Overview & Current Events

Alerus Financial is a financial services company headquartered in North Dakota. Its operations date back to 1879, when it was originally founded as the Bank of Grand Forks, one of the first banks in Dakota. In 2000, it changed its name to Alerus Financial to reflect its evolution from a traditional community bank to a financial services company. Alerus Financial provides financial solutions to businesses and consumers through four distinct business segments—banking, retirement and benefit services, wealth management and mortgage. Instead of focusing on the broader population, it targets specific business and consumer segments, which offer significant growth potential. The bank has a market cap of \$374 million and is characterized by prudent management. As a result, it has raised its dividend for 18 consecutive years.

On July 1st, 2022, Alerus Financial acquired Metro Phoenix Bank for \$85.3 million in an effort to grow its presence in Arizona. As the transaction value is 23% of the current market cap of Alerus Financial, it is evident that the acquisition is major for the growth prospects of the bank.

In late July, Alerus Financial reported (7/26/23) financial results for the second quarter of fiscal 2023. The bank grew its loans 2% sequentially but its net interest margin shrank from 2.70% to 2.52% due to higher interest expenses paid on deposits amid intense competition for deposits among banks. However, earnings-per-share grew 12.5%, from \$0.40 to \$0.45, thanks to the aforementioned acquisition. The decrease in the net interest margin of Alerus Financial was expected, as it was evident in the results of the vast majority of banks. The stock came under pressure earlier this year due to the broad sell-off of regional banks, which resulted from the collapse of Silicon Valley Bank, Credit Suisse and First Republic. However, this well-managed bank has easily endured the financial turmoil, which has subsided, and thus its stock has rallied lately. Deposits dipped -6% in the second quarter but the bank has a solid tier 1 capital ratio of 13.3%.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$1.46	\$1.48	\$1.21	\$1.00	\$1.07	\$1.84	\$1.91	\$2.52	\$2.97	\$2.10	\$1.70	\$2.17
DPS	\$0.34	\$0.38	\$0.42	\$0.44	\$0.48	\$0.53	\$0.57	\$0.60	\$0.63	\$0.72	\$0.76	\$1.00
Shares²	13.8	13.9	13.9	14.0	14.0	14.1	15.1	17.4	17.5	20.2	20.2	25.0

Alerus Financial has exhibited a decent performance record over the last decade. During this period, the bank has grown its earnings-per-share at a 4.1% average annual rate. The bank is trying to grow primarily via the acquisition of smaller peers. The recent acquisition of Metro Phoenix Bank, which marked the 25th acquisition in the history of the bank, is likely to prove a material growth driver in the upcoming years. In addition, the Fed has been raising interest rates in order to restore inflation to its long-term target. This forms a tailwind for most banks, as it enhances their net interest margin, i.e., the difference between the interest rate they charge on loans minus the interest rate they pay on deposits. Alerus Financial has failed to take advantage of this tailwind so far but it may finally benefit from this favorable environment. Overall, given the low comparison base formed this year, we assume 5.0% average annual growth of earnings-per-share over the next five years, slightly higher than the historic rate of the bank.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	9.0	12.4	16.2	17.7	18.0	13.0	10.6	8.2	10.1	11.7	10.6	12.0
Avg. Yld.	2.6%	2.1%	2.1%	2.5%	2.5%	2.2%	2.8%	2.9%	2.1%	2.9%	4.2%	3.9%

Alerus Financial has rallied 20% since our last research report, in April, but it remains cheaply valued. It is trading at a price-to-earnings ratio of 10.6, which is lower than the 10-year average price-to-earnings ratio of 12.0 of the stock. We expect the stock to trade at its average valuation level in five years. In such a case, the stock will enjoy a 2.5% annualized gain thanks to the expansion of its valuation level.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	23%	26%	35%	44%	45%	29%	30%	24%	21%	34%	45%	46%

Alerus Financial has fairly prudent management, which is focused on maintaining healthy credit quality metrics. During the last 25 years, the bank has maintained an average net loan charge-off ratio of only 0.3%. Thanks to its cautious strategy, the company has proved resilient to recessions. Most banks faced material loan losses due to the pandemic in 2020, but Alerus Financial proved resilient to this crisis thanks to its defensive business model. The bank grew its earnings-per-share in both 2020 and 2021, though its earnings have now moderated, mostly due to the non-recurring tailwind from the strong economic recovery in 2021.

Alerus Financial recently raised its dividend by 5.6%. As a result, it has raised its dividend for 18 consecutive years and is currently offering a nearly 10-year high dividend yield of 4.2%. Given its healthy payout ratio of 45% and its reliable business performance, the bank can continue raising its dividend for many more years.

Final Thoughts & Recommendation

Alerus Financial has promising growth prospects thanks to its acquisition of Metro Phoenix Bank. It has easily endured the turmoil caused by the collapse of a few banks and thus it has rallied 20% since our last report, in April. The stock remains attractive. We expect it to offer an 11.2% average annual return over the next five years thanks to 5.0% earnings-per-share growth, its 4.2% dividend and a 2.5% annualized valuation tailwind. We maintain our buy rating.
