Overview & Current Events

Duke Energy began operations in 1904 by providing power to a South Carolina cotton mill. Since that time, it has grown both organically and through mergers to become one of the largest providers of energy in the US. Today, it produces billions of dollars in annual revenue and trades with a market capitalization of \$69 billion.

Duke Energy released its second-quarter financial results on August 8th. The reported Q2 Non-GAAP EPS was \$0.91, falling short by \$0.07. However, the company's revenue of \$6.58 billion, though down 1.6% year-over-year, surpassed expectations by \$20 million. Duke Energy reaffirmed its adjusted 2023 EPS guidance range of \$5.55 to \$5.75 and its long-term adjusted EPS growth rate of 5% to 7% through 2027, based on the 2023 midpoint of \$5.65. The CEO emphasized the company's robust business fundamentals and its commitment to achieving 5-7% long-term EPS growth through 2027, driven by investments to meet the increasing demand for affordable and reliable clean energy. It's worth noting that the management doesn't provide forecasts for reported GAAP EPS and related long-term growth rates.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$4.35	\$4.55	\$4.54	\$4.69	\$4.57	\$4.72	\$5.06	\$5.12	\$5.24	\$5.27	\$5.66	\$7.09
DPS	\$3.09	\$3.15	\$3.24	\$3.36	\$3.49	\$3.60	\$3.71	\$3.82	\$3.90	\$4.02	\$4.10	\$4.71
Shares³	706.5	707.6	688.4	699.6	700.1	727.0	733.3	768.7	769.4	770.1	770.7	775

Duke's earnings-per-share have increased at an annual rate of 4% over the last decade, and we expect to see Duke continuing to generate 4.6% annualized earnings-per-share growth over the next half decade from the high base for 2023. The key determiners of Duke's value proposition to investors will be how well they can execute on their ambitious \$37 billion growth CapEx plan, and if they can continue to garner favorable regulatory rulings in their operating regions. While they continue to achieve reasonable regulatory rulings, there are no guarantees this will continue, especially given that government energy policies have shifted with the 2020 election results. We therefore take a cautious and conservative outlook on growth, projecting Duke achieving the low end of its guidance.

That being said, customer growth should continue as a low-single-digit tailwind for the foreseeable future, providing Duke with ever-higher base demand for its services. Of course, the weather can have a significant impact positively or negatively in any particular year, but overall, a low-single-digit tailwind from customer growth is very likely. In addition, rate increases should help boost revenue and earnings, as we've seen with Duke's recent rate increases in North Carolina and Kentucky. Duke, like any other power provider, must ask for rate increases from local authorities so they are certainly not assured. However, state regulators have been amicable to rate increase requests from Duke and should continue to be moving forward.

One offsetting factor in earnings-per-share growth is that Duke likes to issue common stock for general corporate purposes, leading to a higher share count over time. Its share count has risen from 424 million in 2008 to 770 million

today. Share issuances are irregularly timed and sized so the exact impact is difficult to predict, but this is a long-term habit for Duke and must be accounted for in estimates. The dividend continues to rise at a low-single-digit pace, slightly under that of earnings-per-share growth. We expect this will continue, keeping Duke firmly in the income stock category.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	17.5	17.4	17.9	18.2	21.3	19.9	18.6	19.1	19.4	18.5	16.0	15.0
Avg. Yld.	4.4%	4.4%	4.4%	5.0%	3.9%	3.8%	3.9%	3.9%	4.0%	4.1%	4.5%	4.4%

Duke's valuation has remained mostly steady throughout the past decade, with the exception of the period immediately following the Great Recession. Duke's price-to-earnings ratio has been in the high teens and low 20s over the past decade, but given current headwinds, we are reducing the fair value to 15 times earnings. Today's price-to-earnings ratio of 16 is above our reduced fair value estimate, and we therefore see a headwind to annual total returns from a contracting multiple over time.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	71%	69%	71%	72%	76%	76%	73%	75%	74%	76%	72%	66%

Duke's quality metrics have been largely stable throughout the past decade and we do not expect that will change. We expect margins to be flat moving forward – albeit at very high levels – and for its balance sheet leverage and interest coverage to remain steady. Management has a stated plan to reduce leverage moving forward as it plans to boost cash flow against the amount of debt it takes on, so we are not concerned. The payout ratio is relatively high, but the dividend is well-covered, and should be for the foreseeable future. Duke's competitive advantage is its near monopoly in the areas it serves, which is not dissimilar to other regulated utilities. In addition, recession performance should be excellent as it grew earnings-per-share rather rapidly during the Great Recession, making this a truly defensive stock with a high yield and decent growth prospects.

Final Thoughts & Recommendation

We expect Duke to generate 7.3% annualized total returns from its 4.5% current yield and 4.6% expected earnings-per-share growth, partially offset by a headwind from multiple contraction. As a result, we rate it a Hold.
