#### **Overview & Current Events**

Coca-Cola is the world's largest beverage company, as it owns or licenses more than 500 unique non-alcoholic brands. Since the company's founding in 1886, it has spread to more than 200 countries worldwide. It has a market capitalization of \$239 billion and its brands account for about 2 billion servings of beverages worldwide every day, producing about \$45 billion in annual revenue. The company also has an exceptional 61-year dividend increase streak, making it a Dividend King.

Coca-Cola posted third quarter earnings on October 24<sup>th</sup>, 2023, and results were much better than expectations. Adjusted earnings-per-share came to 74 cents, which was a nickel better than estimates. Revenue was \$12 billion, up 8.1% year-over-year, and a full \$580 million ahead of expectations.

Organic revenue was up 11% during the quarter, beating estimates by 4%. The company saw gains in Latin America (+20%), EMEA (+20%), North America (+9%), Bottling Investments (+18%), and Global Ventures (+9%). Volume was up 2%, while price and mix accounted for a 9% gain in the top line.

Operating income was up 6%, which included a 4% currency headwind. Comparable currency neutral operating income rose 13%, driven by organic revenue growth across all segments.

The company updated guidance for the full year of adjusted organic revenue growth of +10% to +11%, up slightly. In addition, full-year earnings-per-share is expected to be higher by 7% to 8%. We've updated our estimate of earnings-per-share to \$2.70 after terrific Q3 results.

#### Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$1.90	\$1.60	\$1.67	\$1.49	\$1.91	\$2.08	\$2.11	\$1.95	\$2.32	\$2.48	\$2.70	\$3.61
DPS	\$1.12	\$1.22	\$1.32	\$1.40	\$1.48	\$1.56	\$1.60	\$1.64	\$1.68	\$1.76	\$1.84	\$2.35
Shares <sup>1</sup>	4,402	4,366	4,324	4,288	4,259	4,250	4,314	4,323	4,325	4,328	4,330	4,340

Coca-Cola has experienced some years of stagnation in earnings-per-share, which declined from \$1.97 in 2012 and only reclaimed that high in 2018. However, now that the bulk of revenue declines have been absorbed from the bottling refranchising initiative, Coca-Cola's earnings growth should pick up in the coming years, as we are forecasting for 2023.

Moving forward, we are forecasting 6% annual earnings-per-share growth. Volume had been improving and pricing was strong prior to the COVID-19 pandemic, which could mean low single-digit revenue growth as conditions normalize. In addition, job cuts and other productivity measures produced very strong margin growth in 2017 and 2018, and we see this as a long-term tailwind. All this combined could produce 6% annual earnings-per-share growth moving forward. Of course, 2020 earnings were down due to lower away-from-home sales, but earnings rebounded sharply higher in 2021 and 2022, with more growth forecast for 2023. We note that 2023 results are looking better than this, but we are also cautious on future growth given the record base of earnings for 2023.

We also forecast the dividend rising somewhat slower than earnings, producing a payout of \$2.35 per share by 2028.

### **Valuation Analysis**

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	18.2	21.0	23.1	25.7	23.0	21.8	24.1	25.6	23.3	25.6	20.4	23.0
Avg. Yld.	2.7%	2.9%	3.2%	3.1%	3.2%	3.4%	3.1%	3.3%	3.1%	2.8%	3.3%	2.8%

Coca-Cola's price-to-earnings ratio has been rather volatile in the past decade and today it stands at 20.4. This compares slightly unfavorably to what we see as fair value at 23 times earnings, implying a fractional headwind to total returns moving forward if the valuation normalizes over a 5-year holding period. Meanwhile, Coca-Cola's dividend yield is currently 3.3% and the payout rises each year, offering a meaningful boost to total returns.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	59%	76%	79%	94%	77%	75%	76%	84%	72%	71%	68%	65%

The payout ratio has been in the mid-70% range for the past few years but is below that now with rising earnings. Dividend growth will remain a priority for management, and we see the payout as safe, with room to grow, particularly with generally improving free cash flow generation.

Coca-Cola's competitive advantages include its unparalleled suite of beverage brands, as well as its efficient global distribution network. Coca-Cola is also extremely resistant to recessionary environments, having increased its earnings-per-share during and after the financial crisis. The difference with the 2020 recession is that public venues have been closed, which disproportionately impacted Coca-Cola's results, even into 2021. This, however, appears to have ended.

### Final Thoughts & Recommendation

Our estimates of 6% earnings growth and a 2.5% valuation headwind, combined with the company's 3.3% dividend yield give expected total returns of 11.3% per year over the next five years. Coca-Cola could work for investors that are seeking a recession-resistant, higher-yielding consumer staple, and shares are now trading under fair value. We're boosting Coca-Cola to buy from hold after Q3 results.
