Overview & Current Events

Star Group, L.P. (SGU) is a home heating oil and propane distributor and services provider. The company was founded in 1995 as Star Gas Partners, L.P., and changed its name to Star Group, L.P. in October 2017. The company's Petro Holdings subsidiary provides heating oil and propane to 416,000 US Northeast and Mid-Atlantic customers. In addition, the company also sells diesel and gasoline to customers across the United States. Star Group, L.P. is the nation's largest home heating oil retail distributor, giving it a competitive advantage. The company has a strong market position in the home heating oil and propane distribution industry and has maintained a steady market share in recent years. The company operates in two revenue segments: Home Heating Oil and Propane and Other Products and Services, including commercial heating and HVAC services, equipment installations, and repair and maintenance services.

On February 7th, 2024, the company announced its Q1 results for the fiscal year 2024, reporting non-GAAP EPS of \$0.32. The company reported revenues of \$528.09 million for the quarter, down 18.5% year-over-year.

Star Group reported its fiscal Q1 2024 results, highlighting a decrease in total revenue by 18.5% to \$528.1 million from the previous year, primarily due to a 10.2% drop in home heating oil and propane volume sales influenced by warmer weather and customer attrition. Despite this, the company managed to maintain its Adjusted EBITDA at \$49.0 million, nearly unchanged from the prior year, thanks to an improved per-gallon margin and reduced operating costs. Net income slightly declined by \$0.6 million to \$13.0 million. CEO Jeff Woosnam emphasized the challenges faced and the strategic responses, including cost discipline and strategic acquisitions, particularly in the Long Island market, aimed at strengthening the company's presence. Star Group remains committed to leveraging its market position and diversified services to navigate future challenges, with further discussions planned in an upcoming webcast and conference call.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$0.57	\$0.59	\$0.70	\$0.46	\$0.89	\$0.35	\$1.07	\$1.82	\$0.85	\$0.81	\$0.90	\$1.09
DPS	\$0.35	\$0.37	\$0.40	\$0.43	\$0.46	\$0.49	\$0.52	\$0.56	\$0.60	\$0.64	\$0.65	\$0.79
Shares³	57.5	57.3	57.0	55.9	54.8	50.8	45.7	40.6	37.4	35.7	27.5	21.2

Despite rising share prices and profits, the situation for Star Group is difficult due to rapidly rising commodity prices and a decline in client base. The financial success of Star Group depends heavily on the weather, which is directly correlated to its performance. In addition, Star Group has suffered because of the influence of the war in Ukraine on rising energy commodity prices. The variation in the price of the underlying commodity itself is typically what causes SGU's free cash flow to fluctuate since the company must use more working capital to purchase inventory when oil prices are higher.

Considering the seasonality of this business and the limited growth prospects of the industry, we forecast an EPS of 4.0%, in line with the company's historical averages. The consistent share count reduction throughout the past years has decently rewarded investors with higher earnings yield. Therefore, the company will continue its share repurchase

¹ The ex-dividend date is estimated based on historical data.

² The dividend payment date is estimated based on historical data.

³ Shares in millions.

program at the same pace, leading to our EPS estimate of \$1.09 by 2029. Star Group's DPS had a 10-year and five-year CAGR of 6.9% and 18.0%, respectively. Its stock offers a fair dividend yield and consistent buybacks that significantly reduce the number of outstanding shares.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	10.2	12.8	11.8	16.6	15.0	11.9	10.2	14.3	8.9	12.3	11.1	12.0
Avg. Yld.	5.8%	4.5%	4.5%	4.1%	4.8%	5.1%	5.8%	5.3%	6.1%	5.2%	6.5%	6.0%

Star Group is trading at a forward P/E of 11.1, higher than its ten-year and five-year average P/E of 12.4 and 11.5, respectively. Considering the seasonality of Star Group's industry, we believe a P/E of 12.0 better reflects the company's risk/reward profile, suggesting a target price of \$13.10 that is above the stock's current levels.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	61%	63%	57%	93%	52%	140%	49%	31%	71%	79%	72%	72%

The domestic home heating market is incredibly fragmented, and SGU has the choice to counteract the ongoing attrition of customers by making selected acquisitions of rival businesses. Since the rivals are mainly small firms, SGU can be selective at good valuation points. Moreover, Star Group, L.P. is relatively leveraged, with a total debt-to-equity ratio of 92.43%, cash reserves of \$45.19 million, and total debt of \$243.75 million. Lastly, the company relies on rolling lines of credit to cover financial deficits as commodity prices increase, product utilization reduces, and net consumers shrink. SGU is considered a prominent player in the sector, and its size gives the company a substantial competitive advantage. The acquisition strategy will support its growth and dominance in the sector by buying smaller firms during bad times.

Final Thoughts & Recommendation

The amount of oil and gas consumers use will decrease as the temperature warms, and revenue will decline over the next several quarters. While the company has little control over pricing volatility or the environment, it is making great efforts to create value, boost customer loyalty, and save costs overall. The strong pullback provides investors with an attractive entry point premised upon the 10.9% annualized total returns for the medium-term, derived from the forecasted earnings-per-share growth of 4.0%, that starting yield of 6.5%, and a valuation tailwind.
