Overview & Current Events

NACCO Industries is a holding company for The North American Coal Corporation, which incorporated in 1913. The company supplies coal from surface mines to power generation companies. NACCO Industries is the largest lignite coal producer in the U.S. and ranks among the top ten of all coal producers. NACCO Industries operates in the states of North Dakota, Texas, Mississippi, Louisiana and on the Navajo Nation in New Mexico. The company produces annual revenues of ~$250 million. The company has been very active in purchasing and spinning off a wide variety of businesses in its history. In 1988 and 1990, NACCO Industries made several purchases that expanded the business to include housewares. In 2012, NACCO Industries spun off its Materials Handling Group (a combination of Yale Materials Handling Corporation and the Hyster Company). The company spun off its housewares-related business on September 29th, 2017.

On May 18th, 2023, NACCO Industries raised its quarterly dividend 4.8% to $0.2175.

On March 6th, 2024, NACCO Industries announced fourth quarter and full year results for the period ending December 31st, 2023. For the quarter, revenue of $63.9 million was up slightly from $63.5 million in the prior year. Earnings-per-share was a loss of $5.88 compared to $1.84 in the fourth quarter of 2022. For the year, revenue grew 1% to $244 million while earnings-per-share was a loss of $5.29 per share compared to $10.06 in 2022.

Quarterly results were significantly impacted by a non-cash asset impairment charge of $65.9 million that was due to unplanned outages at a power plant. Coal revenue declined 21% to $19.8 million while total tons delivered also fell 21%. Unconsolidated coal deliveries were down 22% to 4.8 million tons while consolidated coal deliveries decreased 16% to 686K tons. Deliveries from the North American Mining segment declined 7.4% to 12.5 million tons while revenue improved 43% to $26.5 million. Mineral Management revenue was lower by almost 50% to $9.8 million due to much lower natural gas and oil prices.

The company expects to generate positive net income in 2024 following a steep decline in earnings-per-share in 2023. We have assumed earnings power of $3.00 for this year.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	$3.98	$3.13	$4.32	$4.14	$5.00	$5.66	$2.10	$6.69	$10.06	-$5.29	***$3.00***	***$3.00***
DPS	$1.02	$1.05	$1.07	$0.98	$0.66	$0.76	$0.77	$0.79	$0.82	$0.86	***$0.87***	***$1.11***
Shares[1]	7	7	7	7	7	7	7	7	7	8	***8***	***8***

Because NACCO Industries spun off its Materials Handling Group in 2012, it is not appropriate to compare today's company to the pre-spinoff equivalent. NACCO saw its earnings per share decline 6.5% per year through 2017. NACCO has shown mostly negative growth since 2012 and volatile earnings-per-share since. Due to much lower EPS estimates for the year, we now expect flat earnings growth through 2029. Adjusting for its spin-off history, NACCO Industries has raised its dividend for 38 consecutive years. We expect a dividend growth rate of 5% going forward.

NACCO Industries (NC)

Updated March 12th, 2024 by Nathan Parsh

NACCO Industries does have some opportunity for growth. For example, the company entered into an agreement in Q2 2020 to become the exclusive contract miner for the Thacker Pass lithium project in northern Nevada. Construction commenced on March 2nd, 2023 with the production of lithium still expected to begin in the second half of 2026.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	13.8	16.8	14.5	18.2	8.7	8.3	12.5	5.4	3.6	---	***10.0***	***9.0***
Avg. Yld.	1.9%	2.0%	1.7%	1.3%	1.8%	1.6%	2.9%	2.2%	2.3%	2.4%	***2.9%***	***4.1%***

Shares of NACCO Industries down $4, or 11.8%, since our November 6th, 2023 report. Focusing on just the 2018 to 2022 period, NACCO Industries shares have traded with an average price to earnings multiple of 7.7. This is below the stock's current multiple of 10x our expected earnings power. Investors are just not willing to pay for a company that has an issue growing earnings consistently. NACCO Industries needs to prove it can reliably grow earnings-per-share before it receives a higher multiple. We maintain our 2029 P/E target of 9. If achieved, valuation would reduce annual returns by 2.1% over the next five years.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	26%	34%	25%	24%	13%	13%	37%	12%	8%	---	***29%***	***37%***

The previous version of NACCO Industries actually saw earnings improve during the last recession, but this is not the same company. NACCO Industries now sees a substantial portion of revenues from coal. As demand for coal fluctuates, so will the company's ability to produce revenue. The company has also kept its payout ratio low in recent years, which is a prudent decision by management as earnings-per-share continues to drop. NACCO Industries' primary competitive advantage is that it does not acquire existing coal mines or mining companies, as this would increase its leverage position. Instead, NACCO Industries focuses on reducing coal production costs and maximizing efficiency and operating capacity at the mine locations.

Final Thoughts & Recommendation

After fourth quarter results, NACCO Industries is expected to return 1.3% annually through 2029, compared to a prior estimate of a loss of 7.5%. This projected return stems from a starting dividend yield of 2.9% off set by a low single-digit headwind from multiple contraction. A power outage and weaker demand for oil and natural gas has greatly impacted results. We have raised our five-year price target $9 to $27, but continue to view shares of NACCO Industries as a sell due to projected returns. We note again that only investors with a high tolerance for risk should consider owning the name due to the stock's volatile performance.
