Overview & Current Events

Avnet Inc. (AVT) is a global distributor of electronic components and technology solutions, connecting semiconductors and other components suppliers to customers in 140 countries. Avnet is the third-largest semiconductor distributor in the world and the largest for European chip distribution. The company has two main operating segments: the Electronic Components segment, which sells electrical components, semiconductors, interconnect, passive and electromechanical components, and the Farnell segment, which sells kits, tools, test measurement, and electronic components. The Electronic Components segment is the primary segment of the company, constituting 92.6% of 2022 sales, while the Farnell segment's contribution to sales was ~7.4%. The company operates across the Americas, Europe, the Middle East, Africa (EMEA), and Asia/Pacific regions.

On May 1st, 2024, Avnet announced Q3 2024 results, reporting non-GAAP adjusted diluted EPS of \$1.10 for the quarter, what missed estimates by \$0.03. Avnet continued to create better value for customers and suppliers, which helped reduce expenditures, make its working capital more effective, and increase shareholder returns.

CEO Phil Gallagher noted the performance was aligned with expectations despite economic challenges and reduced market demand. The company's counter-cyclical balance sheet measures began to show benefits, contributing to a robust cash flow from operations nearing \$500 million this quarter. Avnet's focus remains on enhancing customer and supplier value, reducing costs, optimizing working capital, and driving shareholder returns.

Key financial metrics for the quarter included a decrease in operating income margin to 3.4% from 4.8% last year, with an adjusted operating income margin of 3.6%. The Electronic Components segment reported an operating margin of 4.1%, and the Farnell segment posted a 4% margin. Over the trailing twelve months, cash flow from operations totaled \$650 million. Finally, the outlook for the fourth quarter remains challenged.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$4.24	\$4.49	\$4.22	\$3.24	\$3.55	\$4.11	\$2.02	\$2.70	\$6.93	\$8.37	\$5.06	\$6.46
DPS	\$0.15	\$0.16	\$0.17	\$0.18	\$0.19	\$0.20	\$0.21	\$0.21	\$0.26	\$1.16	\$1.24	\$1.58
Shares¹	138.3	134.5	127.4	123.1	115.8	104.0	98.8	99.6	97.3	97.3	93.6	77.0

Avnet has suffered some recent setbacks that have hurt its profitability and EPS growth. Starting in 2016, the company suffered from a failed implementation of a new ERP system in North America that has prolonged impacted the firm's profitability and efficiency. Management's mistakes and poor execution are reflected in the financials as the EPS dropped from \$4.49 in 2015 to \$2.02 in 2020. However, the company experienced significant EPS and profitability growth in 2022.

We expect the company to continue its growth, but at a moderate pace, since despite the operational challenges, the company has a robust business model and will continue to do well in the coming years. The company has consistently reported double-digit revenue growth and has surpassed market expectations on EPS. Therefore, we used the midpoint of analysts' EPS estimates of \$5.06 for 2024 and expect an annual EPS growth rate of 5.0% over the next five years, leading to our estimated EPS of \$6.46 by the end of the fiscal year 2029. Finally, we expect the company to maintain a healthy dividend distribution and forecast a dividend payment of \$1.58 in 2029.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	9.8	9.7	10.0	13.2	11.4	10.5	18.1	12.9	291.8	5.1	10.7	8.0
Avg. Yld.	0.3%	0.4%	0.4%	0.4%	0.5%	0.5%	0.7%	0.5%	0.6%	2.5%	2.3%	3.1%

Avnet currently trades at a forward P/E of 10.7, lower than its normalized long-term 10-year average P/E of 11.2 and five-year average P/E of 11.7. Even though the company operates in the cyclical sector and earnings growth has not consistent, we believe it will continue to benefit from robust demand for its products in the communication and defense market. Hence, a P/E ratio of 8.0 would be a fair reflection of the business, in our view, which will result in a five-year price target of \$52.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	4%	4%	4%	6%	5%	5%	10%	8%	4%	14%	25%	25%

Avnet holds a competitive advantage as a global distributor of electronic components and solutions, benefiting from a vast network and industry expertise. Its recession performance has historically demonstrated resilience due to its diversified customer base spanning various sectors. However, its debt levels have fluctuated, impacting financial flexibility. Overall, AVT's competitive positioning and adaptable business model contribute to its stability during economic downturns, although debt management remains crucial for sustained growth. Avnet has paid increasing dividends over the past 11 years, with the payout ratio averaging 6.3%. The company has also been committed to increasing shareholder value by delivering a reliable dividend and continued share repurchases. Finally, during Q3, Avnet returned \$28 million to shareholders through dividends.

Final Thoughts & Recommendation

Although Avnet has suffered from implementation failures that have impacted its efficiency and profitability, the company remains the third-largest chip distributor globally. Moreover, it holds the top market share in Europe. However, we revised our rating to sell premised on the 1.8% annualized total returns projected for the medium-term, derived from the forecasted earnings-per-share growth of 5.0% and a dividend yield of 2.3%, and multiple compression.
