Overview & Current Events

Gorman-Rupp began manufacturing pumps and pumping systems back in 1933. Since that time, it has grown into an industry leader with annual sales of about \$650 million and a market capitalization of \$802 million. Today, Gorman-Rupp is a focused, niche manufacturer of critical systems that many industrial clients rely upon for their own success. Gorman-Rupp generates about one-third of its total revenue from outside of the U.S. The company also has one of the most impressive dividend increase streaks in the market, which currently stands at 50 years. That makes Gorman-Rupp a member of the prestigious Dividend Kings.

Gorman-Rupp posted second quarter earnings on July 28th, 2023, and results were quite strong, sending the stock soaring after the announcement. Adjusted earnings-per-share came to 41 cents, and revenue soared 44% higher year-over-year to \$171 million. Domestic sales rose 51%, while international sales rose 26%.

The gain in sales was primarily attributable to the company's Fill-Rite acquisition, which not only added to the top line through the acquisition, but the segment itself is performing well with organic sales increases.

Gross profit was \$51.7 million, which was 30.2% of revenue. These were up from \$28.2 million, and 23.7%, respectively, in the year-ago period. The gain was due to a 200 basis point improvement on labor and overhead leverage due to higher sales volume and mix. This was mostly due to the Fill-Rite acquisition.

SG&A costs were \$24.2 million, or 14.1% of sales. These compare to \$24.1 million, and 20.3%, respectively, year-over-year. This was due primarily to sales leverage from Fill-Rite.

Operating income was \$24.3 million, or 14.2% of revenue, which was up from \$2.9 million, or 2.4% of revenue, from the comparable period a year ago. We now see \$1.30 in earnings-per-share for this year after Q2.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$1.15	\$1.38	\$1.06	\$0.95	\$1.22	\$1.53	\$1.37	\$1.11	\$1.32	\$0.94	\$1.30	\$1.91
DPS	\$0.33	\$0.37	\$0.41	\$0.43	\$0.47	\$0.51	\$0.55	\$0.59	\$0.65	\$0.69	\$0.70	\$0.89
Shares¹	26	26	26	26	26	26	26	26	26	26	26	26

Gorman-Rupp's earnings volatility has been very high, and that has translated into a lot of volatility for the stock in the past decade. As the company makes products for industrial and municipal clients, its revenue can swing wildly from one year to another. Margins have been stable over the past decade, but it does experience boom/bust cycles in revenue generation, leading to lots of earnings volatility, as was the case in 2019 and 2020 following a strong performance in 2018. We are forecasting 8% earnings-per-share growth going forward from our earnings estimate but note that recent weakness continues to suggest further volatility moving forward, particularly given current inflationary and supply chain challenges. Given that, and the low base for 2023, the company may see outsized growth in the near-term.

The company can achieve this result mostly through low single-digit sales growth. Given the company's robust backlog of uncompleted work, we see revenue growth continuing for the near term, which the company says continues to occur.

The Gorman-Rupp Company (GRC)

Updated July 31st, 2023, by Josh Arnold

Gorman-Rupp's primary earnings growth driver is certainly revenue as its margins fluctuate over time, and Gorman-Rupp is focusing on cost containment efforts to help combat this while it waits for revenue to rise. The company is facing significant input cost inflation, but recent results suggest that may have passed; Q2 was outstanding for margins.

We are forecasting mid-single-digit growth in the dividend as Gorman-Rupp's increases have been lumpy in the past but have picked up in terms of significance lately.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	23.5	23.1	25.8	28.4	24.7	21.6	24.5	28.8	27.7	27.3	24.6	23.0
Avg. Yld.	1.2%	1.2%	1.5%	1.6%	1.6%	1.5%	1.6%	1.8%	1.8%	2.7%	2.2%	2.0%

Gorman-Rupp's price-to-earnings multiple stayed in a narrow range from 2008 to 2014, but in more recent years, investors have been willing to pay more. Shares trade at 24.6 times our earnings estimate, which is ahead of our estimate of 23 times earnings. As such we are forecasting a -1.3% impact on total returns from the valuation in the coming years. The yield could also decline slightly over time.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	29%	27%	38%	45%	39%	33%	40%	53%	49%	73%	54%	47%

Gorman-Rupp's payout ratio is 54% of earnings for this year following the increase in the dividend. We see it declining in the years to come as earnings rebound.

The company's competitive advantage is in its many decades of experience in providing innovative solutions for niche, but critical, engineering problems facing its customers. However, it is far from immune to recessions as revenue and earnings both fell very sharply during the Great Recession.

Final Thoughts & Recommendation

Gorman-Rupp is trading at 107% of our estimate of fair value following the Q2 report. The company's level of earnings growth could afford investors 8.4% annual returns in conjunction with the 2.2% yield, offset by a 1.3% potential valuation headwind. We are reiterating the stock at a hold rating following Q2 results.
