Overview & Current Events

Walmart traces its roots back to 1945 when Sam Walton opened his first discount store. The company has since grown into the largest retailer in the world, serving more than 230 million customers each week. Revenue should be around \$637 billion this year and the stock trades with a market capitalization of \$429 billion. Walmart is one of the largest employers in the world, counting 2.3 million people in its ranks. Walmart has increased its dividend for 50 consecutive years, making it a new member of the prestigious Dividend Kings.

Walmart posted second quarter earnings on August 17th, 2023, and results were much better than expected on both the top and bottom lines. Adjusted earnings-per-share came to \$1.84, which was 13 cents better than expected. Revenue was up 5.9% year-over-year to \$161.6 billion, better than estimates by \$2.35 billion.

The company noted its global advertising business, which is a burgeoning segment where it's investing heavily, was up 35% year-over-year. US comp sales rose 6.4%, as eCommerce led the way at +24%; pickup and delivery were sources of strength. Comp sales were expected to be just +4%. Transactions were up 2.9%, and the average ticket was 3.4% higher. Sam's Club comp sales rose 5.5%, with 2.9% transaction growth and 3.5% ticket growth. Walmart International saw total sales up 13.3% to \$27.6 billion.

Gross margin was up 50 basis points to 24.0% of sales, attributable to lower markdowns and supply chain costs, offset by pressure in grocery and health segments. Operating expenses were up 33 basis points as a percentage of sales, leading to consolidated operating margin of 6.7% of revenue.

We now see \$6.45 in earnings-per-share for this year after Q2 results.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$5.11	\$5.07	\$4.57	\$4.32	\$4.42	\$4.91	\$4.93	\$5.48	\$6.43	\$6.29	\$6.45	\$9.48
DPS	\$1.88	\$1.92	\$1.96	\$2.00	\$2.04	\$2.08	\$2.12	\$2.16	\$2.20	\$2.24	\$2.28	\$2.52
Shares¹	3,233	3,228	3,162	3,048	2,952	2,914	2,855	2,826	2,769	2,696	2,650	2,500

The largest concern for Walmart is operating margins, as gross margins have remained flat while operating expenses have risen in recent quarters. This is the product of Walmart's focus on building out its online business as well as integrating its acquisitions, both of which are expensive endeavors. We note that while operating margins have improved of late, given the pace of revenue growth, one would generally expect higher margins, but Walmart simply isn't delivering as it reinvests in pricing and digital channels, as well as dealing with labor cost inflation. We see strength in comparable sales, as well as gross margins rising more quickly than operating expenses as supporting earnings growth.

Looking forward, we are forecasting 8% annual earnings growth for the next five years as Walmart continues to work through its margin issues and caution on consumer spending. The company continues to buy back stock as well. We see low single-digit sales growth each year, with its e-commerce business being the primary driver of top line growth. That combination should be good enough to create mid-single-digit growth without the benefit of margin expansion. We note

that revenue growth was much better in 2020 and 2021 due to COVID-19, but that this performance should not be repeatable. Guidance on this year's revenue supports this. We continue to be bullish on Walmart's ability to grow revenue, but with a watchful eye on margins. Walmart has also thus far successfully lapped the tough periods of the pandemic in terms of comparable sales. We note comparables will begin to be much tougher in the coming quarters.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	14.9	15.4	15.5	16.2	18.9	18.8	22.3	24.1	21.9	22.5	24.2	21.0
Avg. Yld.	2.5%	2.5%	2.8%	2.9%	2.1%	2.3%	1.9%	1.6%	1.6%	1.6%	1.5%	1.3%

Walmart's valuation has deteriorated somewhat as the share price has risen. We are forecasting the price-to-earnings multiple to decline from the current 24.2 to 21, implying a headwind to total annual returns from the valuation. The yield is 1.5%, which is still below its historical range. Given small dividend increases in recent years, we've reduced our dividend growth forecast accordingly.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	32%	37%	38%	43%	46%	42%	43%	39%	34%	36%	35%	27%

The company's payout ratio is quite low at 35% of earnings, making for a conservative dividend policy. The dividend should be very safe, even if earnings decline meaningfully.

Walmart's competitive advantage is in its enormous size as it can buy and ship product at scales no other company can rival. This allows it to operate with low prices to consumers and as more than half of its revenue comes from groceries, its recession performance is excellent. The company managed to increase earnings steadily during and after the Great Recession. Hard economic conditions tend to send consumers on the margins to Walmart, which is also an advantage. We note that Walmart's strength during the COVID-19 crisis highlights its recession resistance.

Final Thoughts & Recommendation

Overall, Walmart looks poised to deliver decent returns in the coming years. We are forecasting total five-year annual returns of 6.2%, as the yield remains low at 1.5%, and the valuation is ahead of our fair value estimate, driving a 2.8% headwind, despite 8% projected growth. Walmart is a safe, defensive stock in times of economic hardship, and the stock remains a hold.
