Overview & Current Events

Verisk Analytics, Inc. is an American multinational data analytics and risk assessment firm based in Jersey City, New Jersey, with customers in insurance, natural resources, financial services, government, and risk management sectors. The company uses proprietary data sets and industry expertise to provide predictive analytics and decision support consultations in areas including fraud prevention, actuarial science, insurance coverage, fire protection, catastrophe and weather risk, and data management. Through advanced data analytics, software, scientific research, and deep industry knowledge, Verisk empowers customers to strengthen operating efficiency, improve underwriting and claims outcomes, combat fraud, and make informed decisions about global issues, including climate change and extreme events, as well as political and ESG topics. The company has offices in more than thirty countries. Verisk has started and grown its dividend since 2019 and has a current market cap of \$34.4 billion.

On November 1st, 2023, the company reported third quarter results for Fiscal Year (FY) 2023. For the quarter, consolidated revenues reached \$677.6 million, marking an impressive 11.1% increase, and a notable 9.4% rise on an organic constant currency (OCC) basis. This growth can be attributed to the robust performance in underwriting and claims.

Income from continuing operations for the same period amounted to \$187.4 million, reflecting a substantial 13.1% increase. The adjusted EBITDA, a non-GAAP measure, also demonstrated positive momentum at \$366.0 million, marking a noteworthy 12.5% increase, and an 11.8% uptick on an OCC basis.

Diluted GAAP earnings per share from continuing operations (diluted EPS) for the third quarter of 2023 stood at \$1.29, showing a substantial growth of 22.9%. Meanwhile, diluted adjusted earnings per share (diluted adjusted EPS), another non-GAAP metric, reached \$1.52, indicating a significant increase of 26.7%. The growth in diluted adjusted EPS is attributed to the strong performance in revenue and profit, coupled with the favorable impact of the accelerated share repurchase program.

In terms of cash flows, net cash provided by operating activities amounted to \$250.1 million, reflecting a decrease of 10.7%, while free cash flow, a non-GAAP measure, was \$195.8 million, down by 8.7% for the third quarter of 2023. The decline in operating cash flow is attributed to lower tax payments in the preceding year and the fact that the operating cash flows for the prior year were not adjusted to separately disclose cash flows related to discontinued operations.

During the third quarter of 2023, a cash dividend of 34 cents per share was disbursed on September 30, 2023, and common shares amounting to \$49.8 million were repurchased. The Board of Directors has further approved a cash dividend of 34 cents per share, payable on December 29, 2023.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$2.21	\$2.40	\$3.09	\$3.11	\$3.74	\$4.11	\$4.38	\$5.04	\$5.31	\$5.76	\$5.75	\$8.85

Verisk Analytics, Inc (VRSK)

Updated November 18th, 2023 by Felix Martinez

The company has been growing earnings at a double-digit rate over the past ten years. Over the last ten years, earnings have grown by over 11.2% annually. However, earnings have been slowing down recently. For example, earnings have had a compound annual growth rate of 6.9% over the past five years. We also expect that earnings will be down for 2023. However, after 2023, we expect that the company will continue to grow its earnings at a 9% annual rate giving us earnings of \$8.85 per share in 2028. The company started to pay its dividend in 2019 and has increased its yearly with an average growth rate of 7.4%. The company can continue this growth rate as earnings will grow and because of the low dividend payout ratio.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	29.9	26.6	24.9	26.1	25.7	26.3	34.0	41.2	43.1	30.6	41.2	20.0
Avg. Yld.	---	---	---	---	---	---	0.7%	0.5%	0.5%	0.7%	0.6%	1.1%

The company has a high valuation currently. The company has a current PE of 41.2x earnings with only an expected annual earnings growth of 9% for the next five years. Because of the lower earnings growth, a fair multiple would be 20x earnings. We would see a multiple compression of (13.5)% over the next five years at the current price.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	---	---	---	---	---	---	22.8%	21.4%	21.8%	21.5%	24%	22%

The company's competitive advantage is its vast and diverse collection of proprietary data assets critical to its analytics and risk assessment solutions. These data assets are generated from various sources, including satellite imagery, insurance claims data, weather data, financial data, and more. The company's extensive data assets provide a significant competitive advantage as they allow Verisk Analytics to offer its customers unique insights and predictive analytics, enabling them to make informed decisions and manage risk effectively. The company's balance sheet is robust as it has a BBB credit rating by S&P. The company also has an interest coverage ratio of 8.9x, which is excellent. Verisk debt to equity ratio is 8.1.

Final Thoughts & Recommendation

The company has been growing earnings nicely over the past ten years. Over the long term, this growth will continue. However, at the current price, the stock is expensive. Over the next five years, we expect the company to provide a negative return of (4.8)%, primarily due to the current valuation. Thus, we rate the stock as a sell.
