Overview & Current Events

Clearway Energy Inc is a large electric utility company which owns and operates contracted energy generation across two segments: conventional generation, and renewables. The company possesses over 8,000 net MW of assets. Clearway is a large owner of renewable energy with over 5,500 MW of installed wind and solar generation projects. Approximately 2,500 net MW of the company's energy comes from natural gas generation facilities. The power company trades on the NYSE under the ticker symbol CWEN. They are headquartered in Princeton, New Jersey.

To note, Clearway Energy's controlling investor is Global Infrastructure Partners III (GIP), and Clearway Energy Group is the company's portfolio business from which they invest in infrastructure and businesses in OECD and certain emerging market countries. Clearway Energy Group owns or has an interest in more than 7 gigawatts of wind, solar and energy storage assets, and an ongoing development pipeline across the U.S. The group's large renewable power generation offsets about 10.5 million metric tons of carbon emissions.

On May 1st, 2022, the company completed the sale of its Thermal Business for net proceeds of roughly \$1.35 billion.

On August 7th, 2022, GIP completed a transaction resulting in TotalEnergies (NYSE: TTE) acquiring half of GIP's interest in Clearway Group. The benefit to Clearway is that TotalEnergies will provide Clearway with a right of first offer on its U.S. onshore renewable assets, and provide marketing and corporate relationships to aid in the commercial value of Clearway's development and operating projects.

On November 1st, 2023, Clearway raised its quarterly dividend again by 2% to \$0.3964 per share, or \$1.5856 per year.

Clearway Energy reported third quarter 2023 results on November 2nd, 2023. The company generated \$323 million in adjusted EBITDA for the quarter, up from \$322 million in the prior year quarter. Cash from operating activities declined by 13% to \$287 million and cash available for distribution (CAFD) was 156 million, compared to 154 million in Q3 2022.

Leadership reaffirmed its fiscal 2023 guidance for CAFD to \$330 million to \$360 million. This equates to roughly \$2.95 per share of CAFD based on our estimated fiscal 2023 share count. It also initiated 2024 guidance, expecting CAFD of \$395 million.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
CAFDs	-	-	\$2.13	\$3.17	\$2.72	\$2.80	\$2.70	\$2.54	\$2.87	\$2.79	\$2.95	\$3.42
EPS	-	-	\$0.40	\$0.58	(\$0.16)	\$0.46	(\$0.10)	\$0.22	\$0.44	\$4.99	\$0.54	\$0.69
DPS	-	-	\$0.82	\$0.95	\$1.10	\$1.26	\$0.80	\$1.05	\$1.33	\$1.43	\$1.59	\$2.02
Shares¹	-	-	84.0	98.0	99.0	104.0	109.0	116.0	117.0	117.0	117.0	125.0

Clearway's relevant earnings and cash available for distribution data goes back to 2015, when the company was known as NRG Yield, Inc. Earnings have been very choppy historically, and the corporation opts to measure performance and payout using cash available for distribution. However, even when measuring performance using CAFD per share, the company does not have an exemplary history, but it appears to be improving.

Clearway Energy Inc (CWEN)

Updated November 3rd, 2023 by Quinn Mohammed

Clearway's CAFD per share have grown by 3.9% and 1.1% on average over the past seven and three years. This small level of growth was one reason for the dividend cut in 2019.

Despite the poor growth history, we estimate that CWEN can grow CAFD by roughly 3.0% annually over the intermediate term. The Clearway Group will lead the corporation into significant growth opportunities as they have a near 30 GW development pipeline. Rate increases and further acquisitions of existing renewable energy projects will add to CAFD per share. The corporation also aims to lower annual interest expenses as they plan to deleverage by about \$350 million annually. We expect that shares outstanding will continue to grow, and so earnings and CAFD will be spread among more shares, a minor headwind on a per-share basis.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/CAFD	-	-	8.3	4.8	6.6	6.5	6.3	9.5	10.7	12.4	7.8	9.0
Avg. Yld.	-	-	4.7%	5.6%	5.7%	6.5%	6.4%	3.6%	3.7%	3.8%	6.9%	6.6%

Since earnings is not the primary metric in valuing Clearway Energy given its volatility, we are valuing the company based on CAFD per share. CWEN's eight-year and three-year average price-to-CAFD is 8.1 and 10.9, respectively. Today, shares trade below this range at 7.8 times estimated 2023 CAFD per share. We estimate this valuation could rise to 9.0 times CAFD per share, which would result in a 3.0% annualized tailwind to total returns.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	-	-	38%	30%	40%	45%	30%	41%	46%	51%	54%	59%

The company's payout has remained conservative on a CAFD per share basis; however, this includes one dividend cut in recent history. We don't have operating results dating back to the great financial crisis so we can't say for certain how CWEN would have performed, but we believe utilities businesses are generally one of the safer industries during a recession. Results were not highly impacted by the COVID pandemic as power generation is essential. CWEN believes its knowledge and operating expertise to be its prime competitive advantage in the industry, as it allows it to make strong energy acquisitions, which it can utilize to grow CAFD.

Final Thoughts & Recommendation

Clearway Energy is backed by one of the largest infrastructure funds in the world, which gives it an advantage in accessing deals and building out its power portfolio, and the company is turning a corner on achieving meaningful growth. We rate the shares as a buy with the company trading at 86% of our estimated fair value and forecast an annualized total return of 11.8%.
