## Overview & Current Events

Carlisle Companies is a diversified company that is active in a wide array of niche markets. The segments in which the company produces and sells products include construction materials (roofing, waterproofing, etc.), interconnecting technologies (wires, cables, etc.), fluid technologies, and brake & friction. Carlisle Companies was founded in 1917.

Carlisle Companies reported its first quarter earnings results on April 26. The company reported revenues of \$1.1 billion for the quarter, which was down 8% compared to the revenues that Carlisle Companies generated during the previous year's quarter. Carlisle's revenues were higher than the analyst consensus estimate. Carlisle's revenue performance was worse than during the previous quarter, when the year-over-year growth rate was slightly better. The ongoing weakness in parts of the housing market explain why sales dipped year-over-year.

Carlisle Companies generated earnings-per-share of \$3.72 during the first quarter, beating the consensus analyst estimate easily. Carlisle Companies' earnings-per-share were up a hefty 85% from the previous year's level, as steep margin improvements more than offset the headwinds from lower revenues. Carlisle's cost-saving measures were a positive factor, and share repurchases also had a positive impact on the company's earnings-per-share growth rate during the period. In 2023, earnings-per-share totaled \$16.60, down from the record result in 2022, but still way above every year except for 2022. For the current year, a double-digit earnings-per-share increase is expected, with profits likely coming in around the peak level seen two years ago.

## Growth on a Per-Share Basis

| Year                      | 2014   | 2015   | 2016   | 2017   | 2018   | 2019   | 2020   | 2021   | 2022    | 2023    | 2024           | 2029           |
|---------------------------|--------|--------|--------|--------|--------|--------|--------|--------|---------|---------|----------------|----------------|
| <b>EPS</b>                | \$3.83 | \$4.82 | \$5.86 | \$5.53 | \$6.04 | \$8.21 | \$6.41 | \$8.89 | \$20.01 | \$16.60 | <b>\$20.00</b> | <b>\$25.53</b> |
| <b>DPS</b>                | \$0.94 | \$1.10 | \$1.30 | \$1.44 | \$1.54 | \$1.80 | \$2.05 | \$2.16 | \$3.00  | \$3.40  | <b>\$3.40</b>  | <b>\$4.55</b>  |
| <b>Shares<sup>1</sup></b> | 65     | 64     | 64     | 62     | 59     | 57     | 54     | 53     | 52      | 49      | <b>47</b>      | <b>40</b>      |

From 2009 to 2019, Carlisle recorded an average annual earnings-per-share growth rate of 15%, which is a strong result. During the last financial crisis, Carlisle's earnings-per-share did not decline a lot.

Despite its small size, Carlisle is a company that is highly active when it comes to M&A. Carlisle has been divesting lower-growth business units such as its food division in order to focus on higher-growth businesses such as Brake & Friction. Optimizing the portfolio via tuck-in acquisitions to bolster these segments further, is an opportune move that should be beneficial for Carlisle's growth going forward. Without any acquisitions Carlisle would not have been able to grow this quickly, but its organic sales growth has historically been solid as well. Thanks to a strong balance sheet and relatively low leverage levels, Carlisle can engage in M&A easily and will most likely continue to do so in coming years. Carlisle Companies bought building materials company Henry Company for \$1.6 billion to boost that part of its business.

Carlisle returns a lot of cash to its owners via share repurchases, which is beneficial for its earnings-per-share growth. In recent years, Carlisle Companies has returned \$500 million to \$1 billion a year to its owners via buybacks, even in 2020, despite the pandemic. Buybacks will remain an important earnings-per-share growth driver, we believe.

## Valuation Analysis

| Year      | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | Now         | 2029        |
|-----------|------|------|------|------|------|------|------|------|------|------|-------------|-------------|
| Avg. P/E  | 21.6 | 19.6 | 17.2 | 18.7 | 16.7 | 19.7 | 24.3 | 27.7 | 11.8 | 18.8 | <b>20.3</b> | <b>17.0</b> |
| Avg. Yld. | 1.1% | 1.2% | 1.3% | 1.4% | 1.5% | 1.1% | 1.3% | 0.9% | 1.3% | 1.1% | <b>0.8%</b> | <b>1.0%</b> |

Carlisle Companies trades at around 20 times this year's expected earnings-per-share. This is ahead of our fair value estimate, even though Carlisle has been more expensive at times over the last decade. Shareholders get a rather small dividend yield from Carlisle at current prices.

## Safety, Quality, Competitive Advantage, & Recession Resiliency

| Year   | 2014  | 2015  | 2016  | 2017  | 2018  | 2019  | 2020  | 2021  | 2022  | 2023  | 2024         | 2029         |
|--------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|--------------|--------------|
| Payout | 24.5% | 22.8% | 22.2% | 26.0% | 25.5% | 21.9% | 32.0% | 24.3% | 15.0% | 20.5% | <b>17.0%</b> | <b>17.8%</b> |

Carlisle Companies has grown its dividend every year for more than four decades, and the dividend growth rate has been attractive over the last couple of years. The company nevertheless has a relatively low dividend payout ratio, as earnings-per-share growth has been quite strong as well during that time frame. The dividend looks safe, as Carlisle Companies was able to easily cover its dividend payments during every year in the past.

As an industrial company, demand for Carlisle's products can be somewhat cyclical, but the company still managed to remain highly profitable during the last financial crisis, when profits dropped by just ten percent from 2008 to 2010. Carlisle is active in niche markets where it has a strong market position, despite its rather small size. The company's approach of growing its presence organically as well as via acquisitions allows for improving scale as the company gets bigger, which brings benefits such as operating leverage and more efficient purchasing.

## Final Thoughts & Recommendation

Carlisle Companies is a small industrial company that combines many positives, including a strong earnings and dividend growth track record, a solid long-term growth outlook, and some resilience to economic downturns. Carlisle's approach of consolidating its niche industries through M&A will likely deliver meaningful growth going forward. Following a profit decline in 2023, Carlisle should be able to get close to all-time record profits this year again. Carlisle's shares trade ahead of fair value right now, which hurts the total return outlook, which is why we rate shares a sell at current prices.
