Overview & Current Events

In 1897, Jerome Monroe Smucker founded a small cider mill in Orrville, Ohio. He used surplus apples, said to be cultivated by Johnny Appleseed, to make cider and apple butter. Since then, the J.M. Smucker company has grown into an international powerhouse of packaged food and beverage products including iconic names like Smucker's, Jif and Folgers, along with various pet food brands. The company has a market capitalization of \$14.5 billion and generated \$8 billion in sales last year.

On July 14th, 2023, Smucker's raised its quarterly dividend by 4%, from \$1.02 to \$1.06.

In late August, Smucker's reported (8/29/23) financial results for the first quarter of fiscal 2024, which ends on April 30th, 2024. Currency-neutral organic sales grew 21% over the prior year's quarter thanks to strong volume sales of peanut butter and coffee products as well as material price hikes. The solid volumes amid strong price hikes are testaments to the strength of the brands of the company. Adjusted earnings-per-share grew 32%, from \$1.67 to \$2.21, and exceeded the analysts' estimates by \$0.17, as price hikes more than offset the increased costs of commodities, ingredients, manufacturing, and packaging costs.

Thanks to better-than-expected results, material price hikes and sustained positive business trends, Smucker's improved its already positive outlook for fiscal 2024. The company still expects comparable sales growth of 8.5%-9.5% but raised its guidance for adjusted earnings-per-share from \$9.20-\$9.60 to \$9.45-\$9.85. This guidance is uniquely adjusted as it adds back in amortization (\$1.54 per share). We include the impact of amortization expense in our earnings expectations and raise our forecast for adjusted earnings-per-share in fiscal 2024 from \$7.88 to \$8.18.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$5.64	\$5.35	\$5.89	\$6.49	\$6.97	\$6.66	\$6.84	\$7.79	\$7.34	\$7.38	\$8.18	\$9.95
DPS	\$2.32	\$2.56	\$2.68	\$3.00	\$3.12	\$3.40	\$3.52	\$3.58	\$3.87	\$4.08	\$4.24	\$5.16
Shares²	102	120	116	113	114	114	114	112	108	105	100	95

The share count increase of Smucker's in 2015 was the result of the acquisition of Big Heart Pet Brands.

Since 2009, Smucker's has grown its earnings-per-share by over 6% annually. Previously the company provided long-term guidance for 8% annual earnings-per-share growth. While we believe this is a great goal, we are hesitant to extrapolate that sort of growth over the intermediate term. The company has a collection of iconic brands, but many of them are center-aisle staples that have been losing popularity as consumers look for fresher, healthier options. Increased advertising spending and moving toward consumer preferences will require significant capital outlays in the years to come. On the positive side, coffee is a strong, sticky segment for the business and Smucker's is working to expand the current iconic lines, such as Jif, to more on-trend products like granola bars and on-the-go snacks.

The pandemic has spurred demand in the short-term, but we do not see this as a long-term tailwind. We are forecasting \$8.18 in earnings-per-share for this year and a 4% average annual growth rate.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	18.3	19.6	20.1	21.0	17.0	16.2	16.3	14.8	17.9	19.5	17.4	16.0
Avg. Yld.	2.2%	2.4%	2.3%	2.2%	2.6%	3.2%	3.2%	3.1%	2.4%	2.8%	3.0%	3.2%

The stock of Smucker's has traded at an average P/E ratio of 18.1 over the last decade. While we believe this mark is more or less fair, we do caution that it could be overstated should earnings growth stall. We have thus assumed a fair P/E ratio of 16.0 for the stock. Smucker's is currently trading at a P/E ratio of 17.4. If it trades at our assumed fair valuation level in five years, it will incur a -1.6% annualized valuation headwind in its returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	41%	48%	46%	46%	45%	51%	51%	46%	53%	55%	52%	52%

Smucker's iconic brands continue to enjoy recognition, but this moat is eroding somewhat as consumers look for fresher and healthier alternatives. During the last recession, Smucker's held up exceptionally well, growing both earnings and dividends during this time. Our apprehension is not with the next recession, but instead whether or not the company can meaningfully grow. Even with a short-term boost from the pandemic, growth prospects appear lackluster.

The company has been working towards growth, mostly via acquisitions. Of course, this has levered up the balance sheet, but leverage remains under control. Smucker's has net debt of \$6.0 billion, which is less than half of the market capitalization of the stock. The company also has an interest coverage ratio of 7.8, which is healthy. In addition, the 3.0% dividend is safe, given the decent payout ratio of 52% and the resilience of the company to recessions.

Final Thoughts & Recommendation

The stock of Smucker's could offer a 5.2% average annual return over the next five years thanks to 4.0% growth and a 3.0% dividend yield, partly offset by a -1.6% valuation headwind. While the company has a strong history with a solid dividend and iconic brands, growth prospects are not robust. Moreover, the industry appears to be facing long-term headwinds, mostly due to increased health-consciousness of consumers. Shares maintain their hold rating.
