Overview & Current Events

American Electric Power was founded in 1906 and has evolved its business model along with changing technologies to offer customers safe, reliable, and affordable energy. It is one of the largest regulated utilities in the United States and offers electricity generation, transmission, and distribution services in 11 states. Its energy sources are coal, natural gas, renewables, nuclear, and demand response.

American Electric Power (AEP) released its first-quarter 2024 earnings, reporting GAAP earnings of \$1 billion or \$1.91 per share, compared to \$397 million or \$0.77 per share in the first quarter of 2023. Operating earnings for the same period were \$670 million or \$1.27 per share, up from \$572 million or \$1.11 per share in the first quarter of 2023. Operating earnings, a non-GAAP measure, exclude special items, with the variance between GAAP and operating earnings largely attributed to an adjustment for transitioning to a standalone rate making for deferred taxes. Ben Fowke, interim CEO and president, emphasized AEP's solid quarterly earnings despite mild weather conditions, highlighting the company's investments in a modern, reliable grid to serve customers and communities while maintaining affordability. He noted a 10.5% year-over-year growth in commercial load, driven by strategic economic development efforts supporting growth in communities. AEP's transmission network attracted significant investment from data centers and commercial/industrial customers, particularly in Indiana, Ohio, and Texas. Fowke outlined progress in executing a robust capital plan, with significant investments planned for grid hardening and renewable energy expansion. Additionally, he mentioned the sale of New Mexico solar assets and ongoing efforts to conclude the AEP Energy retail and AEP OnSite Partners distributed resources businesses sale process. Fowke highlighted AEP's commitment to cost management and outlined steps, including a voluntary workforce reduction program, to mitigate inflation and interest rate impacts, ensuring affordability for customers amid infrastructure investments.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$3.34	\$4.17	\$1.24	\$3.88	\$3.97	\$4.19	\$4.44	\$4.74	\$5.09	\$5.25	\$5.59	\$7.30
DPS	\$2.03	\$2.15	\$2.27	\$2.39	\$2.48	\$2.74	\$2.84	\$3.00	\$3.17	\$3.37	\$3.52	\$4.55
Shares³	489.4	491.1	491.7	492.0	493.2	494.2	496.6	504.2	513.9	526.2	527.1	520.0

One of AEP's major growth drivers moving forward will be its ambitious plans for its renewable power business, as it plans to install 3.9 GW of solar and 4.4 GW of wind power by 2030. A significant sign of its intent to become a major player in the renewable space was its acquisition of Sempra Energy's renewable business, which includes joint ownership of 7 wind farms and 1 battery installation. This deal, combined with the Santa Rita wind project in Texas, will nearly quadruple AEP's renewable portfolio from its current size, with plans to grow it by another four times of its pro-rata size (nearly 16 times its current size) by 2030. The other major growth driver for the company will be its transmission business. Given its large footprint and execution experience, AEP should be well positioned to capitalize on

the aging infrastructure in this space and grow considerably. Management is guiding for a long-term growth rate target of 5%-7%, projecting its confidence in executing on its growth initiatives. While its renewables and transmission programs do seem ambitious, the company's low ROIC has led to a 10-year earnings-per-share compound annual growth rate in the low single digits. Since the current dividend payout ratio is in the company's long-term payout ratio target range, we assume the dividend will continue to grow. For the next half-decade, we expect 5.5% annualized growth.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Avg. P/E	18.1	14.8	50	17.9	18.6	20.5	19.6	18.1	17.5	14.2	16.4	15.0
Avg. Yld.	3.40%	3.50%	3.70%	3.40%	3.40%	3.20%	3.30%	3.50%	3.60%	4.70%	3.8%	4.2%

Given the choppiness of AEP's earnings, and in particular, the abnormal results in 2016, the ten-year average price-to-earnings ratio is not necessarily a good indicator of fair value for this company. However, other than the 2016 outlier, we can see that its current multiple is on the low end of its historical valuation range. Given that interest rates are elevated right now, we view it as trading slightly above fair value right now.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	61%	52%	183%	62%	62%	65%	64%	63%	62%	64%	63%	62%

AEP benefits from government-granted exclusive rights and rates that give them service-territory monopolies. AEP also benefits from large scale, which increases its efficiency as its network grows larger. The main risks and catalysts for AEP involve weather, the timeliness and outcomes of regulatory rate decisions, and development execution uncertainty. The good news is that AEP has diversification across numerous states, somewhat mitigating its weather and regulatory risks. Additionally, its aggressive expansion into green energy projects helps offset some of the potential regulatory risks to its traditional energy businesses, such as coal. Another positive is that the business is quite recession resistant. While revenues and profits dipped from 2008-2009, the dividend was maintained comfortably, and the company's results rebounded strongly in 2010. The balance sheet may not look pretty based on traditional metrics, but the steady cash flow of the business is such that it is actually quite resilient.

Final Thoughts & Recommendation

AEP is a solid dividend growth stock with a recession-resistant business model. It can serve as a nice portfolio diversifier, especially for those trying to be more defensive. Given its 3.8% dividend yield and 5.5% expected annualized earnings-per-share growth rate, the stock should produce 7.3% annualized total returns over the next half-decade. As a result, we rate it a Hold.
