Overview & Current Events

Mueller Water Products is a leading manufacturer and marketer of products and services used to transmit, distribute, and measure water in North America. The company's products and services are used by municipalities and the residential and non-residential construction industries. The majority of its revenues (>90%) are derived from spending on water and wastewater infrastructure upgrades, repairs, and replacements, typically associated with the construction of new residential communities. Management estimates it has one of the largest installed bases of Iron Gate valves and fire hydrants in the United States. The company generates around $1.3 billion in annual sales and is based in Atlanta, Georgia.

On May 6th, 2024, the company reported its fiscal Q2 results for the period ending March 31st, 2024. For the quarter, revenues came in at $353.4 million, a 6.2% increase year-over-year. The Water Management Solutions segment posted sales of $147 million, down 16% year-over-year. This decrease was primarily due to lower volumes across most product lines, partially offset by higher pricing across most product lines. The Water Flow Solutions segment posted sales of $152.7 million, up 30.9% compared to last year. This increase was primarily due to higher volumes of iron gate valves and service brass products and higher pricing across most product lines.

Following higher sales and notably higher margins, EPS came in at $0.30 compared to $0.14 last year.

For the year, the company expects consolidated net sales growth to fall between -2% and flat as compared with fiscal 2023. The company also introduced guidance for full-year adjusted EBITDA, which is expected to increase between 23% and 27% compared to last year. The company expects free cash flow as a percentage of adjusted net income to be more than 75% this year as well. Based on these estimates, we forecast EPS of $0.65 for fiscal 2024.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	$0.35	$0.19	$0.40	$0.77	$0.67	$0.40	$0.45	$0.44	$0.49	$0.55	***$0.65***	***$0.83***
DPS	$0.07	$0.08	$0.10	$0.15	$0.19	$0.20	$0.21	$0.22	$0.23	$0.24	***$0.26***	***$0.31***
Shares[1]	159.2	160.5	161.3	160.1	158.2	157.8	157.8	158.4	158.0	156.8	***156.0***	***152.0***

Despite Mueller's revenues modestly growing over the past few years, they are still near the same levels they were a decade ago. The company has sustained a positive bottom line since 2014, but growth has lagged. The industry in which Mueller operates is very mature, with little to no expansion prospects. Hence apart from acquisitions, the company has few growth avenues. Further, the currently accelerated inflation could hurt the company if it isn't able to match higher costs with adequate price increases. Still, powered by growing revenues, we estimate EPS growth of 5% in the medium-term.

Mueller has never cut its dividend since its IPO. It has grown annually over the past 9 years, though at a humble rate since 2018. We expect DPS growth of around 4% going forward, considering Mueller's limited profitability growth

catalysts ahead. Continuous buybacks should contribute to EPS growth, but only $10 million worth of stock was bought back during fiscal 2023, down from $35 million repurchased in fiscal 2022.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	26.1	48.5	29.7	15.6	17.2	26.2	22.5	48.0	25.1	22.8	***27.7***	***18.0***
Avg. Yld.	0.8%	0.9%	0.8%	1.3%	1.7%	1.9%	2.0%	1,5%	1.9%	1.9%	***1.4%***	***2.1%***

Over the past decade, Mueller's valuation multiple has fluctuated based on profitability expectations. Currently, shares trade at 27.7 times our expected FY2024 EPS, despite limited growth prospects. We believe a fair valuation would be 18 times EPS. This is especially justified in a high-interest rate environment, as the company's thin growth prospects do not warrant a premium. The historical stock premium is attributed to water-related investments attracting investor interest for their mature and mission-critical business models. We anticipate the stock's yield to increase with a reasonable valuation compression, though it will likely remain soft overall.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	20%	42%	25%	19%	28%	50%	47%	50%	47%	44%	***39%***	***38%***

We consider the stock’s dividend relatively safe even as the payout ratio has moved higher over the past few years. The company is a market leader in water and wastewater infrastructure upgrades that see relatively stable annual demand. Water utility companies must modernize their facilities every a certain time period; hence robust demand should remain. The company claims that while the valve and hydrant products industry is competitive, it is a mature one and many end users are slow to transition to brands other than their historically preferred brand. Hence sales should not fluctuate wildly. Sales should remain relatively stable under a recession as well, as was the case during the Great Financial Crisis. However, the company still has little to no competitive advantages and is subject to limited growth catalysts ahead. On the positive side, Mueller’s net debt position has been declining consistently, from $1.5 billion in 2006 to $270 million as of the latest quarter. The company also has no outstanding debt maturities prior to June 2029, which should allow for flexible capital allocation in the medium-term.

Final Thoughts & Recommendation

Mueller Water Products possesses certain attractive qualities, such as robust revenues, an improving balance sheet, and a healthy dividend payout ratio. However, we believe the stock lacks prospects to deliver meaningful returns in the coming years. This is due to the possibility of valuation headwinds more than offsetting gains from growth in Mueller’s financials. Thus, we rate the stock a sell at its current levels.
