Overview & Current Events

AbbVie is a biotechnology company focused on developing and commercializing drugs for immunology, oncology and virology. AbbVie was spun off by Abbott Laboratories in 2013. The company has a rather short stand-alone history. Nevertheless, AbbVie has become one of the largest players in the biotechnology industry, especially following the closing of its acquisition of formerly independent pharma company Allergan.

AbbVie reported its third quarter earnings results on October 27. The company was able to generate revenues of \$13.9 billion during the quarter, which was 6% less than AbbVie's revenues during the previous year's quarter. AbbVie generated revenues that were ahead of what the analyst community had forecasted. AbbVie's revenues were positively impacted by compelling growth from some of its newer drugs, including Skyrizi and Rinvoq, while Humira sales declined due to the patent expiration, which hurt AbbVie's revenues meaningfully.

AbbVie earned \$2.95 per share during the third quarter, which was 19% less than the company's earnings-per-share during the previous year's quarter. AbbVie's earnings-per-share still beat the consensus analyst estimate by \$0.08. AbbVie's guidance for 2023's adjusted earnings-per-share was raised during the earnings call; the company now expects to earn \$11.19 - \$11.23 on a per-share basis this year. This still represents a sizeable decrease compared to 2022, which had been a record year. The company's earnings-per-share guidance accounts for the expected sales decrease of Humira this year, as Humira has gone off patent in the US in early 2023, which has caused competitors to bring their biosimilar products to the market. This, in turn, results in lower sales for this important drug for AbbVie.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$3.14	\$3.32	\$4.29	\$4.82	\$5.60	\$7.91	\$8.94	\$10.56	\$12.70	\$13.77	\$11.20	\$12.98
DPS	\$1.60	\$1.66	\$2.02	\$2.28	\$2.56	\$3.59	\$4.28	\$4.72	\$5.20	\$5.64	\$5.92	\$7.56
Shares²	1590	1590	1610	1590	1590	1550	1490	1780	1780	1780	1780	1750

AbbVie's explosive earnings-per-share growth started shortly after the company was spun off from Abbott Laboratories in 2013. Since then, earnings-per-share have grown by 15% annually. 2018 was a year of outsized earnings-per-share growth, partially driven by a lower tax rate, but also by ongoing growth from some of the company's largest drugs.

AbbVie's efforts in shielding Humira from competition through 2023 (in the US) and its substantial R&D investments for next-generation drugs should allow the company to keep revenues growing over the coming years. Humira's patent expiry in the US is still a couple of years away, which gives AbbVie enough time to bring new drugs to the market. AbbVie's new, improved drugs that target the same indications as Humira have a good chance at capturing much of Humira's current revenue stream. AbbVie's management believes that company-wide revenues in 2025 will be higher than they were in 2020, despite the fact that Humira's revenues will nearly disappear in the mid-2020s. The acquisition of Allergan, which closed in 2020, will also drive future revenue growth and diversify the company further, which will soften the blow from the generic competition for Humira, which has started in early 2023.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	13.9	16.7	14.4	12.6	13.4	11.6	10.0	9.9	10.7	11.8	12.7	11.0
Avg. Yld.	3.7%	3.0%	3.3%	3.8%	3.4%	4.8%	4.8%	4.5%	3.8%	3.7%	4.2%	5.3%

AbbVie's share price has declined slightly since our last update, falling back to the low-\$140s. The increased leverage due to the Allergan deal and the Humira patent expiry pose some risks, which is why we believe that a price-to-earnings multiple of around 11 seems fair. AbbVie trades ahead of our fair value estimate at the current price. AbbVie's shares offer a yield of 4.2% today, which is very solid.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	25.5%	50.0%	47.1%	47.3%	45.7%	45.4%	47.9%	44.7%	40.9%	43.0%	52.9%	58.2%

AbbVie started to pay dividends in 2013, and since then, the payout has risen quickly. This was possible due to a combination of strong earnings-per-share growth and an increase in AbbVie's dividend payout ratio. AbbVie does not have a very long dividend growth track record on its own, but we believe that its dividend looks relatively safe.

The healthcare industry, and especially the drug industry, is not very cyclical. AbbVie was not a standalone company during the last financial crisis, so there is no recession track record, but since sick people require treatment whether the economy is strong or not, it is highly likely that AbbVie will continue to perform well during recessions. AbbVie's Humira patent protection in the US will expire in a couple of years, but Humira will remain a major cash cow for now. Thanks to next-generation drugs and the takeover of Allergan, there is a good chance that the patent expiration will not be too much of a headwind. Investors should note that the Humira patent situation provides some uncertainty nevertheless.

Final Thoughts & Recommendation

AbbVie is a major biotech and pharma company that has grown both its profits as well as its dividend at an attractive pace in the past. The Humira patent expiration will pressure revenues in 2023-2024, but we believe that the growth outlook is still positive in the long run, thanks to a deep pipeline, strong growth from new drugs, and the Allergan acquisition that has broadened AbbVie's exposure in additional markets. Shares trade ahead of our fair value estimate today. The total return outlook is not great, which is why we rate AbbVie a hold at current prices.
