## Overview & Current Events

Community Bank System was formed in 1983 and since that time, it has expanded to become a diversified financial services company with more than 200 locations in the northeastern U.S. Its principal business is community banking, but it also owns a large benefits administration business, in addition to offering a variety of insurance products. Its market capitalization is \$2.6 billion, and it produces about \$720 million in annual revenue.

Community Bank posted fourth quarter and full-year earnings on January 23<sup>rd</sup>, 2024, and results were worse than expected. Adjusted earnings-per-share came to 76 cents, which missed estimates widely by eight cents. Revenue was \$177 million, flat year-over-year, and about a million dollars better than expectations.

Financial services revenue was \$49.5 million in the fourth quarter, up \$4.8 million or 11% year-over-year. For the year, total financial services revenue was \$197 million, up \$10 million, or 5% from 2022.

Total ending loans were \$9.7 billion, up \$255 million, or 2.7% from the prior quarter. For the year, total ending loans rose \$895 million, or 10% from 2022.

Total ending deposits were \$12.93 billion, down \$103 million from the prior quarter. For the year, deposits were down \$84 million, or 0.6%. Credit quality remains very strong, with annualized loan net charge-offs of 0.10% for the fourth quarter, and 0.06% for the year.

We start 2024 with an earnings estimate of \$3.20.

Earnings-per-share have been volatile in the past decade but in recent years, growth has been steadier. We see that continuing as the bank is focused on profitable growth, but we forecast -1% earnings-per-share growth annually. We are still cautious given interest rate headwinds present for the entire banking industry, which Community Bank System is suffering from as well. With few levers to pull to boost earnings growth, we think the bank will have a difficult time in the coming years growing from 2022 earnings.

Community Bank System continues to see earnings tailwinds from very low deposit funding costs and organic revenue growth, as well as a constant flow of acquisitions. Growth-by-acquisition is generally tough in the financial services industry, but Community Bank System has proven adept at executing this strategy over time, and this should be the primary growth driver going forward. Community Bank System is performing well, but its lending margins are already strong, so we think upside from there is somewhat limited. However, credit quality remains favorable. Even so, headwinds are still present and out of the bank's control to a large extent.

Dividend growth has been moderate, but management appears to be willing to pay out half of earnings or more on the dividend. We see modest dividend growth ahead given the pace of earnings growth.

## Valuation Analysis

| Year      | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | Now  | 2029 |
|-----------|------|------|------|------|------|------|------|------|------|------|------|------|
| Avg. P/E  | 16.5 | 17.0 | 18.9 | 17.8 | 18.3 | 19.5 | 18.5 | 21.1 | 17.6 | 15.6 | 15.3 | 14.0 |
| Avg. Yld. | 3.2% | 3.3% | 2.9% | 2.5% | 2.4% | 2.5% | 2.8% | 2.3% | 2.8% | 3.4% | 3.7% | 4.4% |

Community Bank System’s price-to-earnings multiple has moved around significantly in the past decade as its fortunes have improved and deteriorated. We have revised our target valuation to 14 times earnings given the sector is seeing much lower valuations applied by investors. We are forecasting an annual headwind to total returns in the coming years from the valuation. We see the dividend yield at 4.4% in five years, much higher than today as we see the stock’s valuation as declining over time.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

| Year   | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 | 2029 |
|--------|------|------|------|------|------|------|------|------|------|------|------|------|
| Payout | 51%  | 54%  | 53%  | 53%  | 45%  | 48%  | 51%  | 49%  | 49%  | 53%  | 56%  | 62%  |

We see the payout ratio remaining just over half of earnings for the foreseeable future. The bank’s impressive dividend streak appears to be safe at this point, and we see many more years of increases coming, even if a recession strikes. Growth rates should be low, however, due to low earnings growth and a payout ratio that is higher than most of its peers.

Community Bank System’s competitive advantage is in its dominant market position in many of its service areas. It competes in areas that have sparse levels of competition and thus the company is able to hold strong market share in those locations, with many at or above a third of total market deposits. That does not make it immune to recessions, but its strong performance means it can be an acquirer during downturns, softening the blow of economic weakness.

## Final Thoughts & Recommendation

Overall, Community Bank’s total returns face an uphill battle given lower sector valuations and modest growth outlook. We forecast total annual returns of 1.1%, and we’re moving the stock from hold to sell. The 3.7% yield is nice, but the valuation offers a 1.8% potential headwind, with a -1% projected growth rate.
