Overview & Current Events

Associated Banc-Corp (ASB) is a diversified bank holding company. Through its subsidiaries, it provides banking and nonbanking products and services to individuals and businesses, primarily within its three-state branch footprint of Wisconsin, Illinois, and Minnesota. It is Wisconsin's second-largest bank with \$41 billion in assets and more than 200 offices. Half of its loans are in its home state, followed by 20% and 15% in neighboring Illinois and Minnesota, respectively. The rest are among 40 other states. About 30% of its portfolio is commercial real estate and construction loans. General commercial loans, home equity lines, and residential mortgages account for roughly 25%, 20%, and 20%, respectively. ASB is a \$3.3 billion company and has about 4,200 employees.

On April 25th, 2024, Associated Banc-Corp released its first quarter 2024 results for the period ending March 31st, 2024. For the quarter, the company reported net income of \$78 million compared to a loss of \$92 million in the preceding quarter and earnings of \$100 million in the same quarter last year. Earnings per diluted share for the same periods were -\$0.52, -\$0.62, and \$0.66 respectively.

Associated Banc-Corp recovered from the previous quarter's loss, driven by robust growth in loans and deposits, and an improved net interest margin. However, the company faced challenges with a slight year-over-year decline in net income and a modest increase in credit loss provisions. Both loans and deposits showed healthy growth, as total period-end loans increased by \$278 million and deposits rose by \$267 million, with core customer deposits increasing notably by \$557 million. Net interest income increased to \$258 million, up by \$4 million, with a 10 basis points rise in net interest margin to 2.79%, indicating better profitability from lending activities. Noninterest expense decreased by \$42 million to \$198 million, primarily due to the absence of significant one-time items that impacted the previous quarter. There was a slight increase in the provision for credit losses, up by \$3 million to \$24 million, indicating a cautious approach to potential credit risks. The CET1 capital ratio remained strong at 9.43%.

The outlook for 2024 includes expectations of continued loan growth between 4% to 6%, core customer deposit growth of 3% to 5%, and net interest income growth of 2% to 4%. The company also anticipates a slight decrease in noninterest income by 0% to 2% and expects noninterest expenses to grow by 2% to 3%. The effective tax rate is projected to be between 19% and 21%.

Growth on a Per-Share Basis

The company has grown earnings by -0.3% per year over the past decade and 2.4% over the past five years. We expect earnings to increase by 6% per year for the next five years. This is based on the assumption of net interest income growth, supported by loan and deposit growth. The company has been able to increase its yearly dividend payout for 13

¹ In millions.

consecutive years. Over the last five years, the average annual dividend growth rate is 7.3%. In October 2023, the company increased its quarterly dividend by 4.8% from \$0.21 to \$0.22 per share.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	15.3	15.9	15.1	16.1	13.5	11.1	8.1	9.8	9.8	9.9	10.2	10.0

During the past decade shares of Associated Banc-Corp have traded with an average price-to-earnings ratio of 12.5 times earnings and today, it stands at 10.2. We are using 10.0 times earnings as a fair value baseline, implying the potential for a small valuation headwind. The company's dividend yield is currently 4.0%, which is above the average yield over the past decade of 2.9%.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	32%	34%	36%	33%	33%	36%	39%	35%	35%	78%	41%	45%

During the past five years, the company's dividend payout ratio has averaged around 39%. Associated Banc-Corp's dividend is comfortably covered by earnings. Given the expected earnings growth, there is room for the dividend to continue to grow at least at the same pace and keep the payout ratio around the same levels which is safe.

The bank is well-positioned to continue its loan growth this year. ASB's lending capabilities has expanded in recent quarters through its new auto finance, equipment finance and asset-based lending verticals. Next to this "growth-focused" strategy, the bank planned a \$50 million investment over the next five years called "Digital Forward" improving its digital capabilities and processes. This should result in a growing net interest margin, improved efficiency ratio, and expanding operating leverage. The company launch a new Mass Affluent initiative in 2023 to reach a core customer deposit growth between 3% and 5%, which resulted in \$300m growth in the last quarter of 2023. The bank plans to launch 15 new consumer and business products, along with digital initiatives, in order to drive deposit acquisition and retention in 2024, with 4 of them already launched. The bank's shares have come under selling pressure since the banking crisis emerged in the spring 2023, but have recovered most of the losses.

Final Thoughts & Recommendation

Associated Banc-Corp (ASB) is a regional bank with a solid earnings-per-share track record and an above average dividend yield of 4.0%. The bank should benefit from higher interest rates and its strategy to grow loans and become more digital. We estimate total return potential of 9.3% per year for the next five years, based on 6% earnings-per-share growth, the dividend, and a valuation headwind. The coming year(s) could be a bumpy road for regional bank stocks. Shares earn a hold rating due to projected returns.
