Overview & Current Events

Dillard's is a department store company that sells fashion apparel, cosmetics and home furnishings through 290 stores and clearance centers. The company competes with larger peers such as Macy's and Kohl's. Dillard's was founded in 1938 and is headquartered in Little Rock, AR.

Dillard's reported its third quarter earnings results on November 9. The company reported that its revenues totaled \$1.5 billion during the quarter, which was 5% less than the revenues that the company generated during the previous year's quarter. The revenue performance was weaker compared to the smaller revenue decline Dillard's has experienced during the previous quarter, when sales were down 1% on a year-over-year basis. Dillard's revenue performance was slightly weaker than expected by the analyst community. A weakening economic picture hurts Dillard's revenue growth performance to some degree, which helps explain why revenues declined on a year-over-year basis.

The company reported a net profit of \$9.49 on a per-share basis for the third quarter. Unlike in the previous quarters, Dillard's was not able to grow its gross margin during the period. The company's gross margin contracted to 45.3% of sales, down slightly compared to the previous year's quarter. A declining share count had a positive impact on Dillard's earnings-per-share performance, but earnings-per-share still were down compared to the previous year's quarter.

Dillard had a strong 2021 primarily thanks to an exceptional second half, and 2022 was even better, being the strongest year in the company's history. With consumer sentiment weakening, it is expected that the coming years will be weaker, however, which is why our estimates see lower profits in 2023 and beyond.

Growth on a Per-Share Basis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
EPS	\$6.99	\$7.79	\$6.91	\$4.93	\$4.89	\$6.23	\$4.38	-\$2.80	\$40.67	\$50.81	\$41.80	\$43.93
DPS	\$0.22	\$0.24	\$0.26	\$0.28	\$0.34	\$0.40	\$0.50	\$0.60	\$0.80	\$0.80	\$1.00	\$1.28
Shares¹	44	41	36	32	28	27	25	22	19	17	16	12

Dillard's recovered quickly from the financial crisis. By 2010, earnings-per-share were above pre-crisis levels. For several years Dillard's produced strong growth rates, but starting in 2015, profits started to decline. Revenue growth has not been strong over the last decade; sales in 2018 actually were lower than sales in 2008. Dillard's profit growth in the early 2010s was primarily driven by margin expansion, as gross and operating margins rose substantially.

Following a very solid 2018, during 2019 the company had to battle with declining margins, which were the result of mark-downs, and headwinds from declining comparable store sales, which hurt the company due to negative operating leverage. Dillard's has returned a massive amount of cash to its owners via share repurchases in the past. The company's share count declined by more than 60% over the last decade, which has increased each share's portion of the company's earnings by a lot. 2020 was a very weak year for Dillard's, but 2021 and 2022 were highly successful. The forward outlook is more uncertain, but ongoing share repurchases should be beneficial for the company's earnings-per-share growth, which should help ease the headwinds that brick-and-mortar retailers will likely experience.

Valuation Analysis

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	Now	2028
Avg. P/E	12.1	13.8	14.7	13.4	11.6	9.6	16.7	NMF	6.0	6.4	8.2	10.0
Avg. Yld.	0.3%	0.2%	0.3%	0.4%	0.6%	0.7%	0.7%	1.0%	0.3%	0.2%	0.3%	0.3%

Dillard's valuation has not been especially high throughout much of the last decade, as the company's shares usually were valued at a low-double-digit price-to-earnings multiple. Right now, shares trade for around 8 times this year's estimated earnings-per-share. We believe that shares are trading below fair value today, which should have a positive impact on the company's total returns going forward.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2028
Payout	3.1%	3.1%	3.8%	5.7%	7.0%	6.4%	11.4%	NMF	2.0%	1.6%	2.4%	2.9%

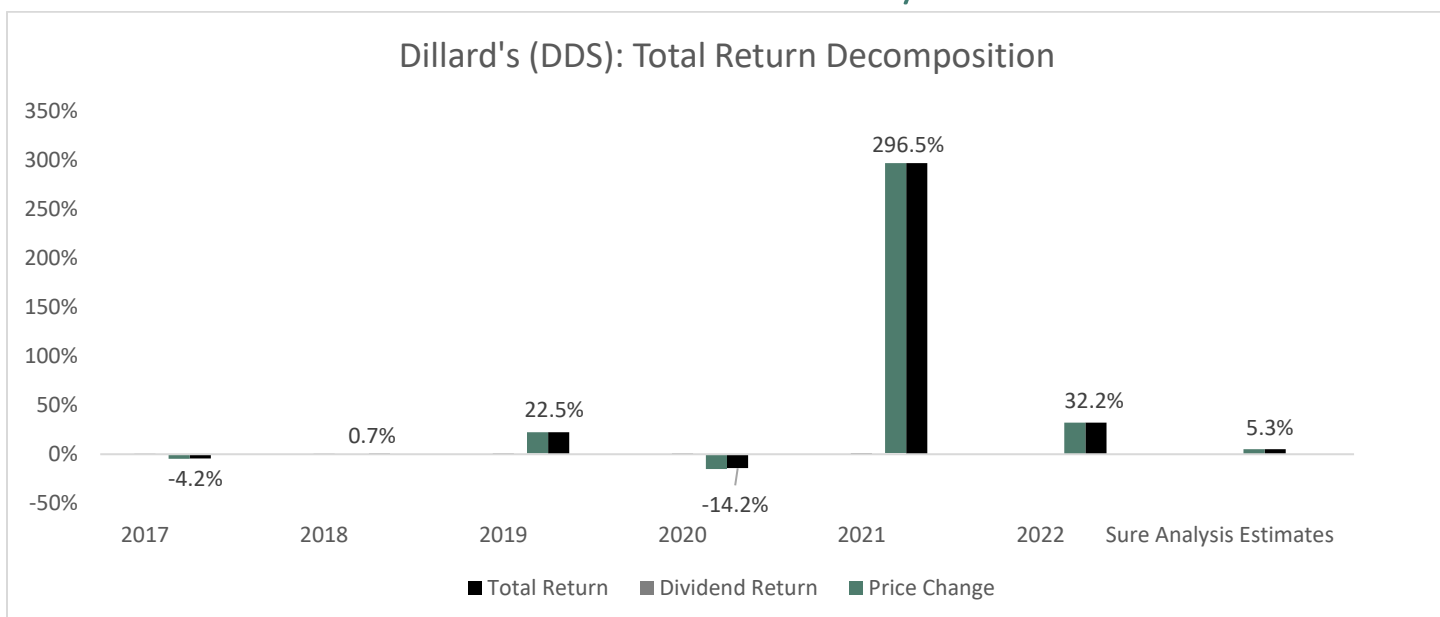

Dillard's pays out only a marginal amount of its net profits in the form of dividends to the company's owners. Management is much more focused on reducing the share count, which the company has done very successfully in the past. It is very likely that management will continue to prioritize buybacks over dividends going forward.

One advantage that Dillard's has over some of its competitors is that it is not only active in apparel and cosmetics, but also in home furnishings, which provides some diversification and makes it less reliant on the performance of apparel sales – which are more easily done online compared to furniture. Management has pointed out that furniture performed better than other categories in recent years. Dillard's is not a recession-resilient stock.

Final Thoughts & Recommendation

Dillard's is a rather small department store company that has a somewhat unique product portfolio, due to selling furniture and related items on top of the usual soft-line categories sold by most department store chains. The company rebounded massively in 2021 and 2022, and profits should remain well above pre-crisis levels this year. Forecasted returns are solid but not great, which is why we rate the stock a hold today.
