Overview & Current Events

Emerson Electric was founded in Missouri in 1890 and since that time, it has evolved through organic growth, as well as strategic acquisitions and divestitures, from a regional manufacturer of electric motors and fans into a \$49 billion diversified global leader in technology and engineering. Its global customer base and diverse product and service offerings afford it just over \$17 billion in annual revenue. The company's very impressive 67-year dividend increase streak lands it on the prestigious Dividend Kings list.

Emerson posted fourth quarter earnings on November 7th, 2023, and results were worse than expected on both the top and bottom lines. Adjusted earnings-per-share came to \$1.29, which was two cents light of estimates. Revenue was up 5% year-over-year to \$4.09 billion, but missed expectations by \$100 million.

Profit was \$744 million for the quarter, fractionally higher year-over-year. Earnings from continuing operations rose from 82 cents to \$1.22.

Emerson said it's seeing softening demand in factory automation and test and measurement units, and as such, says growth won't likely occur in fiscal 2024 until the second half of the year. The company initiated 2024 guidance at \$5.15 to \$5.35 in adjusted earnings-per-share. We've started the stock with an estimate at the midpoint.

Emerson also posted its 67th consecutive annual dividend increase, adding about 1% to the payout to a new annualized payment of \$2.10 per share.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$3.75	\$3.17	\$2.46	\$2.54	\$3.46	\$3.71	\$3.46	\$4.10	\$5.25	\$4.28	\$5.25	\$7.03
DPS	\$1.72	\$1.88	\$1.90	\$1.92	\$1.94	\$1.96	\$2.00	\$2.04	\$2.06	\$2.08	\$2.10	\$2.43
Shares¹	697	655	643	642	641	632	601	595	591	575	565	540

Emerson is undergoing a significant shift in its strategy, whereby it is selling off legacy units and focusing more on automation and recurring revenue. We're estimating growth of 6% as management remains bullish, and as there are signs of organic revenue growth improvement, as well as with respect to margins. We still think low single-digit growth in revenue and a tailwind from the buyback will be the key drivers of earnings-per-share growth in the coming years, and we see Emerson as rebounding. We note there is likely to be significant earnings weakness while the transformation plays out, including relatively weak guidance for the start of fiscal 2024.

The dividend is also expected to grow in the low single-digits as recent years have seen Emerson focus more on acquisitions and share repurchases than growing the dividend. Growth rates will likely be unimpressive as the company continues to focus on using its ample cash flow on acquisitions, not above average dividend growth.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	17.6	18.0	20.6	22.9	20.5	17.7	18.8	18.2	13.9	22.6	16.2	19.0
Avg. Yld.	2.6%	3.3%	3.8%	3.3%	2.7%	3.0%	3.1%	2.3%	2.8%	2.2%	2.5%	1.8%

Emerson's price-to-earnings ratio is down since our last update, at 16.2 times earnings, which is below of our estimate of fair value at 19. We are therefore forecasting a modest favorable impact from the valuation in the coming years on total returns. We see the yield as declining over time, primarily from small dividend increases. If free cash flow weakens, growth rates in the dividend could moderate, but FCF remained strong.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	61%	60%	77%	75%	58%	53%	58%	50%	39%	49%	40%	35%

Emerson's payout ratio is under half of earnings, and we believe it will continue to drift lower over time as Emerson focuses on acquisitions instead of boosting the payout by large amounts. The dividend is very safe as it is well covered by free cash flow, and the yield is decent, so it is a suitable dividend stock. We also note that Emerson likes to buy back its stock, which puts a natural cap on how much the company is willing to use for dividend payments.

Emerson's competitive advantage is in its many decades of experience in building customer relationships and engineering excellence. It has a global customer base that is seeing strong economic growth and that underlying sales tailwind should power results going forward. It is very susceptible to recessions, however, so any signs of economic weakness should put investors on alert, as we saw in 2020.

Final Thoughts & Recommendation

With recent price action, Emerson is now meaningfully undervalued in our view. Our growth forecast, combined with shares at 85% of our estimate of fair value, and a higher dividend yield, means we are forecasting 11.3% total annual returns in the coming years. We are boosting the stock to a buy rating from hold, driven by a 3.3% valuation tailwind that should be aided by the 2.5% yield and 6% earnings growth.
