Overview & Current Events

Old Republic, founded in 1907, markets, underwrites, and provides risk management services for a variety of general and title insurances. The company engages in underwriting and related services, primarily in the US, but in Canada as well. Old Republic has three operating segments: General Insurance, Title Insurance, and a run-off business. It generates about \$7.6 billion in annual revenue and its market capitalization is \$8.1 billion. Old Republic also has an outstanding dividend increase streak of 43 years.

Old Republic posted first quarter earnings on April 25th, 2024, and results were somewhat mixed. Adjusted earnings-per-share came to 67 cents, which was two cents ahead of expectations. Revenue was up 5.5% to \$1.64 billion, but that missed estimates by \$300 million.

Consolidated combined ratio was 94.3%, which was 160 basis points worse than the year-ago period. Consolidated net premiums and fees earned were \$1.6 billion, up 5.6% year-on-year, resulting from double-digit growth in General Insurance, which was partly offset by Title Insurance weakness, which has been consistently weak in recent quarters.

Net investment income was \$164 million, which was up more than 19% year-over-year, which was driven by strong investment yields from higher prevailing market interest rates.

Book value ended the quarter at \$23.83 per share, which was up 52 cents from December. The company also boosted its dividend by 8.2% to a new payout of \$1.06 per share annually, its 43rd consecutive year of dividend increases. We now see \$2.80 per share in earnings after Q1 results.

Growth on a Per-Share Basis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
EPS	\$0.84	\$1.28	\$1.47	\$1.11	\$1.86	\$1.84	\$2.24	\$3.08	\$2.79	\$2.63	\$2.80	\$3.09
DPS	\$0.73	\$0.74	\$0.75	\$0.76	\$0.78	\$0.80	\$0.84	\$0.88	\$0.92	\$0.98	\$1.06	\$1.29
Shares²	261	262	263	269	303	303	303	303	294	272	260	220

As one would expect, Old Republic's earnings-per-share has been very volatile during the past decade. Insurers have notoriously unpredictable earnings and Old Republic is certainly no exception, having seen its earnings plummet and skyrocket multiple times in this period. We forecast Old Republic's long-term growth rate at 2%.

We see Old Republic as struggling to grow from the high base of earnings because title insurance is weak, and getting weaker. The once-hot real estate market has slowed materially, creating headwinds for what was Old Republic's primary source of growth, which is title insurance. With earnings for this year still forecast well under 2021, that headwind has not yet shown signs of abating.

The dividend will likely continue to grow at a relatively slow pace as dividend increases in the past decade have been very small. It did pay a \$1 special dividend early in 2018, late in 2019, and again in late 2020. The special dividend for 2021 was a very robust \$1.50, and for 2022, it was \$1.00. The stock's yield is still strong even with its sluggish payout

growth, so income investors will likely find it attractive. The special dividends make the total yield for the year close to 10%, but we note there was no special dividend in 2023.

Valuation Analysis

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Now	2029
Avg. P/E	18.6	12.5	12.6	18.0	11.4	12.0	7.8	7.7	8.7	11.2	10.7	11.0
Avg. Yld.	4.7%	4.6%	4.1%	3.8%	3.7%	3.6%	4.8%	3.7%	3.8%	3.3%	3.5%	3.8%

Old Republic's price-to-earnings multiple has been volatile in recent years, but that has mostly been due to changes in earnings and not valuation resets from investors. Our estimate of fair value for Old Republic is 11 times earnings, which is higher than the current 10.7, and lower than its average of ~12. We are therefore forecasting a diminutive tailwind to annual total returns from the valuation over the coming years.

We see the yield staying very strong. The wildcard is the recent special dividends the company paid in lieu of larger quarterly dividend increases, but we think Old Republic will continue to be a strong income stock for years to come.

Safety, Quality, Competitive Advantage, & Recession Resiliency

Year	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2029
Payout	87%	59%	51%	68%	42%	43%	38%	29%	33%	37%	38%	42%

The payout ratio has fallen significantly in recent years. Given slow payout growth coupled with strong earnings, that trend could continue. Overall, Old Republic is in significantly better shape than it was a few years ago. We note the lack of earnings growth projected could see the payout ratio rise somewhat in the near future.

Old Republic operates in a tremendously competitive field, making advantages hard to come by. However, it sets itself apart with its strong premiums against claims, which is the product of prudent underwriting. We note that Old Republic is exposed to weak real estate markets through its title insurance business.

Final Thoughts & Recommendation

Overall, Old Republic looks good from an income stock perspective if one can stomach the potential risk of owning an insurer. The stock is now slightly under our view of fair value estimate and offers forecasted total annual returns of 5.9% in the coming years, consisting of the current 3.5% yield, 2% earnings-per-share growth, and a 0.5% tailwind from the potentially increasing valuation. The only caveat is that owning any insurer is an exercise in patience as Old Republic's growth will likely be far from constant, and the lack of a special dividend in 2023. We are reiterating our hold rating following Q1 results.
