Overview & Current Events

KKR Real Estate Finance Trust is a real estate finance company that engages primarily in originating and acquiring transitional senior loans secured by institutional-quality commercial real estate (“CRE”) properties. These senior loans are originally owned and operated by experienced and well-capitalized sponsors located in liquid markets with strong underlying fundamentals. The company has a \$7.5 billion purpose-built portfolio of senior loans that is primarily secured by multifamily and office properties owned by high-quality sponsors. KREF generates around \$182 million in net interest income and is headquartered in New York, New York.

On April 23rd, 2024, KREF reported its Q1 results for the quarter ending March 31st, 2024. For the quarter, total net interest income fell by 16% year-over-year to about \$39.1 million, as interest expenses advanced while interest income declined. During the quarter, the company funded \$103.5 million for loans closed in previous quarters.

Distributable earnings came in at about \$26.7 million, or \$0.39/share, versus \$33.1 million, or \$0.48/share last year. For quarter, the company 97% of interest payments due on its loan portfolio, which, according to management, now has a weighted average risk rating of 3.2 (on a five-point scale).

The company’s floating rate loan portfolio is now benefiting from rising rates amid a rotation out of higher rate-floor loans. Still, the underlying borrowers are struggling, with this year’s notable default eroding KREF’s financials. For FY2024, we continue to forecast DEPS of \$1.15.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
DEPS¹	---	\$1.95	\$1.61	\$1.30	\$1.58	\$1.67	\$1.95	\$1.63	\$1.62	\$0.83	\$1.15	\$1.24
DPS	---	\$0.73	\$1.22	\$1.62	\$1.69	\$1.72	\$1.72	\$1.72	\$1.72	\$1.72	\$1.00	\$1.00
Shares²	---	8.6	19.3	45.3	55.1	57.4	55.6	59.4	67.6	69.1	69.4	90.0

Since the company’s IPO, KREF has rapidly grown its loan portfolio by borrowing at lower rates and issuing shares with a lower cost of equity than the spreads it receives as net interest income from its loan portfolio. The previously low-rate environment constituted a fantastic environment for KREF to leverage its world-renowned manager’s (KRR) access to low-cost financing. The company’s term loan financing facilities also provide KRR matched-term financing on a non-mark-to-market and non-recourse basis. Hence, not only is the company borrowing on the cheap and securing better credits due to its manager’s reputation but also, its liability structure is resilient from a mark-to-market viewpoint. This enhances KREF’s ability to manage risk and its liquidity position during less favorable market cycles. While the strategy has worked successfully so far, KREF’s future profitability is susceptible to changes in interest rates, with 100% of its portfolio attached to floating rates. Based on its current portfolio composition, a 0.5% and a 1.0% increase in one-month SOFR would boost the quarterly net interest income per share by \$0.02 and \$0.03, respectively. Thus, the ongoing rising-rates environment could benefit KREF, assuming its own financing remains cheap. Consequently, we are forecasting a

¹ Distributable earnings per share modify GAAP net income (loss) by excluding (i) non-cash equity compensation expense, (ii) depreciation and amortization, (iii) any unrealized gains or losses. It’s a proxy of dividend coverage for income-oriented investors.

² Share count is in millions.

KKR Real Estate Finance Trust Inc. (KREF)

Updated April 24th, 2024 by Nikolaos Sismanis

modest earnings growth ahead of 1.5% per annum. The most recent dividend cut illustrates the notable risks associated with mortgage REITs, whose earnings can be easily compressed. We expect no dividend growth ahead while KREF tries to find its footing following last year's notable client default.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/DE	---	---	---	16.2	12.7	11.7	9.0	13.0	11.1	14.9	8.5	8.5
Avg. Yld.	---	---	---	7.7%	8.5%	8.8%	9.8%	8.1%	9.6%	13.9%	10.2%	9.5%

KREF has historically traded with an average price-to-distributable earnings ratio of 12.6. We believe that investors are most likely to value KREF based on its underlying yield and book value due to the company's business model. The recent dividend cut led to a significant drop in share prices, resulting in a renewed high yield. Additionally, the balance sheet suffered from \$73.7 million in write-offs last year, contributing to the share price decline. As of the quarter's end, the company's book value per share stands at \$15.18, indicating a trading discount of over 35% to NAV. Despite this, we expect a heavy discount to be sustained due to diminishing trust in the stock following the recent dividend reduction and investor skepticism towards KREF's borrowers.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout		37%	76%	125%	107%	103%	88%	106%	106%	207%	87%	81%

KREF's reduced dividend, though supported by current distributable net income, lacks high reliability. Further, despite positive factors like management by KRR with \$553 billion in assets, and a skilled team of 150+ professionals, KREF faces intense competition in the mortgage industry. Additionally, a recession or higher interest rates pressuring borrowers may adversely affect scheduled collections and investing spreads. Overall, KREF is a quality company in the space, but operates in a very risky industry.

Final Thoughts & Recommendation

We forecast annualized returns of 9.7% in the medium-term for KREF, powered by its 10.2% yield, our growth estimates, and relatively stable valuation assumptions ahead. Following the recent dividend cut, distributions are likely to remain covered, offering investors a notable yield. However, we remain skeptical of its future prosperity. Shares earn a hold rating. We caution that investors need to be wary of the risks attached to mortgage REITs, nonetheless.
