Overview & Current Events

Cboe Global Markets, Inc. is a large exchange holding company. It offers a diverse range of products in multiple asset classes, and operates in five primary business segments: Options, U.S. equities, futures, European equities, and global FX. Transaction & clearing fees (from contracts or shares traded on exchanges) composed 76% of 2023 revenues, and regulatory fees, market data, and connectivity fees are other revenue sources. After operating for most of its history as a non-profit, member-owned exchange company, the company became a for-profit corporation in 2006 and went public in 2010. Cboe Global Markets is a \$19.5 billion company and has about 1,200 employees.

On February 2nd, 2024, Cboe Global Markets released its released fourth quarter and full year 2023 results for the period ending December 31st, 2023. For the quarter, the company reported a record net revenue of \$499.0 million, which represents 9% growth compared with net revenue of \$457.1 million in the same quarter last year. Earnings per diluted share (EPS) reported for the same periods were \$1.98 and \$1.49 per share., respectively. For 2023, CBOE Global Markets reported a record diluted EPS of \$7.13, which marks a significant increase when compared to the EPS of \$2.19 in 2022.

The fourth quarter growth was driven by strong trading activity in Cboe's Derivatives Markets business and increased demand for data and access solutions. The derivatives market revenue increased by 15% year over year, the data and access solutions net revenue grew by 8%, and cash and cash and spot markets net revenue decreased by 14%. Adjusted operating income grew 11% year over year to \$307.3 million, and adjusted operating margin came in at 61.6%, which expanded 20 basis points (bps). Adjusted operating expenses were \$191.7 million, which increase 9% year-over-year, primarily due to higher compensation and benefits and technology support services. This was partially offset by a decline in other expenses, depreciation and amortization, and professional fees and outside services.

Cboe Global Markets' strategy is focused on increasing its addressable market and has three growth pillars, which are organic growth, M&A growth, and recurring revenue growth. Management reconfirmed the company's growth targets for 2024, targeting organic total net revenue growth in the range of 5% to 7%, and Data and Access Solutions organic net revenue growth of 7 to 10%. Adjusted operating expenses in 2024 are expected in the range of \$798 to \$808 million, compared to \$750.5 million in 2023.

growth rate targets. Looking forward, Cboe's ambitions and the medium-term growth rate target of 7% to 9% annually look realistic.

The company has been able to increase its yearly dividend payout for 14 consecutive years. Over the last five years, the average annual dividend growth rate is 10.4%. In August 2023, the quarterly dividend increased by 10% from \$0.50 to \$0.55 per share. As of December 31st, 2023, Cboe had \$384.0 million left under its current share repurchase authorization.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	24.4	25.5	29.2	25.6	28.7	32.4	22.8	23.3	18.9	23.3	22.0	25.0
Avg. Yld.	1.9%	1.4%	1.4%	1.1%	1.1%	1.2%	1.6%	1.6%	1.6%	1.3%	1.2%	1.0%

During the past decade shares of Cboe Global Markets have traded with an average price-to-earnings ratio of about 25.4 times earnings and today, it stands at 22.0. We are using 25 times earnings as a fair value baseline, implying the potential for a valuation tailwind. The company's dividend yield is currently 1.2%, which is nearly in-line with the average yield over the past decade of 1.4%.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	35%	36%	42%	28%	31%	40%	37%	37%	89%	31%	26%	26%

During the past five years, the company's dividend payout ratio has averaged around 35%. Cboe Global Markets' dividend is comfortably covered by earnings. Given the expected earnings growth, there is room for the dividend to continue to grow at the same pace and keep the payout ratio around the same levels which is safe.

Cboe Global Markets' ambition is to build one of the world's largest global derivatives and securities network. Cboe is well-positioned to execute this ambition by customer-led product and market innovation combined with superior technology. Furthermore, key industry trends such as globalization and the rise of the retail investors are supporting its growth ambition. Importantly, the company will continue to invest heavily in technological improvements and innovation to support its platforms and services.

Final Thoughts & Recommendation

Cboe Global Markets is one of the largest stock exchange operators in the United States and a global market leader for exchange-traded products trading. Cboe is a quality stock with an average dividend yield, but has a sound dividend payout ratio and a solid earnings-per-share growth forecast for the next several years. We estimate total return potential of 10.8% per year for the next five years based on a 7% earnings-per-share growth, a 1.2% yield, and a valuation tailwind. Shares earn a buy rating.
