competitive advantages lie in its strong global presence and brand reputation for quality and reliability. The company is the second-largest metal fabrication company by market cap. It offers a wide range of products in different industries, which helps mitigate the impact of market volatility in any specific market. This type of diversification helps keep the company resilient during a recession, where they typically maintain its dividend.

Final Thoughts & Recommendation

Mueller Industries is a metal fabrication business that has delivered high returns on capital from various acquisitions. However, earnings are expected to slow down and we predict a 5.0% total return annually over the next five years. The low return is driven by a 1.4% dividend yield, an expected 1% annual growth in earnings-per-share, 2.7% from the stock's valuation multiple. Despite weakening demand, the company EPS looks set to beat our original estimate, and as such, we would rate MLI as a hold.
