Overview & Current Events

Founded in 1897 and headquartered in Chicago, IL, CNA Financial is one of the largest U.S. Commercial Property and Casualty insurance companies. The company operates under five segments: Specialty, Commercial, International, Life & Group and Corporate & Other – offering property and casualty coverage, life, accident and health insurance and retirement products and annuities. Loews Corporation (L) owns approximately 89% of CNA's shares. Last year the \$11.3 billion market cap company served over 1 million businesses and professionals and generated \$1.0 billion in profit.

On July 31st, 2023, CNA reported Q2 results for the period ending June 30th, 2023. For the quarter, the company posted core income, which excludes investment gains or losses, of \$308 million or \$1.13 per share compared to \$230 million or \$0.84 per share last year. Higher profitability was driven by higher investment income and record high pretax underlying underwriting income, partially offset by higher catastrophe losses and lower favorable net development from last year.

The underlying combined ratio, which divides the sum of claim-related losses and business expenses by premiums earned, came in at 93.8%, up from 91.0% in the prior-year quarter. Adjusted book value per share equaled \$44.86, flat from \$44.83 at the end of 2022, but 5% higher if adjusted for \$2.04 of total dividends per share (two quarterly dividends of \$0.42 and a special dividend of \$1.20). Our updated estimates for this year point toward earnings-per-share of \$4.40 (up from \$4.30 previously), which assumes improved investment performance over fiscal 2022.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$3.85	\$3.14	\$1.90	\$3.05	\$3.38	\$3.11	\$3.59	\$2.70	\$4.06	\$3.84	\$4.40	\$5.10
DPS	\$0.80	\$1.00	\$1.00	\$1.00	\$1.10	\$1.30	\$1.40	\$1.48	\$1.52	\$1.60	\$1.68	\$1.95
Shares¹	270	270	270	271	271	272	271	271	271	271	271	270

Note that we are using core earnings, as we believe this better reflects the long-term earnings power of the company. CNA has put together a volatile but positive business record over the last decade. This is to be expected from an insurer, as premiums tend to be consistent, but claims will vary dramatically. From 2013 through 2022, it appears that CNA has failed to grow its core earnings-per-share, but this was due to a relatively tough environment last year. We believe that earnings will rebound this year.

And, while CNA's history may not have set a strong precedent for growth, we are of the opinion that a slow and steady approach is warranted in this industry. Insurers do not know their liabilities for many years, and it can be easy to underprice policies to chase growth. This was especially relevant during the past couple of years, given the COVID-19 pandemic and the uncertainties (still) surrounding future equity gyrations and insurance-related losses, especially those pertaining to weather.

We believe CNA could generate growth over the intermediate term via ongoing policy price increases, a combined ratio that continues to improve, and higher interest rates over the long term, which would help the fixed maturity holdings. We are estimating earnings-per-share to reach \$4.40 in 2023, and we are assuming a 3% intermediate-term growth rate.

¹ In millions.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	9.2	12.7	20.2	11.0	14.1	15.4	12.7	12.9	10.7	11.7	9.5	10.0
Avg. Yld.	2.3%	2.5%	2.6%	3.0%	2.3%	2.7%	3.1%	4.2%	3.5%	3.6%	4.0%	3.8%

Over the past decade, shares of CNA have traded hands with an average multiple of around 13.1 times earnings. We believe 10 times earnings is a reasonable starting place, given the volatile results of the business and relatively low growth expectation compared to other companies in the industry. With shares currently trading at 9.5 times our earnings estimate, we believe that CNA could be slightly undervalued. Note that while CNA has paid a notable special dividend every year since 2014, we have not included this in our forecasts. In 2022, the special dividend amounted to a substantial \$1.20 per share. As such, this component could very well be understated in our dividend return estimates.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	21%	32%	53%	33%	33%	42%	39%	55%	37%	42%	38%	38%

While CNA's business results have been markedly positive during the last decade, we do not believe the firm has a material competitive advantage given that insurance products are commodity-like in nature.

CNA is not necessarily beholden to economic conditions as much as it is to the timing of insurance related losses. That being said, many of the company's customers are sensitive to recessions, which will put pressure on the company in lesser times. During the Great Recession, CNA posted earnings-per-share of \$3.90, \$1.91, \$3.42, \$2.20, and \$2.28 during the 2007 through 2011 stretch. Moreover, the dividend was cut from \$0.45 to zero during 2009 and 2010, before being reinstated at \$0.40 in 2011. This is a cautionary tale for what could happen during the next downturn.

Today the company appears to be in reasonable financial shape, with A+ and A2 ratings from S&P and Moody's. Moreover, we are encouraged by the annual special dividend as this shows both a penchant for returning capital to shareholders and flexibility if the firm needs it in the future.

Final Thoughts & Recommendation

Shares have traded flat year-to-date. CNA Financial has put up a volatile record over the past decade and has overall failed to achieve any meaningful growth. Still, we expect an improvement in results this year and are generally encouraged by the capital allocation decisions being made. We are projecting a 7.5% annual total return potential, stemming from 3% growth, a subtle valuation expansion, and the 4.0% starting dividend yield. Our projection doesn't reflect the annual special dividend, which is likely to boost total returns. Shares earn a hold rating.
