Overview & Current Events

KLA Corporation is a supplier to the semiconductor industry. The company supplies process control and yield management systems for semiconductor producers such as TSMC, Samsung and Micron. KLA was created in 1997, through a merger between KLA Instruments and Tencor Instruments, and has grown through a range of acquisitions since then. The company is headquartered in Milpitas, CA.

KLA Corporation reported its second quarter (fiscal 2024) earnings results on January 25. The company reported revenues of \$2.49 billion for the quarter, which represents a decline of 16% compared to the prior year's quarter. This revenue decline was still stronger than what the analyst community had expected, as KLA's top line beat the analyst consensus by \$30 million. KLA's revenue decline can be explained by the fact that semiconductor companies have been investing less in new manufacturing capacity in the recent past.

KLA generated earnings-per-share of \$6.16 during its fiscal second quarter, which beat estimates by \$0.28, and which was down by 17% compared to the previous year's quarter. During the previous quarter, earnings-per-share had declined as well. KLA is guiding for revenues of \$2.3 billion for the current quarter and sees earnings-per-share of \$5.25.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$3.47	\$2.98	\$4.66	\$5.94	\$7.50	\$8.46	\$10.35	\$14.55	\$21.17	\$25.33	\$23.05	\$33.87
DPS	\$1.80	\$2.00	\$2.08	\$2.14	\$2.52	\$3.00	\$3.40	\$3.75	\$4.20	\$5.20	\$5.80	\$9.34
Shares³	165	158	156	157	156	156	156	155	149	138	135	125

KLA grew its earnings-per-share by ~20% annually between 2010 and 2021, although growth has been quite uneven. During 2009 the company reported net losses, and it has reported year-over-year earnings declines several times since then. Growth has seemingly stabilized during the last couple of years. From 2015 to 2019 the company reported strong results, and during fiscal 2020 the company hit new record profits.

KLA Corporation's earnings-per-share growth has historically come from a mix of revenue growth, margin improvements, and share repurchases. The revenue growth outlook remains strong, as KLA has been able to grow its sales considerably during the last couple of quarters. The majority of KLA's revenues come from product sales, but service revenues are becoming increasingly important. This is a positive in the long run, as a higher rate of recurring service revenues should help KLA's top line become less cyclical.

The semiconductor industry profits from massive tailwinds such as the Internet of Things, big data, autonomous driving, and cloud computing. These trends drive demand for chips, which means that companies such as Samsung and TSMC are increasing capacity to be able to meet demand, which fuels their demand for KLA's products. Global memory markets recovering from a period of low prices helps KLA. KLA has also made several acquisitions in the past, which have added to its growth, such as the \$3.4 billion takeover of Orbotech.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	18.2	22.8	13.6	14.1	13.6	14.4	18.7	22.1	15.2	19.1	26.7	18.0
Avg. Yld.	2.8%	2.9%	3.3%	2.5%	2.9%	2.5%	1.8%	1.2%	1.3%	1.1%	0.9%	1.5%

KLA currently trades at 27 times net earnings, based on estimates for the current fiscal year, which is substantially higher than our fair value estimate. We believe that shares have significant downside potential towards a price to earnings multiple of around 18, which would be more in-line with how KLA Corporation was valued in the past.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	51.9%	67.1%	44.6%	36.0%	33.6%	35.5%	32.9%	25.8%	19.8%	20.5%	25.2%	27.6%

KLA did not raise its dividend during the last financial crisis, but since then the dividend has been raised very consistently. KLA was not profitable during 2009, but the company chose to maintain its dividend nevertheless. The payout ratio looks highly sustainable, although the cyclical nature in KLA's earnings could make the payout ratio rise substantially during another global economic downturn that hurts chip markets massively.

KLA is a key supplier to the largest semiconductor companies, and therefore a relevant part of this large industry that is extremely important to our modern way of life. KLA is the market leader in the process control sector. Its scale and size give it advantages over competitors when it comes to receiving big contracts, and through better economies of scale, KLA also has the ability to achieve higher margins than smaller peers. KLA's business is cyclical, as lower spending by semiconductor manufacturers during market downturns hurts KLA.

Final Thoughts & Recommendation

As an important supplier to the global semiconductor industry, KLA benefits from megatrends that increase worldwide demand for chips, such as Artificial Intelligence. KLA should be able to capitalize on these trends by growing its earnings-per-share meaningfully in the future. Because shares trade well above fair value, the total return outlook is unfortunately far from strong today. We rate KLA Corporation a sell at current prices.
