Overview & Current Events

Chesapeake Utilities Corporation (CPK) is a diversified energy delivery company operating primarily in the Mid-Atlantic region and engaged in distribution of natural gas, propane gas and electricity. Founded in 1947, this \$1.5 billion market cap company has raised its dividend every year since 2004.

Chesapeake reported Q3 2023 earnings on November 2nd, 2023. For the quarter, earnings-per-share were \$0.53, a decrease from the \$0.54 reported in the same period in 2022. The company declared a new quarterly dividend of \$0.59 per share, matching the previous quarterly dividend. This means the company's forward dividend of \$2.36 per share was not covered by the company's earnings this quarter.

During the quarter the company announced the acquisition of Florida City Gas, which is expected to cost \$923 million in cash, and the closing of the transaction is expected to occur by the end of 2023. Much like in the early half of the year, higher than expected temperatures have negatively impacted demand for the company's gas, lowering both EPS and adjusted EPS by approximately \$0.41 per share. The management team continues to see growth opportunities, both through acquisitions and through continued CAPEX investments.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$2.26	\$2.47	\$2.68	\$2.86	\$2.68	\$3.45	\$3.72	\$4.21	\$4.73	\$5.04	\$5.50	\$7.36
DPS	\$1.01	\$1.07	\$1.12	\$1.19	\$1.26	\$1.39	\$1.55	\$1.69	\$1.84	\$2.09	\$2.36	\$3.16
Shares	15	15	16	16	16	16	17	18	19	18	18.0	22.0

Utility companies are often seen as stable businesses with low volatility in their dividends, at the expense of limited growth opportunities. Chesapeake Utilities certainly has the earnings and dividend stability, and over the past decade it seems to have successfully dodged the low growth drawback that characterizes many of its competitors.

There's only so long that a company can swim against the current, however, and its most recent organic customer growth guidance of around 5%, well below its 10% average over the past decade, indicates that the business is maturing in a way that is bringing its fundamentals closer to those of its peers. However, we believe that Chesapeake Utilities is still an above average company within the utility sector. It's for this reason that we estimate a 6% earnings growth over the next 5 years, with earnings in 2028 of around \$7.36. This estimate is in line with the company's own guidance and represents a significant slowing down of the business compared to its performance in the past decade.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	15.6	17.7	19.1	21.8	27.8	22.9	24.7	21.6	25.6	25.0	16.0	15.0
Avg. Yld.	2.9%	2.4%	2.2%	1.9%	1.7%	1.8%	1.7%	1.9%	1.5%	1.7%	2.7%	2.9%

Over the past decade, Chesapeake has consistently traded at a premium and this premium has only increased over time to its valuation of over 20 times earnings recently. While the company's fundamentals are certainly impressive, it's clear that the valuation that investors have given the company has been lofty for some time, and over the past quarter it appears that investors have wised up to that as well and have brought down the multiple they have been willing to pay to 16 times earnings. While we expect the company to continue to be re-rated downwards over the coming years to around a 15 P/E it is clear that its current valuation is far more in line with the market than it was just a few months ago.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	45%	43%	42%	42%	47%	40%	42%	40%	39%	41%	43%	43%

Chesapeake has managed to provide above average returns over the past decade as a result of its unique business model that straddles the line between regulated and non-regulated utilities. By having parts of its business regulated, it has managed to maintain a consistent and stable earnings power that allows it to comfortably pay consistently increasing dividends, at the same time its unregulated business brings in above average organic growth that has only recently begun showing signs of slowing down. This strategy has allowed it to outperform its competitors and become a truly high-quality business that most investors would be happy to own.

Final Thoughts & Recommendation

With the reduction of the earnings multiple that investors have been required to pay over the past few months, CPK has now become a far more attractive investment for shareholders than it was earlier in the year. As a result we are changing Chesapeake Utilities' rating from a sell to a hold.
