Overview & Current Events

Equinix (composed from the words "equality", "neutrality" and "internet exchange") is a real estate investment trust (REIT) which specializes in data centers. The trust operates 260 data centers across 33 countries on 6 continents serving over 10,000 customers. More than half of the data centers are outright owned by Equinix, and these generate 66% of recurring revenues. EQIX reports revenue in a couple of different segments: colocation, interconnection, managed infrastructure and other. The Interconnection Solutions segment allow customers to connect directly, securely, and dynamically within and between other EQIX data centers around the globe. There are currently 465,000+ total interconnections. Customers of EQIX are telecommunications carriers, mobile and network service providers, cloud and IT service providers, digital media and content providers, and financial services companies. Equinix boasts of a 99.99% operational uptime across their global data centers.

Equinix was incorporated on June 22nd, 1998 and made the conversion to an REIT beginning in 2015. The corporation is headquartered in Redwood City, California. It trades under the ticker symbol EQIX on the NASDAQ. The market capitalization is \$73 billion. In 2023, 95% of total revenue was recurring.

On October 25th, 2023, Equinix announced a 25% increase to the dividend to \$4.26 quarterly per share.

Equinix reported first quarter 2024 results on May 8th, 2024. For the quarter, the company announced a 6% increase in revenue compared to Q1 2023 to \$2.1 billion. The company has thus achieved 85 consecutive quarters of revenue growth. AFFO per share increased 3% compared to the previous year quarter to \$8.86.

Equinix continues to expand on its platform and has 50 major projects in development across 34 markets.

Management provided 2024 annual guidance and expects a 6% to 7% increase in revenues. Guidance also calls for AFFO of \$3.33 billion at the midpoint, a 10.5% increase over 2023. It also estimates AFFO per share to increase by 8.5% to \$34.87.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
AFFO	\$13.81	\$13.86	\$15.06	\$18.53	\$20.69	\$22.81	\$24.76	\$27.11	\$29.55	\$32.11	\$34.87	\$53.65
DPS	\$7.57	\$17.71	\$7.00	\$8.00	\$9.12	\$9.84	\$10.64	\$11.48	\$12.40	\$14.49	\$17.04	\$26.22
Shares¹	56.5	62.1	70.8	77.6	80.2	84.7	88.4	90.4	91.8	94.0	96.0	110.0

EQIX has grown revenues for 21 years straight, and the company's bottom line has also been on a straight uptrend for many years, over a decade. For the past nine and five years, Equinix has been able to grow its AFFO per share at an average annual rate of 10% and 9%, respectively. Special dividends were paid in 2014 and 2015 due to the corporation converting to an REIT. In real normal dividend terms, the trust has accomplished 8 years of consecutive dividend growth. We expect that it will be able to grow AFFO and dividends concurrently from here on out, at an average rate of 9%. We also expect the share count to continue growing as it raises capital to fund some growth projects, though for the time being FFO should suffice for capex costs as the payout ratio is low. Growth will be achieved as Equinix grows its global platform and continues adding new data centers to its portfolio, as well as increasing interconnections and other data services.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/AFFO	14.6	18.9	22.8	23.1	20.0	21.8	28.1	28.3	22.7	23.2	21.8	23.0
Avg. Yld.	3.7%	6.8%	2.0%	1.8%	2.1%	1.9%	1.5%	1.5%	1.7%	1.8%	2.2%	2.1%

The current P/AFFO of 21.8 based on 2024's estimated AFFO is below the 5-year average of 24.8. We peg fair value at 23.0 times AFFO, which would result in a valuation tailwind. The valuation is a premium, but we believe EQIX has earned it with such a strong and successful technology focus.

