Overview & Current Events

Founded in 1925 and headquartered in Illinois, Caterpillar is the world's leading manufacturer of construction and mining equipment, diesel and natural gas engines, industrial gas turbines and diesel-electric locomotives. The \$118.0 billion market cap company operates in three primary segments: Construction Industries, Resource Industries and Energy & Transportation, along with ancillary financing and related services through its Financial Products segment.

On October 31st, 2023, Caterpillar reported its Q3 results for the period ending September 30th, 2023. For the quarter, the company generated revenues of \$16.8 billion, a 12% increase compared to the \$15.0 billion posted in the third quarter of 2022. Construction Industries, Resource Industries, and Energy & Transportation posted growth of 12%, 9%, and 11%, respectively.

These increases were primarily due to favorable price realization and higher sales volume. The increase in sales volume was driven by higher sales of equipment to end users, partially offset by the impact of changes in dealer inventories and lower services sales volume.

Caterpillar's adjusted operating profit margin was 20.5%, compared to 16.2% last year. Margin expansion combined with revenue growth resulted in adjusted earnings-per-share landing at \$5.52 against \$3.95 in the comparable period last year. A lower share count also boosted the result. Caterpillar returned \$1.0 billion to shareholders through dividends and share repurchases during the quarter, ending with \$6.5 billion of enterprise cash. For FY2023, we now expect adjusted EPS of \$20.00 (up from \$18.00 previously).

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$5.79	\$6.37	\$4.62	\$3.44	\$6.88	\$11.20	\$11.06	\$6.56	\$10.81	\$13.84	\$20.00	\$23.19
DPS	\$2.32	\$2.70	\$3.01	\$3.08	\$3.11	\$3.36	\$3.78	\$4.12	\$4.36	\$4.71	\$5.20	\$7.64
Shares¹	638	606	582	586	598	576	568	549	549	530	513	480

Caterpillar's customers, primarily mining and construction companies, operate in cyclical industries. During good times they are inclined to expand their operations and upgrade their equipment to make operations more efficient. During weak times they are less likely to expand their operations, and they will defer the purchase of new equipment, which means lower sales for Caterpillar. Caterpillar's business, therefore, is relatively cyclical, which is clearly visible in the above table. During the Great Recession, profits experienced a tremendous decline, and during 2015-2016, when commodity prices were relatively low, Caterpillar's sales and profits declined significantly as well.

In 2020 global trade uncertainties took a back seat to the COVID-19 pandemic, and bottom-line results fell by more than 40%. Not only did Caterpillar experience reduced demand, but dealers were more cautious with their inventories as well. While results may continue to be volatile, it appears the company is back on track. In fact, the \$1.2 trillion bipartisan infrastructure bill should to sustain strong demand for Caterpillar's machinery. We expect adjusted earnings-per-share growth of 3% in the medium-term. This reflects some caution coming off record EPS with regard to the cyclical nature of the business. We also expect dividends to grow by a CAGR of 8% in the medium-term.

¹ In millions.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	15.1	15.8	17.1	22.8	16.4	12.9	12.0	22.8	19.7	15.9	11.4	14.0
Avg. Yld.	2.7%	2.7%	3.8%	3.9%	2.8%	2.3%	3.0%	3.0%	2.0%	2.1%	2.3%	2.4%

Since 2013, shares of Caterpillar have traded hands with an average P/E ratio of about 17 times earnings; although this did include periods when earnings collapsed while the share price held up much better. While the company's growth remains impressive, we view 14 times earnings as a reasonable starting place. It's lower than its historical average due to the current interest rate environment. However, it still implies that a valuation expansion is possible from the current, rather depressed multiple.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	40%	42%	65%	90%	45%	30%	34%	63%	40%	34%	26%	33%

Caterpillar's dividend payout ratio has moved up and down throughout the last couple of years, which is not surprising as the company's profits were quite cyclical. In 2018, the significant increase in Caterpillar's earnings-per-share allowed the payout ratio to decline substantially. Since the payout ratio rose above 100% during the Great Recession, we view the dividend as somewhat risky, even though Caterpillar did not cut its dividend during this time.

Qualitatively, Caterpillar is one of the largest players in the markets it addresses, with a brand that is well-known and recognized around the globe. The fact that Caterpillar has a global presence and is selling its products to several industries (construction, mining, etc.) makes it less dependent on any single market. That being said, during global economic downturns, Caterpillar's business can be hit hard. This was illustrated during the Great Recession when EPS declined by -75% between 2008 and 2009. Results in 2020, down over -40%, demonstrate this as well.

Final Thoughts & Recommendation

Caterpillar is a leader in its industry but can post relatively volatile earnings. Total return potential comes in at 9.4% per annum, stemming from the 3% growth in EPS and the 2.3% starting dividend yield, further aided by valuation tailwinds. We are optimistic about Caterpillar's future performance despite its cyclical nature. CAT earns a hold rating.
