## Overview \& Current Events

Fastenal began in 1967 when Bob Kierlin and four friends pooled together $\$ 30,000$ to open the first store. The original intent was to dispense nuts and bolts via vending machine, but that idea got off the ground after 20 years. The company went public in 1987 and today provides fasteners, tools and supplies to its customers via 1,615 public branches, 1,778 active Onsite locations and over 110,000 managed inventory devices. Fastenal has a market capitalization of $\$ 32$ billion. On January $18^{\text {th }}, 2023$, Fastenal raised its quarterly dividend by $13 \%$, from $\$ 0.31$ to $\$ 0.35$.
In mid-October, Fastenal reported (10/12/23) financial results for the third quarter of fiscal 2023. It grew its net sales 2.4\% over last year's quarter thanks to growth in Onsite locations and price hikes, which more than offset a modest decrease in the demand for construction goods. Earnings-per-share grew $4 \%$, from $\$ 0.50$ to $\$ 0.52$, beating the analysts' consensus by $\$ 0.02$. Fastenal has not missed the analysts' estimates for 16 quarters in a row. The company posted record earnings-per-share in 2022 and is on track for another record this year. Thanks to the effect of price hikes, we have raised our forecast for annual earnings-per-share from $\$ 1.95$ to $\$ 2.00$.

Fastenal has grown its earnings-per-share at a $10.7 \%$ average annual rate over the last decade. This has been driven by a variety of factors, including sales more than doubling, an improvement in margins and tax reform. The COVID-19 pandemic impacted many businesses, but Fastenal proved resilient in 2020. The traditional business faced challenges, but the Safety segment more than offset lost sales. We expect $6 \%$ growth of earnings-per-share over the next five years. Fastenal is in the midst of a transformation from the traditional public branches leading the business to Onsite locations and managed inventory (mostly vending devices) heading the growth story. (Public store count topped out in 2014 and has since been declining, while Onsite and vending have increased materially.) We believe this is a prudent move, establishing stickier relationships with customers. This is especially true since only a small fraction of the company's business is from walk-in customers while the majority is done business-to-business.

On the flip side, the large, national accounts are tougher for margins, but this should be made up for in incremental volume. Moreover, the company is exposed to a fair amount of cyclicality, as over half of its business is in construction and heavy manufacturing.

## Fastenal Company (FAST)

Updated October 12 ${ }^{\text {th }}, 2023$, by Aristofanis Papadatos
Over the past decade, shares of Fastenal have traded hands with an average price-to-earnings ratio of 26.8. Even during the depths of the Great Recession, shares did not trade below 15 times earnings. The stock has rarely traded with a price-to-earnings ratio below 20 since 2010. Overall, Fastenal has always traded at a premium valuation.
This premium has implications on the shareholder return side, as the dividend yield will remain average (even with an elevated payout ratio) and share buybacks do not enhance shareholder value. (The last time a meaningful number of shares was retired was in 2015, when the company took on debt). Assuming a fair price-to-earnings ratio of 24.0 for 2028, the stock is likely to incur a $-3.4 \%$ annualized valuation drag over the next five years.

## Safety, Quality, Competitive Advantage, \& Recession Resiliency

| Year | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ | $\mathbf{2 0 1 8}$ | $\mathbf{2 0 1 9}$ | $\mathbf{2 0 2 0}$ | $\mathbf{2 0 2 1}$ | $\mathbf{2 0 2 2}$ | $\mathbf{2 0 2 3}$ |

Fastenal has a first mover competitive advantage in its industrial vending and Onsite locations, creating a very sticky and well-attuned customer relationship with high switching costs. Moreover, its scale allows the company to continue its growth path, adjust to business preferences and reliably deliver needed goods.
During the Great Recession, Fastenal reported earnings-per-share of $\$ 0.39, \$ 0.48$, $\$ 0.31$, and $\$ 0.45$ for the 2007 through 2010 period. Moreover, the dividend kept rising during that period. While we note some cyclical possibilities in the construction industry, thus far the company has proven itself to be well prepared to endure financial storms. We note that the dividend payout ratio is elevated, but we believe this is reasonable considering the debt-free balance sheet. Indeed, the company actually paid a special dividend in 2020, citing high cash balances and a favorable outlook.

## Final Thoughts \& Recommendation

Fastenal has proven a great company, with consistent growth of earnings and dividends. Moreover, it is executing moves to better cement itself as a go-to supplier. It's the sort of business that you would be proud to own. However, the stock has rallied $21 \%$ in the last 12 months and thus it has become somewhat richly valued. We expect the stock to offer a $5.0 \%$ average annual total return over the next five years thanks to $6.0 \%$ earnings growth and a $2.5 \%$ dividend, partly offset by a $-3.4 \%$ valuation headwind. The stock maintains its hold rating.