Safety, Quality, Competitive Advantage, & Recession Resiliency

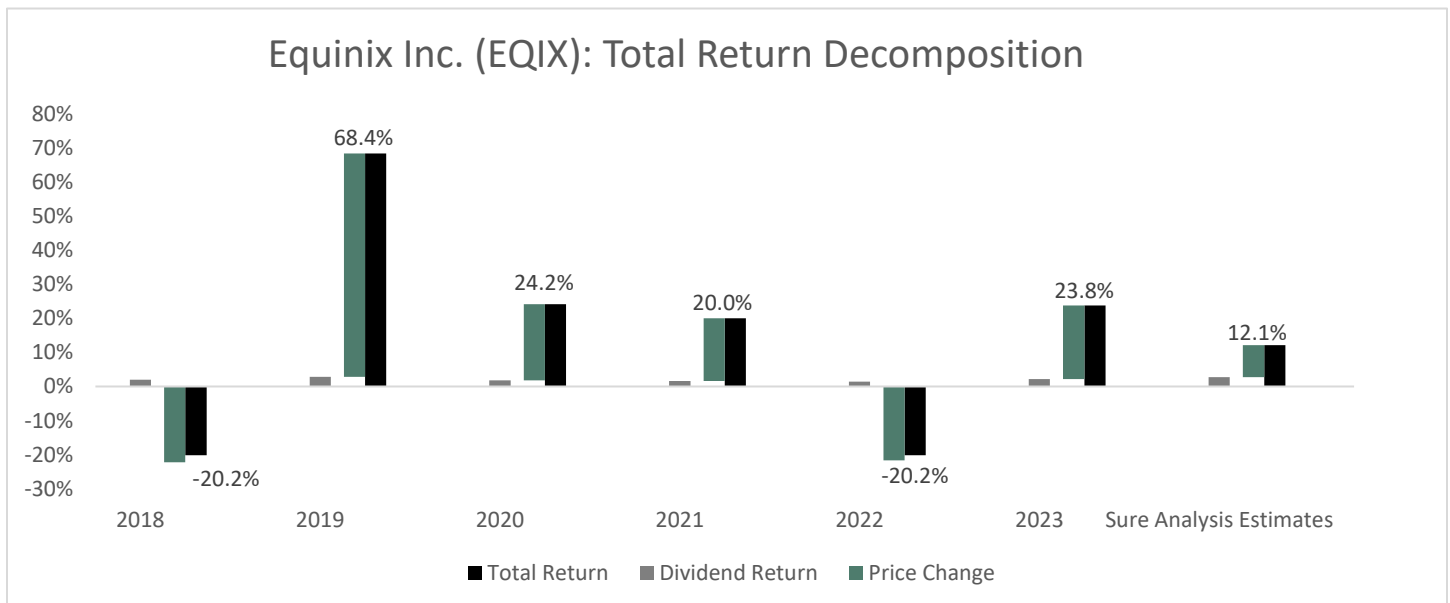

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	55%	128%	46%	43%	44%	43%	43%	42%	42%	45%	49%	49%

The forecasted payout ratio of 49% for 2024 is well covered, and leaves plenty of room for growth. The trust's competitive advantage among the world of data center REITs is its global platform spanning 33 countries and which contains the industry's largest and most active ecosystem of partners in their centers, creating a network effect that improves performance and lowers cost for customers. The trust has an S&P credit Rating of BBB, and a consolidated net debt-to-adjusted-EBITDA of 3.6X, within the 3 – 4X range set by management. EQIX was negatively affected by the Great Recession as net income dipped nearly in half, but the corporation paid no dividend at the time. It took until 2012 to surpass the net income levels seen in 2008. The COVID pandemic had the opposite effect of the Great Financial Crisis on EQIX as technology and data use increased significantly with stay-at-home orders and remote work and school, effectively boosting adjusted funds from operations.

Final Thoughts & Recommendation

Equinix is the largest data center REIT and is well diversified geographically and by revenue segment. EQIX became an REIT nine years ago and since then has grown its dividend for 8 consecutive years, and we see this continuing. We believe the stock is now trading below fair value, and forecasted annualized total returns of 12.1% are excellent. Most of this return will come from growth as the yield is low for an REIT at 2.2%. We rate EQIX as a buy for investors interested in growth.
