Overview & Current Events

State Street Corporation is a Boston based financial services company which traces its roots back to 1792. It trades under the ticker STT and has raised its dividend for 14 consecutive years. State Street is one of the largest asset management firms in the world, with \$3.7 trillion of assets under management and \$40 trillion of assets under custody and administration. The company trades with a market capitalization of \$21.4 billion.

In September of 2021, State Street announced the acquisition of Brown Brothers Harriman Investor Services for \$3.5 billion but the two companies agreed to cancel the deal on November 30th, 2022 due to regulatory hurdles.

In mid-October, State Street reported (10/18/23) financial results for the third quarter of fiscal 2023. Net interest income dipped -5% due to higher deposit costs but fee revenues grew 3% over last year's quarter, primarily thanks to higher stock market levels, and assets under custody or administration rose 4%. As a result, earnings-per-share grew 7%, from \$1.80 to \$1.93, and exceeded the analysts' consensus by \$0.10. State Street has exceeded the analysts' estimates in 18 of the last 19 quarters. Thanks to its positive performance and outlook, State Street recently raised its dividend by 10%. It has thus raised its dividend by 10% for three consecutive years. It has also announced a share repurchase program of \$4.5 billion for 2023, enough to reduce its share count by 20%. However, the bank also issues a significant amount of new shares.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$4.43	\$4.53	\$4.77	\$5.40	\$5.67	\$6.89	\$6.00	\$6.78	\$7.52	\$7.41	\$7.45	\$9.51
DPS	\$1.04	\$1.16	\$1.32	\$1.44	\$1.60	\$1.78	\$1.98	\$2.08	\$2.18	\$2.40	\$2.76	\$3.84
Shares²	455	432	414	396	380	376	374	357	358	364	320	300

State Street has grown its earnings-per-share at a 5.9% average annual rate over the last decade. Going forward, we see the ability for continued growth thanks to the organic growth of equity flows and acquisitions. We consider this a defensive, low-risk stock, which is appropriate for those looking for stable dividend income that can grow faster than inflation in the upcoming years.

In the past few years, State Street has benefitted from new equity inflows as well as a market rally. The bank's asset management business, State Street Global Advisors, also benefitted from stock market gains and flows into ETFs. The firm will rely on the growth of flows into the equity market as well as acquisitions. Management claims to need about \$1.5 trillion in new business annually to stick to growth targets.

State Street has announced the repurchase of \$4.5 billion of shares this year. This amount represents 20% of the current share count. Organic earnings growth has been about 2.9% per year, while the share count has contracted by -2.4% per year over the last decade. Thanks to organic growth, share repurchases and inorganic growth through strategic acquisitions, we expect 5% average annual growth of earnings-per-share over the next five years.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	14.0	15.4	16.6	12.9	14.7	14.1	11.2	10.4	11.3	10.3	9.3	12.5
Avg. Yld.	1.6%	1.6%	1.8%	2.2%	1.8%	2.0%	3.1%	3.2%	2.6%	3.1%	4.0%	3.2%

State Street is currently trading at price-to-earnings ratio of 9.3, which is much lower than its 10-year average of 13.1. The cheap valuation has resulted from high interest rates, a rising cost of deposits and turmoil in the financial sector after the collapse of Silicon Valley Bank and Credit Suisse. We view these headwinds as temporary and assume a fair price-to-earnings ratio of 12.5 for this stock. If the stock trades at its fair valuation level in five years, it will enjoy a 6.2% annualized valuation tailwind.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	23%	26%	28%	27%	28%	26%	33%	31%	29%	32%	37%	40%

State Street has a conservative payout ratio of 37%, with stable earnings and a solid track record. It is one of the market leaders in its industry of asset management and asset servicing. It also benefits from its economies of scale, which pose a formidable barrier to new entrants. However, competition with names like Vanguard, BlackRock, and Bank of New York Mellon, all of which are lowering fees to attract investor funds, limits the growth potential within this space. A recessionary environment may lower profits but it is unlikely to endanger the dividend or the firm.

Final Thoughts & Recommendation

The stock of State Street has incurred a -27% correction off its peak early this year, mostly due to fears that the turmoil from the collapse of Silicon Valley Bank and Credit Suisse may affect the bank. We view this headwind as temporary and remain confident in the long-term prospects of the company. State Street could offer a 14.5% average annual return over the next five years thanks to 5.0% earnings-per-share growth, a 4.0% starting dividend yield and the potential for a 6.2% annualized valuation tailwind. The stock maintains its buy rating.
