Earnings-per-share for Westamerica Bancorporation more than doubled from 2008 to 2009, an accomplishment that few banks can claim. Earnings-per-share had declined in what is essentially a straight line until 2018, which was just the second year since 2009 that earnings increased year-over-year. The company has seen flat or higher earnings-per-share each year since, however. We anticipate an annual earnings-per-share growth rate of 2% through 2028 due to quality of loans and increases in revenue.

Westamerica Bancorporation has increased its dividend for the past 30 years. The company most recently increased its dividend by 4.8% for the August 18th, 2023 payment date. The dividend has compounded at a rate of 1.3% annually over the last decade. Note that the company also tends to raise its dividend every other year, but typically does so in the fourth quarter to keep its dividend growth streak alive.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	19.1	21.5	19.9	21.7	25.7	24.3	22.7	18.6	17.9	13.0	7.8	13.0
Avg. Yld.	3.1%	3.0%	3.3%	3.1%	2.6%	2.8%	2.4%	3.0%	2.9%	2.8%	3.7%	2.2%

Westamerica Bancorporation's stock has increased \$1, or 2.2%, since our July 22nd, 2023 update. Using the expected earnings-per-share for the year, the price-to-earnings ratio (P/E) is 7.8. The stock has seen its average P/E multiple vary dramatically over the past decade. Eliminating the years where the average P/E was above 24 (2017, 2018), shares of Westamerica Bancorporation have averaged a multiple of more than 19. We have reaffirmed our target valuation of 13 times earnings from 16 times earnings given the likely lateness of the current economic cycle and some of the uncertainty regarding the banking industry. If shares were to revert to our target P/E, valuation would add 10.9% to annual returns through 2028.

Westamerica Bancorporation trades with a forward yield of 3.7%, which is higher than both the average yield of the S&P 500 and the stock's long-term historical average 2.9%.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	60%	66%	67%	68%	68%	60%	55%	55%	51%	37%	29%	29%

While earnings-per-share increased significantly during the last recession, this does not make Westamerica Bancorporation recession proof, or even an attractive investment. The company has proven that it cannot be a reliable source of earnings growth. Despite this, the company's dividend payout ratio has been relatively stable.

Westamerica Bancorporation's key competitive advantage is its ability to see an improvement in net interest income as interest rates rise. The Federal Reserve has indicated that interest rates will likely remain higher for longer as the fight against inflation continues, which should be a material benefit to Westamerica Bancorporation were this to occur.

Final Thoughts & Recommendation

Following third quarter results, Westamerica Bancorporation is projected to return 15.4% annually through 2028, up from our previous estimate of 15.1%. Our projected returns stem from a 2% earnings growth rate, a 3.7% dividend yield, and a low double-digit contribution from multiple expansion. Loan growth remains weak for the bank and the decline in deposits reflects some of the concern over the uncertainty in the industry. That said, the company is also seeing a benefit from higher interest rates. We continue to rate shares of Westamerica Bancorporation as a buy due to projected returns.
